Stiff: The Curious Lives of Human Cadavers Mary Roach, 2004-05-17 Beloved, best-selling science writer Mary Roach's "acutely entertaining, morbidly fascinating" (Susan Adams, Forbes) classic, now with a new epilogue. For two thousand years, cadavers – some willingly, some unwittingly – have been involved in science's boldest strides and weirdest undertakings. They've tested France's first guillotines, ridden the NASA Space Shuttle, been crucified in a Parisian laboratory to test the authenticity of the Shroud of Turin, and helped solve the mystery of TWA Flight 800. For every new surgical procedure, from heart transplants to gender confirmation surgery, cadavers have helped make history in their quiet way. "Delightful—though never disrespectful" (Les Simpson, Time Out New York), *Stiff* investigates the strange lives of our bodies postmortem and answers the question: What should we do after we die? "This quirky, funny read offers perspective and insight about life, death and the medical profession. . . . You can close this book with an appreciation of the miracle that the human body really is." –Tara Parker-Pope, Wall Street Journal "Gross, educational, and unexpectedly sidesplitting." –Entertainment Weekly

Rosetown Cynthia Rylant, 2018-05-08 "Eloquent and resonant...poignantly underscores the significance of family, friendship, and home." –Publishers Weekly (starred review) "Gentle and old-fashioned in the best sense...a little gem about small-town life." –Booklist (starred review) "A sweet story for children dealing with change." –Kirkus Reviews From Newbery Medalist Cynthia Rylant comes the charming story of nine-year-old Flora Smallwood and the eventful year she spends in the quiet community of Rosetown, Indiana. For nine-year-old Flora Smallwood, Rosetown, Indiana, is full of surprises, many of the best of which happen at the Wing and a Chair Used Book Shop, where she loves to read vintage children's books after school in the faded purple chair by the window. But lately, those surprises haven't been so good. Her dear old dog, Laurence, recently passed away. Not long after, her parents decided to take a breather from their marriage, and now Flora has to move back and forth between their two houses. Plus, she's just begun fourth grade, and it is so much different than third. Luckily Flora has two wonderful friends—one old and one new. And with them around to share thoughts and laughs and adventures big and small, life in Rosetown still has many sweet moments—and even some very happy surprises!

Causes and Conditions: A Life Experience in Addiction and Recovery Joseph Conniff, 2021-04-12 On the surface, Joe Conniff grew up in a seemingly stereotypical suburban New England household. But behind those doors he witnessed the

overprescribing of opioids to his mother, combined with the ups and downs of his father's often illegitimate occupation and unpredictability of life as a teenager. Eventually Joe found solace and relief in substances when looking for a way to escape the unpleasantness of life. That search for relief and identity took him from east coast white suburbia to military service, and finally grief, desperation and survival on the streets of the Pacific Northwest. Written from the perspective of recovery and having found happiness without the use of substances, Joe shares his experiences and insight about how he became a product of his environment growing up, and how confusion and conflict in the human condition led him to full blown addiction. This is an in-depth book about the causes and conditions of his extreme substance use, as well as the casues and conditions of his recovering from addiction.

The Magical Imperfect Chris Baron, 2021-06-15
Highly recommended... Perfect for readers of Wonder and Erin Entrada Kelly's Hello, Universe.—Booklist magazine, starred review Etan has stopped speaking since his mother left. His father and grandfather don't know how to help him. His friends have given up on him. When Etan is asked to deliver a grocery order to the outskirts of town, he realizes he's at the home of Malia Agbayani, also known as the Creature. Malia stopped going to school when her acute eczema spread to her face, and the bullying became too much. As the two become friends, other kids tease Etan for knowing the Creature. But he believes he might have a cure for Malia's condition, if only

he can convince his family and hers to believe it too. Even if it works, will these two outcasts find where they fit in?

Cosmic Explosions J.M. Marcaide, Kurt Weiler, 2004-11-17 Supernovae are among the most energetic phenomena in the Universe and related to almost all aspects of modern astrophysics including starburst galaxies, cosmic ray acceleration, neutron star and black hole formation, nucleosynthesis and ISM chemical enrichment, energy input to the ISM, cosmic distance scale determination, dark energy related cosmological acceleration, gamma-ray bursts, extra-solar system neutrino burst detection, gravity wave generation, and many more. Additionally, the past 15 years have been particularly productive with many new results and new understanding due in particular to the closest SN in 400 years in SN 1987A in the Large Magellanic Cloud, and the unusually bright and close SN 1993J and SN 1994I in the nearby galaxies M81 and M51, respectively. In addition, the discovery of the gamma-ray burst GRB 980425 and its related supernova SN 1998bw, and the confirmation of GRB 030329/SN 2003dh, tied the study of SNe and GRBs inextricably together. With the many developments since the last major supernova meeting in La Serena, Chile in 1997, we felt that it was an appropriate time to bring together experts and students interested in the subject for a meeting where SN and GRB properties and interrelationships could be discussed. The tenth anniversary of SN 1993J provided such an opportunity and, appropriately, the meeting was held in Spain where

SN 1993J was discovered on the early morning of 28 March 1993 by a Spanish amateur astronomer, Francisco Garc a.

The Great Deformation David Stockman, 2013-04-02
A New York Times bestseller *The Great Deformation* is a searing look at Washington's craven response to the recent myriad of financial crises and fiscal cliffs. It counters conventional wisdom with an eighty-year revisionist history of how the American state -- especially the Federal Reserve -- has fallen prey to the politics of crony capitalism and the ideologies of fiscal stimulus, monetary central planning, and financial bailouts. These forces have left the public sector teetering on the edge of political dysfunction and fiscal collapse and have caused America's private enterprise foundation to morph into a speculative casino that swindles the masses and enriches the few. Defying right- and left-wing boxes, David Stockman provides a catalogue of corrupters and defenders of sound money, fiscal rectitude, and free markets. The former includes Franklin Roosevelt, who fathered crony capitalism; Richard Nixon, who destroyed national financial discipline and the Bretton Woods gold-backed dollar; Fed chairmen Greenspan and Bernanke, who fostered our present scourge of bubble finance and addiction to debt and speculation; George W. Bush, who repudiated fiscal rectitude and ballooned the warfare state via senseless wars; and Barack Obama, who revived failed Keynesian borrow and spend policies that have driven the national debt to perilous heights. By contrast, the book also

traces a parade of statesmen who championed balanced budgets and financial market discipline including Carter Glass, Harry Truman, Dwight Eisenhower, Bill Simon, Paul Volcker, Bill Clinton, and Sheila Bair. Stockman's analysis skewers Keynesian spenders and GOP tax-cutters alike, showing how they converged to bloat the welfare state, perpetuate the military-industrial complex, and deplete the revenue base -- even as the Fed's massive money printing allowed politicians to enjoy deficits without tears. But these policies have also fueled new financial bubbles and favored Wall Street with cheap money and rigged stock and bond markets, while crushing Main Street savers and punishing family budgets with soaring food and energy costs. The Great Deformation explains how we got here and why these warped, crony capitalist policies are an epochal threat to free market prosperity and American political democracy.

Scandals of Classic Hollywood Anne Helen Petersen,2014-09-30 Celebrity gossip meets history in this compulsively readable collection from Buzzfeed reporter Anne Helen Peterson. This guide to film stars and their deepest secrets is sure to top your list for movie gifts and appeal to fans of classic cinema and hollywood history alike. Believe it or not, America's fascination with celebrity culture was thriving well before the days of TMZ, Cardi B, Kanye's tweets, and the

#metoo allegations that have gripped Hollywood. And the stars of yesteryear? They weren't always the saints that we make them out to be. BuzzFeed's Anne Helen Petersen, author of *Too Fat, Too Slutty, Too Loud*, is here to set the record straight. Pulling little-known gems from the archives of film history, Petersen reveals eyebrow-raising information, including: • The smear campaign against the original It Girl, Clara Bow, started by her best friend • The heartbreaking story of Montgomery Clift's rapid rise to fame, the car accident that destroyed his face, and the "long suicide" that followed • Fatty Arbuckle's descent from Hollywood royalty, fueled by allegations of a boozy orgy turned violent assault • Why Mae West was arrested and jailed for indecency charges • And much more Part biography, part cultural history, these stories cover the stuff that films are made of: love, sex, drugs, illegitimate children, illicit affairs, and botched cover-ups. But it's not all just tawdry gossip in the pages of this book. The stories are all contextualized within the boundaries of film, cultural, political, and gender history, making for a read that will inform as it entertains. Based on Petersen's beloved column on the Hairpin, but featuring 100% new content, *Scandals of Classic Hollywood* is sensationalism made smart.

Field Methods in Remote Sensing Roger M. McCoy, 2005-01-01 This concise, much-needed guide takes readers step by step through planning and executing field work associated with many different types of remote sensing projects. Remote sensing texts and research reports typically focus

on data-analytic techniques while offering a dearth of information on procedures followed in the field. In contrast, this book provides clear recommendations for defining field work objectives, devising a valid sampling plan, finding locations using GPS, and selecting and using effective measurement techniques for field reflectance spectra and for studies of vegetation, soils, water, and urban areas. Appendices feature sample field note forms, an extensive bibliography on advanced and specialized methods, and online metadata sources.

Niche Envy Joseph Turow, 2008-02-15 The price we pay for the new strategies in database marketing that closely track desirable customers, offering them benefits in return for personal information. We have all been to Web sites that welcome us by name, offering us discounts, deals, or special

access to content. For the most part, it feels good to be wanted—to be valued as a customer. But if we thought about it, we might realize that we've paid for this special status by turning over personal information to a company's database. And we might wonder whether other customers get the same deals we get, or something even better. We might even feel stirrings of resentment toward customers more valued than we are. In *Niche Envy*, Joseph Turow examines the emergence of databases as marketing tools and the implications this may have for media, advertising, and society. If the new goal of marketing is to customize commercial announcements according to a buyer's preferences and spending history—or even by race, gender, and political opinions—what does this mean for the twentieth-century tradition of equal access to product information, and how does it affect civic life? Turow shows that these marketing techniques are not wholly new; they have roots in direct marketing and product placement, widely used decades ago and recently revived and reimaged by advertisers as part of customer relationship management (known popularly as CRM). He traces the transformation of marketing techniques online, on television, and in retail stores. And he describes public reaction against database marketing—pop-up blockers, spam filters, commercial-skipping video recorders, and other ad-evasion methods. Polls show that the public is nervous about giving up personal data. Meanwhile, companies try to persuade the most desirable customers to trust them with their information in return for benefits. *Niche Envy* tracks the marketing logic

that got us to this uneasy impasse.
