It also describes integration points with other IBM products that can enhance

the mobile solution. This book has two parts: Part 1 is for a business-oriented IT audience and addresses business aspects of the mobile industry. It is for the IT architect or CTO, who can translate business needs into information technology solutions Part 2 is intended for a technical audience, including application developers, testers, and system administrators.

Corporate Social Responsibility and Local Community in Asia Kyoko

Fukukawa,2014-04-03 The idea of corporations exercising corporate social responsibility has spread from the West and is now firmly embedded in Asian countries and in Asian corporations. The latest trend in corporate social responsibility, evident also in Asia, is for corporations to apply corporate social responsibility to local communities and to those at the bottom of the social hierarchy. This book explores corporations' social responsibility engagement with local communities in a range of Asian countries. It provides examples of corporate social responsibility in a wide range of industrial sectors, focuses extensively on social enterprises and on governments' and corporations' schemes to encourage them, considers how relations with employees and with local workforces fit into the pattern of corporate social responsibility, and discusses the question as to how far corporations engage with local communities as a way of developing new markets for their products.

Sharing Clinical Trial Data Institute of Medicine, Board on Health Sciences Policy, Committee on Strategies for Responsible Sharing of Clinical Trial Data, 2015-04-20

Data sharing can accelerate new discoveries by avoiding duplicative trials, stimulating new ideas for research, and enabling the maximal scientific knowledge and benefits to be gained from the efforts of clinical trial participants and investigators. At the same time, sharing clinical trial data presents risks, burdens, and challenges. These include the need to protect the privacy and honor the consent of clinical trial participants; safeguard the legitimate economic interests of sponsors; and guard against invalid secondary analyses, which could undermine trust in clinical trials or otherwise harm public health. Sharing Clinical Trial Data presents activities and strategies for the responsible sharing of clinical trial data. With the goal of increasing scientific knowledge to lead to better therapies for patients, this book identifies guiding principles and makes recommendations to maximize the benefits and minimize risks. This report offers guidance on the types of clinical trial data available at different points in the process, the points in the process at which each type of data should be shared, methods for sharing data, what groups should have access to data, and future knowledge and infrastructure needs. Responsible sharing of clinical trial data will allow other investigators to replicate published findings and carry out additional analyses, strengthen the evidence base for regulatory and clinical decisions,

and increase the scientific knowledge gained from investments by the funders of clinical trials. The recommendations of Sharing Clinical Trial Data will be useful both now and well into the future as improved sharing of data leads to a stronger evidence base for treatment. This book will be of interest to stakeholders across the spectrum of research--from funders, to researchers, to journals, to physicians, and ultimately, to patients.

The Role of the State in Pension Provision: Employer, Regulator, Provider Gerard Hughes,Jim Stewart,2013-03-09 This book deals with the role of the State in pension provision as an employer, regulator and provider. Part I deals with problems and reforms of public sector pension systems in OECD countries. The countries covered are Denmark, Finland, Germany, The Netherlands, Norway, and the USA. Part II considers the regulation of occupational pension schemes in The Netherlands and the United Kingdom, and whether there is still a role for the State in providing earnings-related pensions in the United Kingdom. Part III presents demographic projections for the next half-century, using Ireland as an example, looks at some of the options which have been used in Finland, and proposed in the United States, to cope with population ageing, and examines issues of intergenerational equity which are posed by these options. All the chapters deal with recent reforms. The chapters are written by acknowledged experts in their field who are

independent of both the pensions industry and Government. Hence the chapters provide an informed critical account of current developments in relation to the reform of occupational pension schemes in the public sector and of the debate about the State's role as a regulator of private pension schemes and a provider of pensions based on the social insurance principal. The book is important as a source of information about pension schemes in OECD countries. It shows that there is not a unique model of occupational pension provision for public sector employees and that the pension benefits which are provided in different countries are quite variable. It also shows that public sector occupational pension systems have changed and are in the process of considerable further change in a number of OECD countries.

Global Media and Public Diplomacy in Sino-Western Relations Jia Gao, Catherine Ingram, Pookong Kee, 2016-07-22 Many researchers and China observers would agree that understanding how China pursues global communication is critical for assessing its growing soft power. While soft power as a concept has, in many ways, become almost inextricably linked with the PRC's (People's Republic of China) international diplomacy of the twenty-first century, the specific role of global media within soft power diplomacy and the corresponding influence of Western mediated public diplomacy within China is a lacuna that has remained largely unexplored. Moreover, the different Chinese and Western perspectives on the influence of global media and public diplomacy on Sino-Western relations, and the changing role of global media on this crucial aspect of international politics, have not yet been critically examined. This volume presents a broad

social science audience with recent innovative scholarship and research findings on global media and public diplomacy concerning Sino-Western relations. It focuses on the implicit nexus between global media and public diplomacy, and their actual utilisation in and impact on the shifting relationships between China and the West. Special attention is given to the changing nature of globalised media in both China and Western nations, and how globalised media is influencing, shaping and changing international politics. The contributions delve deeply into both theory and practice, and focus especially upon the analysis of several key aspects of the issue from both Chinese and Western perspectives. This combination of approaches distinguishes the volume from most other published works on the topic, and greatly enriches our knowledge base in this important contemporary field.
