**Coup D'etat by the Gambia National Army** Lt. Col. Samsudeen Sarr, 2007-06-15 Coup de tat by the Gambia National Army, July 22nd 1994 is the authors autobiography chronicling the events of the title and its impact in his life. It is a story filled with lessons about Gambian history with a special focus on the genesis of the Gambian Military. For complexity, Lt. Col. Sarr alternated his story in the early chapters between scenes in the Gambia and his struggles to obtain political asylum in the United States of America. The book also revealed recollections from his childhood to educate his readers about certain social and spiritual beliefs and traditions in the Gambia. After the first few chapters, which set up the coup and established his thoughts about it, he further provided a detailed history of his personal life up to the time of his enlistment in the Gambia National Army. There he discussed his first days in the USA in the early 80s sequentially focusing on life in the Gambia before, during and after the coup. The book is intended to be instructive and educational to readers interested in, among other things, the background of the Gambia National Army and current APRC government headed by President Yaya A. J. J. Jammeh since July 22nd 1994.

Economic Development for Everyone Mark M. Miller,2017-05-09 How do we create employment,

grow businesses, and build greater economic resilience in our low-income communities? How do we create economic development for everyone, everywhere – including rural towns, inner-city neighborhoods, aging suburbs, and regions such as Appalachia, American Indian reservations, the Mexican border, and the Mississippi Delta – and not just in elite communities? *Economic Development for Everyone* collects, organizes, and reviews much of the current research available on creating economic development in low-income communities. Part I offers an overview of the harsh realities facing low-income communities in the US today; their many economic and social challenges; debates on whether to try reviving local economies vs. relocating residents; and current trends in economic development that emphasize high-tech industry and high levels of human capital. Part II organizes the sprawling literature of applied economic development research into a practical framework of five dynamic dimensions: empower your residents: begin with basic education; enhance your community: build on existing assets; encourage your entrepreneurs; diversify your economy; and sustain your development. This book, assembled and presented in a unified framework, will be invaluable for students and new researchers of economic development in low-income communities, and will offer new perspectives for established researchers, professional economic developers and planners, and public officials. Development practitioners and community leaders will also find new ideas and opportunities, along with a broad view on how the many complex parts of economic development interconnect.
