Recent Development of Electrospinning for Drug Delivery Romána Zelkó,Dimitrios A. Lamprou,István Sebe,2020-03-27 Several promising techniques have been developed to overcome the poor solubility and/or membrane permeability properties of new drug candidates, including different fiber formation methods. Electrospinning is one of the most commonly used spinning techniques for fiber formation, induced by the high voltage applied to the drug-loaded solution. With modifying the characteristics of the solution and the spinning parameters, the functionality-related properties of the formulated fibers can be finely tuned. The fiber properties (i.e., high specific surface area, porosity, and the possibility of controlling the crystalline–amorphous phase transitions of the loaded drugs) enable the improved rate and extent of solubility, causing a rapid onset of absorption. However, the enhanced molecular mobility of the amorphous drugs embedded into the fibers is also responsible for their physical–chemical instability. This Special Issue will address new developments in the area of electrospun nanofibers for drug delivery and wound healing applications, covering recent advantages and future directions in electrospun fiber formulations and scalability. Moreover, it serves to highlight and capture the contemporary progress in electrospinning techniques, with particular attention to the industrial feasibility of developing pharmaceutical dosage forms. All aspects of small molecule or biologics-loaded fibrous dosage forms, focusing on the processability, structures and functions, and stability issues, are included.

This Must be the Place Anna Winger,2008 It is the autumn of 2001 in Berlin. In a once grand building, on a forgotten corner of the city, an unlikely friendship is about to change two people's lives. Walter Baum is nearing forty. After a failed attempt to work as an actor in Hollywood sixteen years ago, he's been dubbing the lines of a famous American movie star into German, sitting in the dark, watching his bald spot and his beer belly expand while his options and his self-confidence diminish. In an identical apartment just downstairs, a young American woman named Hope rarely gets out of the bathtub. Having fled New York a month earlier to join

her workaholic husband in Berlin, she is unable to cope with either the unfamiliar city around her or painful memories of the one she just left. When Hope and Walter meet by chance in the elevator, a sympathy develops, and then deepens, as together they begin to unravel secrets buried in the walls of their building and in their own personal histories, Against the backdrop of Berlin, a once divided city in the process of reconstructing itself, they finally come to reconcile their hopes for the future with the ache of the past that lingers, permanently, beneath the surface.--BOOK JACKET.
