Issues of the Day Ian W.H. Parry, Felicia Day, 2010-09-23 *Issues of the Day* provides an easy way for students, academics, journalists, policymakers, and the public to learn about a diverse range of policy issues affecting the environment, energy, transportation, and public health. Each commentary gives a short assessment of a topic, summarizing in a non-technical way the current state of analysis or evidence on the issue, along with selected recommendations for further reading. The essays are written by world renowned scholars, mostly economists, and provide useful insights on policy problems that are often complex and poorly understood. Some of the topics covered include air pollution, hazardous waste, voluntary environmental programs, domestic (U.S.) and global climate policy design,

fishery management, water quality, endangered species, forest fires, oil security, solar power, road and airport, fuel taxes and fuel economy standards, alternative fuel vehicles, health and longevity, smoking, malaria, tuberculosis, and the environment and development. The objective is to disseminate the findings of sound, objective research on the costs, benefits, and appropriate reform of public policies. The book provides a useful supplement for undergraduate- and graduate-level course reading, a reference guide for professionals, and a way for the general reader to quickly develop an informed perspective on the most important policy problems of the day. Issues of the Day is available to download as a PDF from the Resources for the Future website: www.rff.org/weeklycommentary
