Tiger Beetles David L. Pearson,Alfried P.

Vogler,2001 Tiger beetles are one of the most obvious and ubiquitous families of any insect taxon--some 2300 species are found on nearly all the land surfaces of the earth. Their frequently showy colors, brazen behavior, and ability to live in habitats ranging from dry, alkaline lakebeds to tropical rain forests have captured the interest of amateur and professional entomologists alike. Although tiger beetles have been widely studied, the wealth of knowledge has been synthesized only briefly in a few sources. In *Tiger Beetles*, David L. Pearson and Alfried P. Vogler provide for the first time a detailed integration and summary of all that is known about the family Cicindelidae. The book's early chapters cover anatomy, distribution, and natural history. Pearson and Vogler build from these basics to show the usefulness of tiger beetles for exploring questions in genetics, biogeography, ecology, behavior, and conservation. As bioindicators, the tiger beetles present in an area may allow biologists to pinpoint places with the richest diversity of animal and plant life. The use of tiger beetles as model organisms has made possible or greatly enhanced many areas of research, including molecular phylogeny, the function of acute hearing, spatial modeling, and physiology of vision.

*Race, Gender, and Comparative Black Modernism*  
Jennifer M. Wilks, 2008-12-01 *Race, Gender, and Comparative Black Modernism* revives and critiques four African American and Francophone Caribbean women writers sometimes overlooked in discussions of early-twentieth-century literature: Guadeloupean Suzanne Lacascade (dates unknown), African American Marita Bonner (1899--1971), Martinican Suzanne Césaire (1913--1966), and African American Dorothy West (1907--1998). Reexamining their most significant work, Jennifer M. Wilks demonstrates how their writing challenges prevailing racial archetypes -- such as the New Negro and the Negritude hero -- of the period from the 1920s to the 1940s, and explores how these writers tapped into modernist currents from expressionism to surrealism to produce progressive treatments of race, gender, and nation that differed from those of currently canonized black writers of the era, the great majority of whom are men. Wilks begins with Lacascade, whom she deems best known for being unknown, reading Lacascade's novel *Claire-Solange, âme africaine* (1924) as a protofeminist, proto-Negritude articulation of Caribbean identity. She then examines the fissures left unexplored in New Negro visions of African American community by showing the ways in which Bonner's essays, plays, and short stories

highlight issues of economic class. Césaire applied the ideas and techniques of surrealism to the French language, and Wilks reveals how her writings in the journal *Tropiques* (1941-45) directly and insightfully engage the intellectual influences that informed the work of canonical Negritude. Wilks' close reading of West's *The Living Is Easy* (1948) provides a retrospective critique of the forces that continued to circumscribe women's lives in the midst of the social and cultural awakening presumably embodied in the New Negro. To show how the black literary tradition has continued to confront the conflation of gender roles with social and literary conventions, Wilks examines these writers alongside the late twentieth-century writings of Maryse Condé and Toni Morrison. Unlike many literary analysts, Wilks does not bring together the four writers based on geography. Lacascade and Césaire came from different Caribbean islands, and though Bonner and West were from the United States, they never crossed paths. In considering this eclectic group of women writers together, Wilks reveals the analytical possibilities opened up by comparing works influenced by multiple intellectual traditions.

**Satellite Communication Systems Design S.**

Tirró,1993-06-30 Writing a comprehensive book on satellite communications requires the command of many technical disciplines and the availability of up-to-date information on international recommendations, system architectures, and equipment standards. It is therefore necessary to involve many authors, each possessing a good level of knowledge in a particular discipline. The problem of using a coherent and unambiguous set of definitions and basic terms has been solved by including in the book all the background information needed for understanding satellite

communication systems, without any major reference to other textbooks specializing in particular disciplines. The obvious consequence of this approach has been the large size of the book, with the advantages, however, of practically complete independence from other books, more systematic discussion of the subject matter, and better readability. After the required background information, emphasis has been placed on the discussion of techniques and system design criteria rather than on specific equipment implementation or description of particular systems. The book may be divided in five parts as follows: • The first five chapters provide most of the required background information. • Chapter 6 is an introductory outline of satellite communication systems. • Chapters 7 to 13 deal with the various aspects of technical system design. • Chapter 14 discusses system economics. • Chapter 15 provides a brief insight into some foreseeable future developments of satellite communications.

Oswald Boelcke R.G. Head, 2016-08-05 This biography of the pioneering WWI flying ace who mentored the Red Baron is "fascinating . . . [it] captures combat aviation at its inception" (MiG Sweep: The Magazine of Aviation Warriors). With a total of forty victories, Oswald Boelcke was Germany's first ace in World War I—and a century later he remains a towering figure in the history of air warfare, renowned for his character, inspirational leadership, organizational genius, development of air-to-air tactics, and impact on aerial doctrine. Paving the way for modern air forces across the world with his pioneering strategies, Boelcke had a dramatic effect on his contemporaries. The famed Red Baron's mentor, instructor, squadron commander, and friend, he exerted a tremendous influence upon the German air

force. He was one of the first pilots to be awarded the famous Pour le Mérite, commonly recognized as the "Blue Max." All of this was achieved after overcoming medical obstacles in childhood and later life with willpower and determination. Boelcke even gained the admiration of his enemies: After his tragic death in a midair collision, Britain's Royal Flying Corps dropped a wreath on his funeral, and several of his captured foes sent another wreath from their German prison camp. His name and legacy live on, as seen in the Luftwaffe's designation of the Tactical Air Force Wing 31 "Boelcke." This definitive biography reveals his importance as a fighter pilot who set the standard in military aviation.
