**Annual Report on Exchange Arrangements and Exchange Restrictions 2012** International Monetary Fund. Monetary and Capital Markets Department, 2012-09-14 Published since 1950, this authoritative annual reference is based on a unique IMF database that tracks exchange and trade arrangements for 187 IMF member countries, along with Hong Kong SAR, Aruba, and Curaçao and Sint Maarten. The Annual Report on Exchange Arrangements and Exchange Restrictions (AREAER) draws together information available to the IMF from a number of sources, including during official IMF staff visits to member countries. There is a separate chapter for each of the 189 countries included, and these are presented in a clear, easy-to-read tabular format. A summary table allows for simple cross-country comparisons of key features of their exchange and trade regimes. The report's introduction summarizes recent global trends and developments. It discusses such topical issues as exchange rate arrangements, current or capital transactions, or prudential regulations. The individual country chapters outline exchange measures in place, the structure and setting of exchange rates, arrangements for payments and receipts, procedures for resident and nonresident accounts, mechanisms for import and export payments and receipts, controls on capital transactions, and provisions specific to the financial sector. The report now provides more detailed information on the operations of foreign exchange markets and exchange rate mechanisms and better describes the regulatory framework for current and capital account transactions.

*The Hundred Years War Revisited* Anne Curry, 2019-08-24 The conflict between England and France in the 14th and 15th centuries never ceases to fascinate. This stimulating edited collection, inspired by the Problems in Focus volume originally published in 1971, provides a fresh and accessible insight into the key aspects of The Hundred Years War. With chapters written by leading experts in the field, based on new methodologies and recent advances in scholarship, this book places the

Anglo-French wars into a range of wider contexts, such as politics, the home front, the church, and chivalry. Adopting a sustained comparative approach, with attention paid to both England and France, *The Hundred Years War Revisited* provides a clear and comprehensive synthesis of the major trends in research on the Hundred Years War. Concise and thought-provoking, this is essential reading for undergraduate and postgraduate students of medieval history.

**Bitcoin and Beyond** Malcolm Campbell-Verduyn,2017-11-28 Since the launch of Bitcoin in 2009 several hundred different 'cryptocurrencies' have been developed and become accepted for a wide variety of transactions in leading online commercial marketplaces and the 'sharing economy', as well as by more traditional retailers, manufacturers, and even by charities and political parties. Bitcoin and its competitors have also garnered attention for their wildly fluctuating values as well as implication in international money laundering, Ponzi schemes and online trade in illicit goods and services across borders. These and other controversies surrounding cryptocurrencies have induced varying governance responses by central banks, government ministries, international organizations, and industry regulators worldwide. Besides formal attempts to ban Bitcoin, there have been multifaceted efforts to incorporate elements of blockchains, the peer-to-peer technology underlying cryptocurrencies, in the wider exchange, recording, and broadcasting of digital transactions. Blockchains are being mobilized to support and extend an array of governance activities. The novelty and breadth of growing blockchain-based activities have fuelled both utopian promises and dystopian fears regarding applications of the emergent technology to Bitcoin and beyond. This volume brings scholars of anthropology, economics, Science and Technology Studies, and sociology together with GPE scholars in assessing the actual implications posed by Bitcoin and blockchains for contemporary global governance. Its interdisciplinary contributions provide academics, policymakers, industry practitioners and the general public with more nuanced understandings of technological change in the changing character of governance within and across the borders of nation-states.
