Cyprus International Monetary Fund. European Dept.,2013-05-17 Cyprus experienced significant internal and external imbalances owing to the European financial crisis. The oversized and weak banking sector continued to be a threat to the sovereign. Greek debt restructuring, together with loan losses of both Cyprus and Greece, resulted in the two largest banks being declared insolvent. However, the authorities have taken unprecedented steps to address the country's banking problems. Temporary administrative controls have been taken to preserve financial stability, while the Extended Fund Facility (EFF) arrangement has been aimed to stabilize the financial system and achieve fiscal sustainability.

Party-Society Relations in the Republic of Cyprus Giorgos Charalambous,Christophoros Christophorou,2015-11-19 The Republic of Cyprus' social and political culture is deeply partitocratic, with a close relationship between state apparatus and the parties that influence the government's decisions. However, little is known about the social and political implications of the above traits, and even less about how parties influence and are influenced by society at large. The concept of linkage, which refers to the linking of citizens with government and the political process, is vital in the study of the electoral or ideological considerations of parties. Parties' decisions regarding their organization and image correlates with the effort made to keep up with public opinion. Party-Society Relations in the Republic of Cyprus adds a new dimension to the study of linkage, considering the complexity of civil society as well as exploring the dynamics of political parties. Bringing together specialists from a range of disciplines, it examines the wider effects of partitocracy on democracy and uses it as a frame for exploring the construction, maintenance or deformation of links between social groups and parties. Through its analysis of both the partisan and societal aspects of party-social relations, it illuminates larger questions concerning the strategic complexity involved when politics and society interact. Approaching the Republic of Cyprus as a representative case study of partitocratic political culture, this book is a key resource for those interested in party and civil society politics, as well as Cypriot, Mediterranean and South-East European politics.

Cyprus International Monetary Fund. European Dept.,2019-12-09 This Selected Issues paper assesses Cyprus's export competitiveness and understands factors that could explain export developments, particularly in the services sector. Although Cyprus has been able to leverage its strategic location to diversity its markets for goods exports, as a small island economy, opportunities for diversifying its products mix is more limited. Services exports have performed better in the post-crisis period buoyed by the recovery in Europe and the impact of technological advances on global Information and Communication Technologies-enabled trade. Policies to support greater market diversification, enhance competition and efficiency and strengthen technological adoption would help exports growth. Studies have established the relationship between price and cost competitiveness with trade performance. Cyprus has performed reasonably well with strong service exports over the past few years, aided by improvements in cost competitiveness and a recovery in the European export markets. Policymakers should exploit opportunities brought by the digital transformation while addressing the accompanied risks.
