Tables of IGC Cosmic Ray Data J. A. Simpson,2013-10-22 Annals of the International Geophysical Year, Volume 28: Tables of IGC Cosmic Ray Data, Part III contains tabulations of International Geophysical Cooperation's cosmic ray activity data. This book includes lists of stations and investigators from whom further information on the cosmic ray apparatus can be obtained. In order to prepare the data on the following pages for publication, the data are first put on punched cards and then checked for correctness essentially by repunching, thus minimizing errors of transcription and also facilitate some computations which have been made with some of the data. Tabulating machines are then used to print the data on standard forms and the data are photographed for reproduction. As a further insurance against errors, carbon copies of the data sheets are sent to all investigators to be checked. The data marked as verified in the table of contents have been returned to the data center and the corrections made. This book will prove useful to geophysical researchers.

We Would Have Been Happy RIVERA BLACK,2013-09 This book is made like a piece of art and mystic by itself. It's written as short prose mixed with poesy and hides a secret message that can be decoded only by the most observant readers. This is a deep emotional love story about two people who find each other and accidentally fall in love. Their emotions are so true and deep that it seems unbelievable that so miraculous feelings can exist today where everything is artificial and stereotypical. The author fills you with the emotions and takes you to the world where everything depends on your inner powers to trust in yourself, believe in feelings that you can't explain, and except them with thanksgiving.
