Denmark International Monetary Fund. Monetary and Capital Markets Department,2014-12-18 This paper discusses key findings of the Detailed Assessment of Observance of the Basel Core Principles for Effective Banking Supervision (BCPs) on Denmark. Denmark has a high level of compliance with the BCPs. The Danish Financial Supervisory Authority has appropriate legal authority to carry out supervision effectively, and its risk-based approach has focused well on the key elements of risk within its banking system. The compliance with the credit-risk related principles is uniformly high and the provisioning policies have been adequately enhanced. Its overall supervision is also considered sound, although resource constraints result in an extended supervision cycle and some risk areas receiving insufficient attention.

Deconstructing Money Laundering Risk Noémi També Bearpark,2022-07-14 This book examines the interpretation of the risk-based approach (RBA) and its application across the banking industry. It explores the ways conflicting risk interpretation and deconstruction of money laundering risk have unintended consequences across the banking industry. Furthermore, it offers a theoretical framework that can be adopted and implemented by risk practitioners to address money laundering (ML) risks. The interpretation and application of the RBA influences the way money laundering risk is perceived, presented, and managed, often resulting in misalignment among stakeholders. Moreover, AML practitioners interpret money laundering (ML) risk as an entity that can be contained, largely in ignorance of the fact that ML risk is self-referential. The book therefore addresses complex inter-system feedback phenomena that lead to de-risking and re-risking, and offers a new ML risk communication framework on this basis. It will be of value to researchers and also to stakeholders within financial institutions, financial intelligence units and regulators in the fight against money laundering.

**Love, Literature and the Quantum Atom** Finn Aaserud,John L. Heilbron,2013-07-18 Niels Bohr ranks with Einstein among the physicists of the 20th century. He rose to this status through his invention of the quantum theory of

the atom and his leadership in its defense and development. He also ranks with Einstein in his humanism and his sense of responsibility to his science and the society that enabled him to create it. Our book presents unpublished excerpts from extensive correspondence between Bohr and his immediate family, and uses it to describe and analyze the psychological and cultural background to his invention. The book also contains a reprinting of the three papers of 1913 - the Trilogy- in which Bohr worked out the provisional basis of a quantum theory of the atom.

**Migration and Social Protection in Europe and Beyond (Volume 2)** Jean-Michel Lafleur, Daniela Vintila, 2020-10-30 This second open access book in a series of three volumes examines the repertoire of policies and programmes led by EU Member States to engage with their nationals residing abroad. Focusing on sending states' engagement in the area of social protection, this book shows how a series of emigration-related policies that go beyond the realm of social security address the needs of nationals abroad in the area of health care, unemployment, family benefits, pensions and economic hardship. In addition, this volume highlights the variety of sending states' institutions that are involved in these policies (consulates, diaspora institutions, ministries, agencies...) and their engagement with citizens abroad in other policy areas such as electoral rights, citizenship, language, culture, education, business or religion. As such this book is a valuable read to researchers, policy makers, government employees and NGO's.
