Dashboard Design Michael Burch,Marco Schmid,2024-02-06 Interactive visualization and visual analytics tools have been designed and developed in the past and will be developed in the future as well. In each application domain in which data is measured, generated, and recorded we see a potential candidate for an interactive visualization tool with the goal to find insights and knowledge in the data. This knowledge can be found either visually by humans' interventions or algorithmically by the machine, in the best case by applying both concepts in combination as in visual analytics. One of the easiest ways to get an interactive visualization tool running is by means of dashboards, typically implemented as webpages that can run in a web browser and are accessible online, creating some kind of web-based solution. This book describes ways to design and implement dashboards based on the programming language Python, the graphics library Plotly, and Dash. The readers can use the provided dashboard codes as a starting point and extend the functionality and features on their desire. Technical topics discussed in the book include: Design in visualization Interaction principles in information visualization User interface design Linking Python, Dash, and Plotly Coding in Python Dashboard examples with Python code.

Reading in the Digital Age: Young Children's Experiences with E-books Ji Eun Kim,Brenna Hassinger-Das,2019-07-23 This edited book focuses on affordances and limitations of e-books for early language and literacy, features and design of e-books for early language and literacy, print versus e-books in early language and literacy development, and uses of and guidelines for how to use e-books in school and home literacy practices. Uniquely, this book includes critical reviews of diverse aspects of e-books (e.g., features) and e-book uses (e.g., independent reading) for early literacy as well as multiple examinations of e-books in home and school contexts using a variety of research methods and/or theoretical frames. The studies of children's engagement with diverse types of e-books in different social contexts provide readers with a contemporary and comprehensive understanding of this topic. Research has demonstrated that ever-increasing numbers of children use digital devices as part of their daily routine. Yet, despite children's frequent use of e-books from an early age, there is a limited understanding regarding how those e-books are actually being used at home and school. As more e-books become available, it is important to examine the educational benefits and limitations of different types of e-books for children. So far, studies on the topic have presented inconsistent findings regarding potential benefits and limitations of e-books for early literacy activities (e.g., independent reading, shared reading). The studies in this book aim to fill such gaps in the literature.

Higher Education Finance Research Mary P. McKeown-Moak,Christopher M. Mullin,2014-02-01 There is a void in the literature on how to conduct research in the finance and economics of higher education. Students, professors, and practitioners have no concise document that examines the field, provides history, definitions of terms, sources of data, and research methods. Higher Education Finance Research: Policy, Politics, and Practice fills that void. The book is structured in four parts. The first section provides a brief history and description of the general organization of American higher education, the sources and uses of funds over the last 100 years, and who is served in what types of institutions. Definitions of terms that are unique to higher education are provided, and some basic rules for conducting research on the economics and finance of higher education are established. Although in some ways, conducting research in higher education funding is similar to that for elementary/secondary education, there are some important distinctions that also are provided. The second section introduces guiding philosophies, sources of data, data elements/vocabulary, metrics, and analytics related to institutional revenues and expenditures. Chapters in this section focus on student oriented revenues, institutionally-oriented revenues, and funding formulas. The third section introduces accountability-related concepts by first examining the accountability movement in higher education and performance-based approaches applied in budgeting and funding, then looking at methods to determine public and private returns on investment in postsecondary education, and closing with an examination of finance from the perspective of the primary consumer: students. The fourth and last section of the book focuses on presenting postsecondary finance research to policy audiences to assist in connecting academic research and policy making. Chapters

focus on accounting for time considerations in analysis, the placing of data in context to make the data and findings relevant, and ways to effectively communicate findings to various policy-making audiences.

Oracle BI Enterprise Edition Dashboard and Report Best Practices Amy Mayer,Kevin McGinley,2009-01-26 BI Consulting Group has developed what is recognized as the most complete, most comprehensive set of dashboard and report design â€œbest practiceâ€ standards ever developed, specific to Oracle Business Intelligence (formerly Siebel Business Analytics). These best practices have not been created simply to provide a â€œstandardâ€ , instead they are based on the most important litmus test â€“ what standards actually cause dashboards to be used, and what â€œbest practicesâ€ of dashboard and report development provide insight into the business, rather than just reports. This guide was started with the Siebel Analytics 7.8.x platform, before Oracle acquired Siebel. The current version of the guide reflects Oracleâ€™s 10.1.3.3.x releases of Oracle Business Intelligence Enterprise Edition (OBIEE). Expect this guide to be enhanced and revised with subsequent major releases of OBIEE.
