Slide Puzzle Book for Adults: Rectslider Puzzles Orlando Parker, 2018-12-24
Rectslider (Rectangle-Slider, Shikaku suraida) consists of a rectangular or square grid with black cells. The task is to move the black cells vertically or horizontally, so black cells form rectangles having area greater than one cell. Two black rectangles must not be orthogonally adjacent. The numbers in the black cells indicate how many cells they have to pass through. Black cells without numbers may move any distance, but some of them stay put. The black cells cannot cross the tracks of other black cells and cannot move over other black cells. ===== KEYWORDS/TAGS: block puzzle adult - adult puzzle blocks - block puzzle brain teaser - block puzzle game - puzzle games - puzzle game books - puzzle game adult - puzzle game teen - brain games - brain games for adults - brain game books - brain game books for adults - brain game puzzle books for adults - brain game adult - brain game game - brain game of the day - brain game puzzles

The Atlas of Economic Complexity Ricardo Hausmann,Cesar A.

Hidalgo,Sebastian Bustos,Michele Coscia,Alexander Simoes,2014-01-17 Maps capture data expressing the economic complexity of countries from Albania to

Zimbabwe, offering current economic measures and as well as a guide to achieving prosperity Why do some countries grow and others do not? The authors of The Atlas of Economic Complexity offer readers an explanation based on Economic Complexity, a measure of a society's productive knowledge. Prosperous societies are those that have the knowledge to make a larger variety of more complex products. The Atlas of Economic Complexity attempts to measure the amount of productive knowledge countries hold and how they can move to accumulate more of it by making more complex products. Through the graphical representation of the Product Space, the authors are able to identify each country's adjacent possible, or potential new products, making it easier to find paths to economic diversification and growth. In addition, they argue that a country's economic complexity and its position in the product space are better predictors of economic growth than many other well-known development indicators, including measures of competitiveness, governance, finance, and schooling. Using innovative visualizations, the book locates each country in the product space, provides complexity and growth potential rankings for 128 countries, and offers individual country pages with detailed information about a country's current capabilities and its diversification options. The maps and visualizations included in the Atlas can be used to find more viable paths to greater productive knowledge and prosperity.
