Advances in Financial Machine Learning Marcos Lopez de Prado, 2018-01-23 Machine learning (ML) is changing virtually every aspect of our lives. Today ML algorithms accomplish tasks that until recently only expert humans could perform. As it relates to finance, this is the most exciting time to adopt a disruptive technology that will transform how everyone invests for generations. Readers will learn how to structure Big data in a way that is amenable to ML algorithms; how to conduct research with ML algorithms on that data; how to use supercomputing methods; how to backtest your discoveries while avoiding false positives. The book addresses real-life problems faced by practitioners on a daily basis, and explains scientifically sound solutions using math, supported by code and examples. Readers become active users who can test the proposed solutions in their particular setting. Written by a recognized expert and portfolio manager, this book will equip investment professionals with the groundbreaking tools needed to succeed in modern finance.

Hybrid Learning in English Language Teaching Okon Effiong, Bill Batziakas, Karima Ben Abbes, 2023-12-19 This collection of chapters offers readers diverse perspectives on English Language Teaching, along with various closely related theoretical constructs and pedagogical tools, such as motivation, learner autonomy, and technology. Amalgamating these constructs provides a much-needed theoretical grounding by using empirical studies. The chapters vary in their focus and reflect on classroom practices, and yield findings pertaining to a wide range of topics. As such, it will be of interest to a wide range of English Language Teaching professionals, from university instructors to schoolteachers. This edited volume broadens the conceptual boundaries of language learning theories, offers insights and directions into the future of hybrid teaching and learning, and

adds a new line of enquiry emanating from empirical findings. This book will also be useful in professional development seminars and workshops that support multilingual learners, teacher trainers and trainer teachers.

The Great Fragmentation Steve Sammartino,2014-06-26 Doing business in the digital age The Great Fragmentation: And Why the Future of All Business is Small is a business survival manifesto for the technology revolution. As the world moves from the industrial era to the digital age, power is shifting and fragmenting. Power is no longer about might and ownership; power in a digital world is about access. Existing businesses need to understand this shift and position

themselves to survive and thrive in an environment where entrepreneurs and start-ups enabled by access to technology are genuine threats. Author Steve Sammartino is widely regarded as a thought leader on the subject of technology and business, and helps companies transition from industrial-era thinking to the mindset and processes required to compete in today's digital marketplace. The Great Fragmentation shows how technological changes such as Big Data, gamification, crowdfunding, Bitcoin, 3D printing, social media, mashup culture and artisanal production will forever change business and the way we live our lives. Examine how the digital era has altered where we work, how we work, where we live and what we do Discover how the digital era has impacted social and economic structures, including educational systems, financial systems and government policy Understand that the social media and collecting 'friends' is just the tip of the iceberg in a digital business environment Weaving together insights from business, technology and anthropology, The Great Fragmentation provides both corporations and entrepreneurs with a playbook for the future of work, life and business in the digital era.
