**The Last Best Cure** Donna Jackson Nakazawa,2013-02-21 One day, Nakazawa found herself lying on the floor to recover from climbing the stairs. She was managing the symptoms of the autoimmune disorders that had plagued her for a decade, but she had lost her joy. As a science journalist, she was curious to know what mind-body strategies might help her.

*Hearing Happiness* Jaipreet Viridi,2020-08-31 Weaving together lyrical history and personal memoir, Viridi powerfully examines society's—and her own—perception of life as a deaf person in America. At the age of four, Jaipreet Viridi's world went silent. A severe case of meningitis left her alive but deaf, suddenly treated differently by everyone. Her deafness downplayed by society and doctors, she struggled to “pass” as hearing for most of her life. Countless cures, treatments, and technologies led to dead ends. Never quite deaf enough for the Deaf community or quite hearing enough for the “normal” majority, Viridi was stuck in aural limbo for years. It wasn't until her thirties, exasperated by

problems with new digital hearing aids, that she began to actively assert her deafness and reexamine society's—and her own—perception of life as a deaf person in America. Through lyrical history and personal memoir, *Hearing Happiness* raises pivotal questions about deafness in American society and the endless quest for a cure. Taking us from the 1860s up to the present, Virdi combs archives and museums to understand the long history of curious cures: ear trumpets, violet ray apparatuses, vibrating massagers, electrotherapy machines, airplane diving, bloodletting, skull hammering, and many more. Hundreds of procedures and products have promised grand miracles but always failed to deliver a universal cure—a harmful legacy that is still present in contemporary biomedicine. Blending Virdi's own experiences together with her exploration into the fascinating history of deafness cures, *Hearing Happiness* is a powerful story that America needs to hear. Praise for *Hearing Happiness* “In part a critical memoir of her own life, this archival tour de force centers on d/Deafness, and, specifically, the obsessive search for a “cure”. . . . This survey of cure and its politics, framed by disability studies, allows readers—either for the first time or as a stunning example in the field—to think about how notions of remediation are leveraged against the most vulnerable.” —Public Books “Engaging. . . . A sweeping chronology of human deafness fortified with the author's personal struggles and triumphs.” —Kirkus Reviews “Part memoir, part historical monograph, Virdi's *Hearing Happiness* breaks the mold for academic press publications.” —Publishers Weekly “In her insightful book, Virdi probes how society perceives deafness and challenges the idea that a disability is a deficit. . . . [She] powerfully demonstrates how cures for deafness pressure individuals to change, to “be better.” —Washington Post

*A Systemic Treatment of Bulimia Nervosa* Carole Kayrooz, 2001 Bulimia nervosa involves interpersonal, social and societal factors as well as the cognitive, developmental and behavioural aspects that have been the focus of much professional intervention to date. The author shows how people seeking to understand and emotionally support women with this problem need to be able to work with all these dimensions.

**Biomedical Odysseys** Priscilla Song, 2017-05-16 Thousands of people from more than eighty countries have traveled to China since 2001 to undergo fetal cell transplantation. Galvanized by the potential of stem and fetal cells to regenerate damaged neurons and

restore lost bodily functions, people grappling with paralysis and neurodegenerative disorders have ignored the warnings of doctors and scientists back home in order to stake their futures on a Chinese experiment. *Biomedical Odysseys* looks at why and how these individuals have entrusted their lives to Chinese neurosurgeons operating on the forefront of experimental medicine, in a world where technologies and risks move faster than laws can keep pace. Priscilla Song shows how cutting-edge medicine is not just about the latest advances in biomedical science but also encompasses transformations in online patient activism, surgical intervention, and borderline experiments in health care bureaucracy. Bringing together a decade of ethnographic research in hospital wards, laboratories, and online patient discussion forums, Song opens up important theoretical and methodological horizons in the anthropology of science, technology, and medicine. She illuminates how poignant journeys in search of fetal cell cures become tangled in complex webs of digital mediation, the entrepreneurial logics of postsocialist medicine, and fraught debates about the ethics of clinical experimentation. Using innovative methods to track the border-crossing quests of Chinese clinicians and their patients from around the world, *Biomedical Odysseys* is the first book to map the transnational life of fetal cell therapies.
