Cultivated vegetables of the world: a multilingual onomasticon Stanley J. Kays, 2011-10-03 Vegetables make up a major portion of the diet of humans and are critical for good health. With the world population predicted to reach 9 billion people by 2050, they will play an increasingly important role in food availability. The purpose of this book is to facilitate accuracy in communication among individuals working in agriculture and a better understanding of the extent and diversity of vegetable production and utilization worldwide. Increasing global economic interdependence and trade in agricultural products makes precise communication among individuals utilizing different languages essential. There is currently a wide range of vegetables shipped around the world as seasonal, economic and other forces are shifting markets from exclusively local toward global. The text provides up-to-date scientific names, synonyms, and common names for the commercially cultivated vegetable crops grown worldwide (404 crops), in addition to information on the plant parts utilized and their method of preparation. Common names from 370 languages are presented along with information on each of the languages. The text represents an essential reference source with the information presented in a concise and readily accessible format. It allows identifying a crop from the common name in a diverse cross-section of languages and is therefore of use to university and government researchers, libraries worldwide, agricultural organizations, agricultural scientists, embassies, international travelers, vegetable growers, shippers, packers, produce buyers, grocery store managers, gourmet restaurants, chefs, and gardeners.

Khaki Capital Paul Chambers, Napisa Waitoalkiat, 2017 Although Southeast Asia has seen the emergence of civilian rule, the military continues to receive a large chunk of the national budget and, with significant assets and economic activities, often possesses enormous economic clout -- enhancing its political power while hindering democratization or civilian rule. The political economy of the military in less developed countries is thus a crucial subject area in terms of democratization. This study examines such khaki capital in seven Southeast Asian cases -- Thailand, Myanmar, Vietnam, Laos, Cambodia, the Philippines and Indonesia. Each chapter analyses the historical evolution of khaki capital in the given country case; the role of internal and external factors (e.g. military unity and globalization) in this trajectory; and how the resulting equilibrium has affected civil-military relations. This work is important for understanding how and why military influence over parts of the economy in Southeast Asia has remained an impediment to achieving civilian control and democratization. Ultimately, this book tells the story of how militaries in Southeast Asia have benefited economically and the extent to which such gains have translated into the leveraging of political power. --

When Leah Stevens’ career implodes, a chance meeting with her old friend Emmy Grey offers her the perfect opportunity to start over. Emmy, just out of a bad relationship, convinces Leah to come live with her in rural Pennsylvania, where there are teaching positions available and no one knows Leah’s past. Or Emmy’s. Then there’s a wave of vicious crimes in the community and Emmy Grey disappears, and Leah realizes how very little she knows about her friend and roommate. Unable to find friends, family, a paper trail or a digital footprint, the police question whether Emmy Grey existed at all. And mark Leah as a prime suspect. Fighting the doubts of the police and her own sanity, Leah must uncover the truth about Emmy Grey—and along the way, confront her old demons, find out who she can really trust, and clear her own name. Deep, dark, and irresistibly twisty, “Megan Miranda’s eerie suspense thriller...smartly examines the slippery theme of personal identity” (The New York Times Book Review).

Lonely and bored, Oskar crafts a phone out of a block of wood he finds in the shed and uses it to pretend to call things. To his surprise, the things reply! Oskar finds himself in high demand, helping the things solve their problems and achieve their dreams. *Oskar and the Things* is a charming book about the power of the imagination and friendship, by Estonia's leading children's writer, Andrus Kivirähk. Political Participation and Democratic Capability in Authoritarian States Lien Pham, Ance Kaleja, 2023-05 This

book provides an innovative theoretical and empirical exploration of the political participation and democratic capability of people living in authoritarian states. Merging perspectives from sociology and political science, the book demonstrates that despite autocratic restrictions on opposition, there is often still leeway for people to express themselves as political agents and to develop democratic capability. The first two chapters problematise political participation and develop an interdisciplinary three-domain framework that allows for critical engagement with and appreciation of the contexts and varied ways in which participatory activities occur. This framework is applied to analyse six country case studies: Singapore, Jordan, Belarus, Cuba, Nigeria, and Vietnam. Drawing on a range of data sources and different analytical entry points, the book investigates the substantive opportunities people have in exercising political agency and the implications for democratic capability. The book concludes by summarising the emergent themes and examining the potential of applying this method of inquiry in other political contexts. Encompassing both governmental and societal practices, the book offers insights into state-society relations and their role in constructing political values and goals for participation, which people negotiate and mediate to inform their choices, modes, and forms of civic engagement. These insights present a broad approach towards the study of participation, with relevance for understanding political participation in various societies under non-democratic and democratic rule alike. This book will be useful for researchers and students interested in political dynamics and intersections with economic, cultural, and social aspects of development. It will also be beneficial for practitioners interested in participatory actions and social change.

The Forgotten Rohingya: Their Struggle for Human Rights in Burma Habib Habib Siddiqui, 2019 Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as settlers from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets? - Are restricted from traveling outside their villages? - Have no legal right to own land or property? - Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings? - Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan? - Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. The Forgotten Rohingya makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which

are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

Red Stamps and Gold Stars Sarah Turner,2013-05-15 Red Stamps and Gold Stars brings together all the messiness, compromise, and ethical dilemmas that underscore fieldwork in upland socialist Asia and elsewhere in the Global South. These challenges can range from how to gain research access to politically sensitive border regions, to helping informants-turned-friends access appropriate health care, to reflections on how to best represent ethnic minority voices. The volume's contributors ◉ accomplished geographers, anthropologists, and ethnohistorians ◉ foreground the importance of questioning one's subjective gaze and of debating representations of the other.

Debating the East Asian Peace Elin Bjarnegård,Joakim Kreutz,2017 East Asia (including Southeast Asia) used to be the world's deadliest battleground but since the 1980s there has been a marked reduction in battle deaths. This 'East Asian Peace' has spurred much debate, the major strands of which are reflected in the volume. Debating the East Asian Peace focuses on presenting and evaluating a variety of interconnected themes rather than offering simplistic answers to a complex question. As well as discussing processes and events in East Asia, its contributors offer insights to a number of core general questions for understanding peace and conflict. What is peace and how can it be studied? How can we characterize the East Asian Peace? What limits and conditions are associated with this peace? Can insights from East Asia explain overall regional trends of political violence? Does the way in which peace came about impact on the quality of peace? Is the East Asian peace under threat? If so, why is this and where is the threat coming from? A wide-ranging study that is also carefully knitted together, this volume is a must-read not only for scholars and students of Asian politics and peace studies but also policy-makers, NGOs, businesses, journalists and many others concerned with the peace, stability and prosperity of a vitally important region in today's world.

Fieldwork in Timor-Leste Maj Nygaard-Christensen,Angie Bexley,2017 This ground-breaking exploration of research methodologies in Timor-Leste brings together ten authors (veterans and early-career researchers) who have contributed to founding the field of Timor studies and who broadly represent a range of fieldwork practices and challenges from colonial times to the present day. Here, they introduce readers to their experiences of conducting anthropological, historical and archival fieldwork in this new nation. The volume further explores how researchers might examine processes of 'nation-making' without taking particular claims about what constitutes Timorese national identity for granted. Many chapters thus deal with how preconceptions can be challenged when actually carrying out ethnographic or historical research. The volume thus reflects and highlights the contestations and deliberations that have been symptomatic of the country's nation-building process. --

Warring Societies of Pre-Colonial Southeast Asia Michael W. Charney,Kathryn Wellen,2017-10-31 Why is it that warfare in Southeast Asian history is depicted so differently in various historical sources and representations? Why have scholars looking at different countries found so many exceptions to regional overviews of warfare? The present volume seeks to present a new approach to the study of warfare in the region by abandoning the generalizations made in the conventional literature. The contributors offer a range of new studies of warfare in local areas within the region, looking at warfare on its own, local terms rather than for what it says about warfare in the region as a whole. This approach for the first time lends Southeast Asia to comparative analysis in a way that avoids artificial and misleading regional attributes. The varied case studies, researched and written by a number of experts of local warfare within the region include naval warfare eighteenth century Vietnam, civil war in South Sulawesi during the Pönöki War, the art and texts of war in Burmese warfare, modes of warfare in precolonial Bali, war captive taking in Thailand, and kinship, religion, and war in late eighteenth century Maguindanao, and preparations for war in the Pacific rimlands. The volume makes an important contribution to the new literature emerging on the culture of indigenous warfare in North and South America, Africa, South Asia, the Middle East, and the Pacific Islands, by offering a new and robust Southeast Asian entry on the one hand and adds to the growing literature on early modern Southeast Asia a new approach to its premodern warfare. It will interest scholars and students of Asian history as well as armchair historians and military buffs seeking a better understanding of the precolonial roots of modern Southeast Asia.
