Measuring Arthropod Biodiversity Jean Carlos Santos, Geraldo Wilson Fernandes, 2020-11-11 This book brings together a wide range of sampling methods for investigating different arthropod groups. Each chapter is organized to describe and evaluate the main sampling methods (field methods, materials and supplies, sampling protocols, effort needed, and limitations); in addition, some chapters describe the specimen preparation and conservation, species identification, data collection and management (treatment, statistical analysis, interpretation), and ecological/conservation implications of arthropod communities. The book aims to be a reference for zoologists, entomologists, arachnologists, ecologists, students, researchers, and for those interested in arthropod science and biodiversity. We hope the book will contribute to advance knowledge on field assessments and conservation strategies. Arthropods represent the most speciose group of organisms on Earth, with a remarkable number of species and interactions still to be described. These invertebrates are recognized for playing key ecological roles in terrestrial, freshwater and marine ecosystems. Because of the increasing and relentless threats arthropods are facing lately due to a multitude of human induced drivers, this book represents an important contribution to assess their biodiversity and role in ecosystem functioning and generation of ecosystem services worldwide.

Truth in Comedy Charna Halpern, Del Close, Kim Johnson, 1994 The 'Harold', an innovative improvisational tool, helped many actors on the road to TV and film stardom, including George Wendt (Norm on Cheers). Now it is described fully in this new book for would-be actors and comics. The 'Harold' is a form of competitive improv involving 6 or 7 players. They take a theme suggestion from the audience and 'free associate' on the theme into a series of rapid-fire one-liners that build into totally unpredictable skits with hilarious results. The 'Harold' is a fun way to 'loosen up' and learn to think quickly, build continuity, develop characterisations and sharpen humour.

The Rosedale Diet Ron Rosedale, M.D., Carol Colman, 2009-10-13 Finally—the ultimate diet for fast, safe weight loss, lifelong health, and longer life, based on more than twenty years of research and the latest findings on appetite and weight. Metabolic specialist Ron Rosedale, M.D., has designed the Rosedale Diet to regulate the powerful hormone leptin, which controls appetite and weight loss by telling the brain when to eat, how much to eat—and when to stop. New research shows that leptin may be one of the body's most important hunger control mechanisms. Control leptin, and you control your weight. Most people's leptin levels are out of control, causing them to overeat and to store fat rather than burn it. The only way to flip the hunger switch back to normal is through a diet high in healthy fats and low in carbohydrates, saturated fat, and trans-fatty acids often found in processed food—plus just 15 minutes of daily exercise. Dr. Rosedale's 21-day diet plan is simple: Just select from the many foods on his A list, including healthy-fat foods such as avocados, nuts, olives, lobster, crab, shrimp, goat cheese, Cornish game hen, venison, and more. Then gradually add foods from the B list, such as steak, lamb chops, fruits, beans, and so on. A 28-day menu plan and more than 100 recipes, such as Dilled Salmon and Fresh Asparagus, Gingery Chicken Soup, Lasagna, Black Bean Wrap, Raspberry Mousse Cake, and French Silk Pie, make eating the Rosedale way deliciously easy. Weight loss is just the beginning. The Rosedale Diet will make you feel satisfied, reduce cravings, and put you in control of your sweet tooth. It can even help eliminate or reduce heart disease, hypertension, diabetes, and other conditions associated with natural aging, as many of Dr. Rosedale's patients can attest. You'll find inspiring stories from them—and the power to control your weight and improve your health—in this groundbreaking book.

Translating Cultures David Katan, 2014-06-03 As the 21st century gets into stride so does the call for a discipline combining culture and translation. This second edition of Translating Cultures retains its original aim of putting some rigour and coherence into these fashionable words and lays the foundation for such a discipline. This edition has not only been thoroughly revised, but it has also been expanded. In particular, a new chapter has been added which focuses specifically on training translators for translational and intercultural competencies. The core of the book provides a model for teaching culture to translators, interpreters and other mediators. It introduces the reader to current understanding about culture and aims to raise awareness of the fundamental role of culture in constructing,

perceiving and translating reality. Culture is perceived throughout as a system for orienting experience, and a basic presupposition is that the organization of experience is not 'reality', but rather a simplified model and a 'distortion' which varies from culture to culture. Each culture acts as a frame within which external signs or 'reality' are interpreted. The approach is interdisciplinary, taking ideas from contemporary translation theory, anthropology, Bateson's logical typing and metamessage theories, Bandler and Grinder's NLP meta-model theory, and Halliday's functional grammar. Authentic texts and translations are offered to illustrate the various strategies that a cultural mediator can adopt in order to make the different cultural frames he or she is mediating between more explicit.

Pissarro's People Richard R. Brettell, 2011 KEYNOTE: This definitive portrait of Camille Pissarro by one of the world's foremost authorities on Impressionism and French painting reveals the deep connection between Pissarro's humanitarian concerns and his creative output. Throughout his career, the Impressionist artist Camille Pissarro produced a vast oeuvre of paintings, drawings, and prints inspired by his fascination with and commitment to politics. Many of these works reflect the tensions between his anarchist ideals and the realities of life in a capitalist society; however, most examinations of Pissarro have approached his art and politics as separate spheres. Published to accompany a major exhibition, this survey by a renowned expert on Impressionist painting offers a selection of canvases and works on paper that embody Pissarro's pictorial humanism at the highest level. Exhaustive archival study, interviews with surviving family members, and research drawn from thousands of newly discovered letters inform this rich and authoritative book. Including individual portraits of each of the family members Pissarro so often inserted into his paintings, it also examines his relationships with fellow artists, writers, neighbors, merchants, and domestic servants. The result is a refreshing and landmark reconsideration of the artist's magnificent body of work. AUTHOR: Richard R. Brettell has taught at Northwestern University, the University of Chicago, Yale University, and Harvard University, and is presently Margaret M. McDermott Distinguished Chair of Art and Aesthetic Studies at the University of Texas at Dallas. He is the author of numerous books on painting and Impressionism. ILLUSTRATIONS 275 colour illustrations

Native Providence Patricia E. Rubertone, 2020-12 2021 Choice Outstanding Academic Title A city of modest size, Providence, Rhode Island, had the third-largest Native American population in the United States by the first decade of the twentieth century. Native Providence tells the stories of the city's Native residents at this historical moment and in the decades before and after, a time when European Americans claimed that Northeast Natives had mostly vanished. Denied their rightful place in modernity, men, women, and children from Narragansett, Nipmuc, Pequot, Wampanoag, and other ancestral communities traveled diverse and complicated routes to make their homes in this city. They found each other, carved out livelihoods, and created neighborhoods that became their urban homelands--new places of meaningful attachments. Accounts of individual lives and family histories emerge from historical and anthropological research in archives, government offices, historical societies, libraries, and museums and from community memories, geography, and landscape. Patricia E. Rubertone chronicles the survivance of the Native people who stayed, left, and returned, or lived in Providence briefly, who faced involuntary displacement by urban renewal, and who made their presence known in this city and in the wider Indigenous and settler-colonial worlds. Their everyday experiences reenvision Providence's past and illuminate documentary and spatial tactics of inequality that erased Native people from most nineteenth- and early twentieth-century history.
