Presented in this memoir are experiences depicting the impact of such abuse on one child's journey into adulthood. Throughout the pages, the unfolding of real life incidents allows for not only the awareness crucial to prevention but also for guidance through examples of effectively employed intervention and remediation strategies. This book's targeted audience includes but is not restricted to parents, guardians, professional advocates, therapists, teachers, childcare providers, medical professionals and survivors of sexual abuse. Within this book is knowledge and knowledge has the potential to positively influence the welfare of all who have or may have to face this needless reality of our society.

Poems by a Mother Anne Rhodes - Davis,2005-11-01 In searching for support for her children and herself, the author talked to child sexual abuse professionals and many other mothers whose children had been abused. She found that her family's experiences were shared by many other families and that they all felt isolated and alone. They shared many dilemmas and questions. They shared the feelings of shock, horror, fear, guilt, grief and panic. They shared the difficulties of how to tell friends and family and often the trauma of going to court. They shared the frustration at other perception of sexual abuse and the ways that offenders often excuse their behavior. These poems were therapeutic for the author and written to explain her own feelings and dilemmas but also to support other mothers and their children. They hope to raise public and professional awareness of the scale of child sexual abuse, to show how difficult it may be for children to disclose and the damage that is caused to the children, adult survivors and the people who care for them.

Breaking the Cycle of Silence Daniel Pearse,2020-09-13 The latest statistics tell us that one out of three girls and one out of six boys will be sexually abused before the age of eighteen, destroying their lives in ways we can't even imagine. We also know that 90 percent of the time, victims know their abuser. Daniel Pearse is living proof of both these statistics. He and his brother were sent to live with a pedophile after their mother died. For nine years, Daniel suffered sexual, physical, emotional, mental, and verbal abuse at the hands of his tormentor. Like many abused children, Daniel then suffered in silence for decades as an adult. Now, he's committed to stopping the cycle of abuse that causes so much pain. Breaking the Cycle of Silence proposes age-appropriate sexual abuse training and education in schools. It teaches children what is appropriate, shows adults the signs of abuse to look for, and offers sources of support for victims. With such training and education, we can identify and stop abusers, preventing them from claiming victim after victim for years.

Child Sexual Abuse: Empirical Research on Understanding and Helping Victims and Offenders Noora Ellonen,Robert Horselenberg,Cristina Izura,Taina Laajasalo,Nadia Marie Wager,2022-03-11

Preventing Child Sexual Abuse Sandy K. Wurtele,Cindy L. Miller-Perrin,1993-01-01 The past decade has seen a dramatic increase in the attention paid to the problem of child sexual abuse. Professionals from the social work, mental health, medical, academic, and legal fields are all involved in researching the prevalence, causes, and consequences of abuse. Child sexual abuse in multidimensional: it is determined by forces at work in victims and offenders, in the family, and in the community and society at large. Thoroughly researched, Preventing Child Sexual Abuse surveys incidence and prevalence studies; lists risk and protective factors in abuse; discusses various indicators of abuse; and reports on legislation related to abuse. It reviews preventive programs aimed at children and adults, and provides suggestions for an expanded involvement of parents, professionals, policymakers, researchers, and the general public. In doing so, it provides the information needed to create prevention programs that attack the problem on several fronts at once.

Jones,2013-01-29 This book is the first comprehensive study of child sexual abuse in the Caribbean, exploring issues such as the ontology of childhood, links between slavery, colonialism and present-day gender-based violence, the impact of child sexual abuse on the brain and child protection after natural disasters.

Survivors of Childhood Sexual Abuse and Midwifery Practice Lis Garratt,2018-11-05 Many midwives will care for women who are survivors of childhood sexual abuse (CSA), whether these women disclose this or not. Pregnant and birthing women commonly experience their bodies becoming 'public property', a variety of sometimes intimate medical procedures, and limited choices on where and how care is provided. For CSA survivors, who have suffered loss of ownership over their bodies as children and may experience recurring feelings of powerlessness and loss of control, these factors can combine with impersonal and medicalised settings and practices to deeply traumatic effect. 'Sexual abuse is all about power, not sex.' - interviewee Many midwives also experience powerlessness and loss of control as professionals as a result of these same settings and practices, and those midwives who are themselves CSA survivors bring a particularly acute awareness of this and of the needs of survivor mothers. This unique study sets out to gain a deeper understanding of the needs of these mothers by exploring them alongside the parallel experiences of survivor midwives. It explores the insights and reflections they together bring to midwifery, and the positive results of more collaborative, personal, communicative and ultimately empowering practices for all involved. 'The significance of this book is far wider than its immediate subject, for it offers us the opportunity to rethink our professional coping strategies. If we seek to make all our professional relationships ones of equality and opportunities for growth, as would benefit someone who has suffered abuse, then we can all grow and flourish.' - from the Foreword by Mavis Kirkham

Human Performance, Situation Awareness, and Automation Dennis A. Vincenzi, Mustapha Mouloua, Peter A. Hancock, 2005-01-06 In 2000, the Conference on Automation joined forces with a partner group on situation awareness (SA). The rising complexity of systems demands that one can be aware of a large range of environmental and task-based stimulation in order to match what is done with what has to be done. Thus, SA and automation-based interaction fall naturally together and this conference is the second embodiment of this union. Moving into the 21st century, further diversification of the applications of automation will continue--for example, the revolution in genetic technology. Given the broad nature of this form of human-machine interaction, it is vital to apply past lessons to map a future for the symbiotic relationship between humans and the artifacts they create. It is as part of this ongoing endeavor that the present volume is offered.

Governing Child Abuse Voices and Victimisation Jodi Death, 2017-10-25 Child sexual abuse by clergy within the Roman Catholic Church has emerged as a social and political discourse over the last three decades. The analysis here specifically focuses on the establishment, conduct, and outcomes of the extensive public inquiries of Australia, although inquiries in other jurisdictions are also discussed. Unlike criminal or civil processes, although they may be inquisitory in nature, public inquiries emerge from a specifically political context and are a tool of governance embedded in a larger context of governmentality. Understanding the broader political and cultural contexts of public inquiries is important, then, in understanding their value and effectiveness as justice processes – especially for victims of CSA by clergy. What is interesting about public inquiry is that it situates victims of CSA by clergy outside of criminal and civil justice processes and recognises a different politicised relationship between victims as citizens, the state, and Catholic institutions where abuse has occurred. At the cutting edge of disciplinary and methodological understandings of the interconnections between the church, state and families, his book explores the dynamics of the emergence and politicisation of victims of CSA by clergy, their expressions of resistance and the legitimisation of their voice in public and political spheres.

Can participatory video-based extension increase awareness and knowledge of climate adaptation practices? Insights from rural Kenya Ndegwa, Michael K., Ringler, Claudia, Muteti, Francisca N., Kato, Edward, Bryan, Elizabeth, 2023-10-31 Climate-smart agriculture (CSA) has been promoted as a framework to identify a set of solutions that simultaneously sustain agricultural productivity and incomes, increase the resilience of agriculture, and reduce greenhouse gas emissions. However, it has proven to be challenging to reach women farmers with information on CSA practices. This note summarizes results from a study that assessed whether participatory video-based extension approaches tailored to women's preferred CSA approaches could reduce the gender gap in awareness and adoption of CSA practices in Kenya. The findings suggest that watching the videos increased awareness of the CSA practices promoted in the videos as well as other practices. However, watching the videos did not increase the adoption of the CSA practices. We propose strategies to strengthen the uptake of CSA practices alongside participatory video-based extension.

Understanding Child Sexual Maltreatment Kathleen Coulborn Faller, 1990-06-01 Despite increased awareness of the problem of sexual abuse, most institutions training the helping professions have trouble compiling material for their regular curricula on child sexual victimization. This book fills the need for all the relevant material to be drawn together in an accessible form. The clear structure takes the reader through terms and approaches and provides useful guidelines for dealing with sexual maltreatment. It will be an indispensable tool for helping professionals and others making assessment and intervention decisions in cases of child sexual abuse.

Creative Responses to Child Sexual Abuse Sue Richardson, Heather Bacon, 2003-01-15 Despite heightened media attention and the increase in professional knowledge about child abuse, many children are still being failed by the system. Using attachment theory as a foundation, this book addresses in depth the acute practice dilemmas concerning children who, despite the climate of increased awareness, multi-disciplinary cooperation and legislative and procedural change, cannot easily be protected. The contributors give guidelines for working with the children, in particular those who, unable to disclose their experience themselves, are the most difficult to support. Illustrated throughout with case material and informed by the experiences of survivors themselves, the book presents a framework for well managed and resourced, flexible and integrated intervention with children, their families, and the community that will enable professionals and families to work together to break the 'cycle of abuse'.

Representations of Child Sexual Abuse in Jamaica Tatyana Karpenko-Seccombe, Kenisha Nelson, Christine Fray, Roxanne Harvey, Karyl Powell-Booth, Adele Jones, Nadia Wager, Xiaomin Sheng, 2022-08-18 News media shape public opinion on social issues such as child sexual abuse (CSA), using particular language to foreground, marginalize or legitimize certain viewpoints. Given the prevalence of CSA and the impact of violence against children in Jamaica, there is a need to examine the representation of children and their experience of violence in the news media, which remain the main source of information about such abuse for much of the population. The study aims to analyze accounts of CSA in Jamaican newspapers in order to show how different representations impact public understanding of CSA. This study offers a new perspective around child abuse by using an eight-million word corpus from articles over a three-year period (2018- 2020). The study argues that media reports often fail to conceptualise and represent accurately children who have experienced abuse. Representations of children are generic, their experiences often reduced to statistical summaries. Corpus analysis uncovered the use of terms which normalize sexual abuse. From the reader's perspective, there was little emotional connection to the child or the child's experience. The newspapers rarely report first-hand survivors' experience of abuse, depriving these children of a voice. Instead, a marked preference is given to institutional voices. An issue of concern is a tendency to sensationalism with disproportionate attention given to cases involving celebrities. By exposing these problems, the authors hope that news media in Jamaica can play a more positive role in heightening awareness around child abuse and allowing the voices of victims/ survivors to be heard.

Protecting Your Child from Predators Beth EdD Robinson, Latayne C. PhD Scott, 2019-08-06 Even good parents often underestimate the dangers their children face. Research indicates that one in four females and one in six males are sexually abused before age 18. In most cases, the enemy is not a faceless stranger; it's someone you know and trust--a neighbor, a coach, or even a family member. This book provides practical steps to ensure you're doing all you can to reduce the risks of abuse. But since you cannot be with your children 24/7, it goes beyond what you can do as a parent to teach you how to increase your child's own awareness and strategies in the face of potential dangers--without making them fearful. Dr. Robinson, whose decades-long practice focuses on abused and endangered children, calls on her own case studies to show age- appropriate conversation starters for parents, teaching them how to ask the right questions and provide the right boundaries. This book will help you move from fear to confidence on this heavy topic that is just too important to ignore.

Transforming Trauma Anna Salter, 1995-05-31 The premise of this book is that those who do not recognize an internalized perpetrator when they hear one will often be frustrated by the tenacity of the survivor's self blame. Primarily oriented towards treating adult survivors, this book will also be useful for treating sex offenders. Salter also describes the steps of therapy for survivors and proposes that trauma can be transformed rather than just endured.
