### **Inside the Crystal Ball** Maury Harris, 2014-12-12 A

practical guide to understanding economic forecasts In *Inside the Crystal Ball: How to Make and Use Forecasts*, UBS Chief U.S. Economist Maury Harris helps readers improve their own forecasting abilities by examining the elements and processes that characterize successful and failed forecasts. The book: Provides insights from Maury Harris,

named among Bloomberg's 50 Most Influential People in Global Finance. Demonstrates best practices in the assembly and evaluation of forecasts. Harris walks readers through the real-life steps he and other successful forecasters take in preparing their projections. These valuable procedures can help forecast users evaluate forecasts and forecasters as inputs for making their own specific business and investment decisions. Emphasizes the critical role of judgment in improving projections derived from purely statistical methodologies. Harris explores the prerequisites for sound forecasting judgment—a good sense of history and an understanding of contemporary theoretical frameworks—in readable and illuminating detail. Addresses everyday forecasting issues, including the credibility of government statistics and analyses, fickle consumers, and volatile business spirits. Harris also offers procedural guidelines for special circumstances, such as natural disasters, terrorist threats, gyrating oil and stock prices, and international economic crises. Evaluates major contemporary forecasting issues—including the now commonplace hypothesis of sustained economic sluggishness, possible inflation outcomes in an environment of falling unemployment, and projecting interest rates when central banks implement unprecedented low interest rate and quantitative easing (QE) policies. Brings to life Harris's own experiences and those of other leading economists in his almost four-decade career as a professional economist and forecaster. Dr. Harris presents his personal recipes for long-term credibility and commercial success to anyone offering advice about the future.

*An Algorithmic Crystal Ball: Forecasts-based on Machine Learning* Jin-Kyu Jung, Manasa Patnam, Anna Ter-Martirosyan, 2018-11-01 Forecasting macroeconomic variables is key to developing a view on a country's

economic outlook. Most traditional forecasting models rely on fitting data to a pre-specified relationship between input and output variables, thereby assuming a specific functional and stochastic process underlying that process. We pursue a new approach to forecasting by employing a number of machine learning algorithms, a method that is data driven, and imposing limited restrictions on the nature of the true relationship between input and output variables. We apply the Elastic Net, SuperLearner, and Recurring Neural Network algorithms on macro data of seven, broadly representative, advanced and emerging economies and find that these algorithms can outperform traditional statistical models, thereby offering a relevant addition to the field of economic forecasting.

**A Song for a New Day** Sarah Pinsker, 2019-09-10  
WINNER OF THE NEBULA AWARD After a global pandemic makes public gatherings illegal and concerts impossible, except for those willing to break the law for the love of music—and for one chance at human connection. In the Before, when the government didn't prohibit large public gatherings, Luce Cannon was on top of the world. One of her songs had just taken off and she was on her way to becoming a star. Now, in the After, terror attacks and deadly viruses have led the government to ban concerts, and Luce's connection to the world—her music, her purpose—is closed off forever. She does what she has to do: she performs in illegal concerts to a small but passionate community, always evading the law. Rosemary Laws barely remembers the Before times. She spends her days in Hoodspace, helping customers order all of their goods online for drone delivery—no physical contact with humans needed. By lucky chance, she finds a new job and a new calling: discover amazing musicians and bring their concerts to everyone via virtual reality. The only catch is that she'll have to do something she's never done before and go out in public. Find the illegal concerts and bring musicians into the limelight they deserve. But when she sees how the world could actually be, that won't be enough.

**Prediction Machines, Updated and Expanded** Ajay

Agrawal,Joshua Gans,Avi Goldfarb,2022-11-15 Named one of The five best books to understand AI by The Economist The impact AI will have is profound, but the economic framework for understanding it is surprisingly simple. Artificial intelligence seems to do the impossible, magically bringing machines to life—driving cars, trading stocks, and teaching children. But facing the sea change that AI brings can be paralyzing. How should companies set strategies, governments design policies, and people plan their lives for

a world so different from what we know? In the face of such uncertainty, many either cower in fear or predict an impossibly sunny future. But in *Prediction Machines*, three eminent economists recast the rise of AI as a drop in the cost of prediction. With this masterful stroke, they lift the curtain on the AI-is-magic hype and provide economic clarity about the AI revolution as well as a basis for action by executives, policy makers, investors, and entrepreneurs. In this new, updated edition, the authors illustrate how, when AI is framed as cheap prediction, its extraordinary potential becomes clear: Prediction is at the heart of making decisions amid uncertainty. Our businesses and personal lives are riddled with such decisions. Prediction tools increase productivity—operating machines, handling documents, communicating with customers. Uncertainty constrains strategy. Better prediction creates opportunities for new business strategies to compete. The authors reset the context, describing the striking impact the book has had and how its argument and its implications are playing out in the real world. And in new material, they explain how prediction fits into decision-making processes and how foundational technologies such as quantum computing will impact business choices. Penetrating, insightful, and practical, *Prediction Machines* will help you navigate the changes on the horizon.

**Unlocking the Crystal Ball** Loïs Francesca van de Water, 2024 When a patient gets diagnosed with esophageal or gastric cancer a complex decision must be made: which treatment to start? To be able to participate in shared decision making, patients need to be well-informed on treatment options and their possible outcomes, such as chances of survival, risks of side effects and expected quality of life. However, clinicians do not have a crystal ball, so communication about treatment outcomes can be complicated. This dissertation's aims were twofold: 1. To paint a picture of information giving and decision making in esophagogastric cancer and 2. To improve the information given to patients about treatment outcomes in order to support their decision making. We described decision making in the setting of curative treatment of esophageal

cancer. Subsequently, we explored shared decision making and its potential relation to less beneficial outcomes. Zooming in on information giving, we described clinicians' information giving about tobacco and alcohol use during treatment and we summarized the literature on the effects of different formats of information giving about treatment risks and benefits. To aid clinicians in providing this complicated information about treatment and treatment outcomes, we developed a prediction tool and supporting communication skills training. After pilot testing, we evaluated the effect of the tool and training in a multicenter clinical trial. The intervention resulted in clinicians providing information significantly more precise, more personalized to patients' clinical characteristics, more tailored to patients' needs and preferences and more often supported by visualizations. Although 'crystal ball' might be overstated, our intervention does seem helpful in improving communication about treatment.--

en principio el  
olvido de los  
sueños parece  
ligado a la escasa  
carga emocional  
que tienen un  
buen porcentaje  
de ellos por esto y  
también quizás  
por ser de baja  
intensidad los  
sueños son  
olvidados sino
