**2016 8th International Conference on Cyber Conflict (CyCon)** IEEE Staff,2016-05-31 In today s increasingly complex cyberspace we see a variety of actors struggling to gain or maintain their position The ubiquitous use of information and communication technologies has had a profound influence on how these actors pursue their goals and interests The 8th International Conference on Cyber Conflict (CyCon 2016) will focus on cyber power as one of the core elements of relations between different stakeholders and will discuss how the traditional concept of power applies to cyberspace Both hard and soft power are being employed to achieve strategic and political goals through technical, legal and economic means But how can we assess such power? How can we ensure that such power remains in the right hands? How can we ensure or enforce cyber power without risking conflict escalation? How can we respond to exercises of this power with the right tools and measures? Is there a way to maintain a balance of power in cyberspace?

**#Accelerate** Robin Mackay,Armen Avanessian,2019-01-15 An apparently contradictory yet radically urgent collection of texts tracing the genealogy of a controversial current in contemporary philosophy. Accelerationism is the name of a contemporary political heresy: the insistence that the only radical political response to capitalism is not to protest, disrupt, critique, or détourne it, but to accelerate and exacerbate its uprooting, alienating, decoding, abstractive tendencies. #Accelerate presents a genealogy of accelerationism, tracking the impulse through 90s UK darkside cyberculture and the theory-fictions of Nick Land, Sadie Plant, Iain Grant, and CCRU, across the cultural underground of the 80s (rave, acid house, SF cinema) and back to its sources in delirious post-68 ferment, in texts whose searing nihilistic jouissance would later be disavowed by their authors and the marxist and academic establishment alike. On either side of this central sequence, the book includes texts by Marx that call attention to his own “Prometheanism,” and key works from recent years document the recent extraordinary emergence of new accelerationisms steeled against the onslaughts of neoliberal capitalist realism, and retooled for the twenty-first century. At the forefront of the energetic contemporary debate around this disputed, problematic term, #Accelerate activates a historical conversation about futurity, technology, politics, enjoyment, and capital. This is a legacy shot through with contradictions, yet urgently galvanized today by the poverty of “reasonable” contemporary political alternatives.

**Pervasive Computing Handbook** Uwe Hansmann,Lothar Merk,Martin S. Nicklous,Thomas Stober,2013-04-17 This book is a guide for the world of Pervasive Computing. It describes a new class of computing devices which are becoming omnipresent in every day life. They make information access and processing easily available for everyone from anywhere at any time. Mobility, wireless connectivity, di- versity, and ease-of-use are the magic keywords of Pervasive Computing. The book covers these front-end devices as well as their operating systems and the back-end infrastructure which integrate these pervasive components into a seamless IT world. A strong emphasis is placed on the underlying technologies and standards applied when building up pervasive solutions. These fundamental topics include commonly used terms such as XML, WAP, UMTS, GPRS, Bluetooth, Jini, transcoding, and cryptography, to mention just a few. Besides a comprehensive state-of-the-art description of the Pervasive Computing technology itself, this book gives an overview of today's real-life applications and accompanying service offerings. M-Commerce, e-Business, networked home, travel, and finance are exciting examples of applied Pervasive Computing.

**Cyber Fraud** Rick Howard,2009-04-23 With millions lost each year, cyber crime has evolved from a minor nuisance to a major concern involving well-organized actors and highly sophisticated organizations. Combining the best of investigative journalism and technical analysis, Cyber Fraud: Tactics, Techniques, and Procedures documents changes in the culture of cyber criminals and explores the innovations that are the result of those changes. The book uses the term Botnet as a metaphor for the evolving changes represented by this underground economy. Copiously illustrated, this engaging and engrossing book explores the state of threats present in the cyber fraud underground. It discusses phishing and pharming, trojans and toolkits, direct threats, pump-and-dump scams, and other fraud-related activities of the booming cyber-underground economy. By examining the geopolitical and socio-economic foundations of a cyber threat landscape, the book specifically examines telecommunications infrastructure development, patterns and trends of internet adoption and use, profiles of specific malicious actors, threat types, and trends in these areas. This eye-opening work includes a variety of case studies – including the cyber threat landscape in Russia and Brazil. An in-depth discussion is provided on the Russian Business Network’s (RBN) role in global cyber crime as well as new evidence on how these criminals steal, package, buy, sell, and profit from the personal financial information of consumers. Armed with this invaluable information, organizations and individuals will be better able to secure their systems and develop countermeasures to disrupt underground fraud.

**Against Technology** Steven E. Jones,2013-01-11 This book addresses the question of what it might mean today to be a Luddite--that is, to take a stand against technology. Steven Jones here explains the history of the Luddites, British textile works who, from around 1811, proclaimed themselves followers of Ned Ludd and smashed machinery they saw as threatening their trade. Against Technology is not a history of the Luddites, but a history of an idea: how the activities of a group of British workers in Yorkshire and Nottinghamshire came to stand for a global anti-technology philosophy, and how an anonymous collective movement came to be identified with an individualistic personal conviction. Angry textile workers in the early nineteenth century became romantic symbols of a desire for a simple life--certainly not the original goal of the actions for which they became famous. Against Technology is, in other words, a book about representations, about the image and the myth of the Luddites and how that myth was transformed over time into modern neo-Luddism.

**Advances in Cybernetics, Cognition, and Machine Learning for Communication Technologies** Vinit Kumar Gunjan,Sabrina Senatore,Amit Kumar,Xiao-Zhi Gao,Suresh Merugu,2020-04-28 This book highlights recent advances in Cybernetics, Machine Learning and Cognitive Science applied to Communications Engineering and Technologies, and presents high-quality research conducted by experts in this area. It provides a valuable reference guide for students, researchers and industry practitioners who want to keep abreast of the latest developments in this dynamic, exciting and interesting research field of communication engineering, driven by next-generation IT-enabled techniques. The book will also benefit practitioners whose work involves the development of communication systems using advanced cybernetics, data processing, swarm intelligence and cyber-physical systems; applied mathematicians; and developers of embedded and real-time systems. Moreover, it shares insights into applying

concepts from Machine Learning, Cognitive Science, Cybernetics and other areas of artificial intelligence to wireless and mobile systems, control systems and biomedical engineering.

Detection of Intrusions and Malware, and Vulnerability Assessment Roberto Perdisci,Clémentine Maurice,Giorgio Giacinto,Magnus Almgren,2019-06-10 This book constitutes the proceedings of the 16th International Conference on Detection of Intrusions and Malware, and Vulnerability Assessment, DIMVA 2019, held in Gothenburg, Sweden, in June 2019. The 23 full papers presented in this volume were carefully reviewed and selected from 80 submissions. The contributions were organized in topical sections named: wild wild web; cyber-physical systems; malware; software security and binary analysis; network security; and attack mitigation.

Teaching Science, Technology, and Society Joan Solomon,1993 This text describes an area which has increasingly generated classroom materials, and educational polemic, without any proper discussion of its rationale or aims. Different approaches to the teaching and implementation of STS are used to explore different facets of its nature.

*Intelligent Data Engineering and Automated Learning - IDEAL 2019* Hujun Yin,David Camacho,Peter Tino,Antonio J. Tallón-Ballesteros,Ronaldo Menezes,Richard Allmendinger,2019-11-07 This two-volume set of LNCS 11871 and 11872 constitutes the thoroughly refereed conference proceedings of the 20th International Conference on Intelligent Data Engineering and Automated Learning, IDEAL 2019, held in Manchester, UK, in November 2019. The 94 full papers presented were carefully reviewed and selected from 149 submissions. These papers provided a timely sample of the latest advances in data engineering and machine learning, from methodologies, frameworks, and algorithms to applications. The core themes of IDEAL 2019 include big data challenges, machine learning, data mining, information retrieval and management, bio-/neuro-informatics, bio-inspired models (including neural networks, evolutionary computation and swarm intelligence), agents and hybrid intelligent systems, real-world applications of intelligent techniques and AI.

Proceedings of ICRIC 2019 Pradeep Kumar Singh,Arpan Kumar Kar,Yashwant Singh,Maheshkumar H. Kolekar,Sudeep Tanwar,2019-11-21 This book presents high-quality, original contributions (both theoretical and experimental) on software engineering, cloud computing, computer networks & internet technologies, artificial intelligence, information security, and database and distributed computing. It gathers papers presented at ICRIC 2019, the 2nd International Conference on Recent Innovations in Computing, which was held in Jammu, India, in March 2019. This conference series represents a targeted response to the growing need for research that reports on and assesses the practical implications of IoT and network technologies, AI and machine learning, cloud-based e-Learning and big data, security and privacy, image processing and computer vision, and next-generation computing technologies.

*Internet of Things. IoT Infrastructures* Benny Mandler,Johann Marquez-Barja,Miguel Elias Mitre Campista,Dagmar Cagáňová,Hakima Chaouchi,Sherali Zeadally,Mohamad Badra,Stefano Giordano,Maria Fazio,Andrey Somov,Radu-Laurentiu Vieriu,2016-11-17 The two-volume set LNICST 169 and 170 constitutes the thoroughly refereed post-conference proceedings of the Second International Internet of Things Summit, IoT 360° 2015, held in Rome, Italy, in October 2015. The IoT 360° is an event bringing a 360 degree perspective on IoT-related projects in important sectors such as mobility, security, healthcare and urban spaces. The conference also aims to coach involved people on the whole path between research to innovation and the way through to commercialization in the IoT domain. This volume contains 62 revised full papers at the following four conferences: The International Conference on Safety and Security in Internet of Things, SaSeIoT, the International Conference on Smart Objects and Technologies for Social Good, GOODTECHS, the International Conference on Cloud, Networking for IoT systems, CN4IoT, and the International Conference on IoT Technologies for HealthCare, HealthyIoT.

**Information Systems Design and Intelligent Applications** Suresh Chandra Satapathy,Jyotsna Kumar Mandal,Siba K. Udgata,Vikrant Bhateja,2016-02-06 The third international conference on INformation Systems Design and Intelligent Applications (INDIA - 2016) held in Visakhapatnam, India during January 8-9, 2016. The book covers all aspects of information system design, computer science and technology, general sciences, and educational research. Upon a double blind review process, a number of high quality papers are selected and collected in the book, which is composed of three different volumes, and covers a variety of topics, including natural language processing, artificial intelligence, security and privacy, communications, wireless and sensor networks, microelectronics, circuit and systems, machine learning, soft computing, mobile computing and applications, cloud computing, software engineering, graphics and image processing, rural engineering, e-commerce, e-governance, business computing, molecular computing, nano-computing, chemical computing, intelligent computing for GIS and remote sensing, bio-informatics and bio-computing. These fields are not only limited to computer researchers but also include mathematics, chemistry, biology, bio-chemistry, engineering, statistics, and all others in which computer techniques may assist.

**Cyberpower and National Security** Franklin D. Kramer,Stuart H. Starr,Larry K. Wentz,2009 This book creates a framework for understanding and using cyberpower in support of national security. *Achtung-Panzer!* Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
