Mobile-Mindful Teaching and Learning Christina Moore,2023-07-03 This book provides faculty and instructors with an introductory guide to integrating mobile learning in their courses. Recognizing that a smartphone is the first and main piece of technology anyone owns, with ownership exceeding 95% for those aged 18-29, with a sizable minority of these being smartphone-dependent; and that instructors are relying on technology for teaching and learning more than ever; this book addresses the imperative that course materials and interactions be increasingly available through the technology that students use most often. Dispelling the notion that mobile learning is for the tech-savvy and adventurous, mobile-mindful teaching offers teachers a way to take a few steps at a time, share options with students, and progressively develop ideas and practices. The book invites you to explore your own way into mobile learning.Christina Moore stresses two principles as you engage with mobile learning--intention and fluidity. This begins with mindfully implementing mobile learning opportunities so that students see the usefulness of learning via phone; and recognizing the fluid learning environments in which students learn so you can offer online modalities and functions appropriate to purpose and situations.The book opens with a “start with self” section on How to Be a Mobile Mindful Learner, offering ideas on exploring the almost infinite available online resources in your discipline to curate a rich and ever-expanding compilation of ideas for use in your scholarly work and teaching; and identifying different types of learning (digital reading, audio and visual learning, and social learning) across multiple devices and contexts to consider as you develop your course.The section “Toward Mobile-Mindful Teaching” explores ways to add mobile options to existing learning materials and how they and the LMS functions you use are rendered on a phone by taking a mobile test drive through your course.Christina Moore shows how, by building up your mobile learning skills to be a more productive scholar and developing habits that feed your curiosity and creativity, you can start planning how you can create fluid learning opportunities for your students they can access across devices, time, and space, and take advantage of found moments of time and informal spaces.

Notes on Grief Chimamanda Ngozi Adichie,2021-05-11 From the globally acclaimed, best-selling novelist and author of We Should All Be Feminists, a timely and deeply personal account of the loss of her father: "With raw eloquence, Notes on Grief ... captures the bewildering messiness of loss in a society that requires serenity, when you'd rather just scream. Grief is impolite ... Adichie's words put welcome, authentic voice to this most universal of emotions, which is also one of the most universally avoided" (The Washington Post). Notes on Grief is an exquisite work of meditation, remembrance, and hope, written in the wake of Chimamanda Ngozi Adichie's beloved father's death in the summer of 2020. As the COVID-19 pandemic raged around the world, and kept Adichie and her family members separated from one another, her father succumbed unexpectedly to complications of kidney failure. Expanding on her original New Yorker piece, Adichie shares how this loss shook her to her core. She writes about being one of the millions of people grieving this year; about the familial and cultural dimensions of grief and also about the loneliness and anger that are unavoidable in it. With signature precision of language, and glittering, devastating detail on the page—and never without touches of rich, honest humor—Adichie weaves together her own experience of her father's death with threads of his life story, from his remarkable survival during the Biafran war, through a long career as a statistics professor, into the days of the pandemic in which he'd stay connected with his children and grandchildren over video chat from the family home in Abba, Nigeria. In the compact format of We Should All Be Feminists and Dear Ijeawele, Adichie delivers a gem of a book—a book that fundamentally connects us to one another as it probes one of the most universal human experiences. Notes on Grief is a book for this moment—a work readers will treasure and share now more than ever—and yet will prove durable and timeless, an indispensable addition to Adichie's canon.

Emergency Alert and Warning Systems National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on the Future of Emergency Alert and Warning Systems: Research Directions,2018-05-19 Following a series of natural disasters, including Hurricane Katrina, that revealed shortcomings in the nation's ability to effectively alert populations at risk, Congress passed the Warning, Alert, and Response Network (WARN) Act in 2006. Today, new technologies such as smart phones and social media platforms offer new ways to communicate with the public, and the information ecosystem is much broader, including additional official channels, such as government social media accounts, opt-in short message service (SMS)-based alerting systems, and reverse 911 systems; less official channels, such as main stream media outlets and weather applications on connected devices; and unofficial channels, such as first person reports via social media. Traditional media have also taken advantage of these new tools, including their own mobile applications to extend their reach of beyond broadcast radio, television, and cable. Furthermore, private companies have begun to take advantage of the large amounts of data about users they possess to detect events and provide alerts and warnings and other hazard-related information to their users. More than 60 years of research on the public response to alerts and warnings has yielded many insights about how people respond to information that they are at risk and the circumstances under which they are most likely to take appropriate protective action. Some, but not all, of these results have been used to inform the design and operation of alert and warning systems, and new insights continue to emerge. Emergency Alert and Warning Systems reviews the results of past research, considers new possibilities for realizing more effective alert and warning systems, explores how a more effective national alert and warning system might be created and some of the gaps in our present knowledge,

and sets forth a research agenda to advance the nation's alert and warning capabilities.
