**The Cheating Curve** Paula T. Renfroe, 2012-06-12 When two friends come clean about infidelity, what they learn will change everything. . . Every other Sunday, best friends Aminah Anderson and Langston Lang Rogers get manicures in trendy downtown Brooklyn and then have brunch. The two share everything with each other--almost. Lang's been keeping a secret from Aminah. She's cheating on her husband. When Aminah learns about the affair, the news hits too close to home. For Aminah's husband has also been unfaithful. She thought Lang understood the hurt and humiliation infidelity causes. She was wrong. Lang knows Aminah is disappointed in her, but they have different views. Lang only calls it cheating if she gets caught. Her spouse is devoted to her, yet she needs more. Though Aminah doesn't understand, her friend's admission leads her to finally confront her husband. Now their friendship, their marriages, and their self-respect will be put to the ultimate test. . . Realistic and entertaining. --Booklist Paula T. Renfroe is the author of *The Cheating Curve* and the editor-in-chief of *Juicy* magazine. She has written for *Time Out New York*, *The Source*, *Vibe* and *XXL* magazines. The mother of two is diligently working on balancing life, workouts, and empty nest syndrome.

**Behind the Curve** Joshua P. Howe,2014-04-01 In 1958, Charles David Keeling began measuring the concentration of carbon dioxide in the earth's atmosphere at the Mauna Loa Observatory in Hawaii. His project kicked off a half century of research that has expanded our knowledge of climate change. Despite more than fifty years of research, however, our global society has yet to find real solutions to the problem of global warming. Why? In *Behind the Curve*, Joshua Howe attempts to answer this question. He explores the history of global warming from its roots as a scientific curiosity to its place at the center of international environmental politics. The book follows the story of rising CO<sub>2</sub>—illustrated by the now famous Keeling Curve—through a number of historical contexts, highlighting the relationships among scientists, environmentalists, and politicians as those relationships changed over time. The nature of the problem itself, Howe explains, has privileged scientists as the primary spokespeople for the global climate. But while the “science first” forms of advocacy they developed to fight global warming produced more and better science, the primacy of science in global warming politics has failed to produce meaningful results. In fact, an often exclusive focus on science has left advocates for change vulnerable to political opposition and has limited much of the discussion to debates about the science itself. As a result, while we know much more about global warming than we did fifty years ago, CO<sub>2</sub> continues to rise. In 1958, Keeling first measured CO<sub>2</sub> at around 315 parts per million; by 2013, global CO<sub>2</sub> had soared to 400 ppm. The problem is not getting better - it's getting worse. *Behind the Curve* offers a critical and levelheaded

look at how we got here.

**Turning for Home** Caren J. Werlinger,2015-02-28 Like her mother before her, Jules Calhoon couldn't wait to escape her small Ohio town. Unlike her mother, though, Jules couldn't disappear forever. When she's called back for her grandfather's funeral, the visit unleashes a flood of memories and starts her on a lonely-and familiar-path. Her partner, Kelli, feels Jules slipping away but can't figure out how to pull her back. In desperation, she turns to Jules's oldest friend-and her ex-Donna. The problem is, Donna never could figure out why her relationship with Jules ended so long ago, and she never stopped loving Jules. When a lonely, confused teenager reaches out to Jules for help, the past and present are set on a collision course, igniting a chain of events that will leave none of them unscathed.
