Journalism in the Age of Virtual Reality John V. Pavlik,2019-09-17 With the advent of the internet and handheld or wearable media systems that plunge the user into 360o video, augmented—or virtual reality—technology is changing how stories are told and created. In this book, John V. Pavlik argues that a new form of mediated communication has emerged: experiential news. Experiential media delivers not just news stories but also news experiences, in which the consumer engages news as a participant or virtual eyewitness in immersive, multisensory, and interactive narratives. Pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image. He delves into developing forms such as virtual reality, haptic technologies, interactive documentaries, and drone media, presenting the principles of how to design and frame a story using these techniques. Pavlik warns that although experiential news can heighten user engagement and increase understanding, it may also fuel the transformation of fake news into artificial realities, and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality. *Journalism in the Age of Virtual Reality* offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the public.

Lose Weight! Get Laid! Find God! Benrik,2006 Covering every year in a person's lifetime, from 0 to 100, a hilarious guide to all of the essential stages of life furnishes full-color tips and advice designed to make one's life unforgettable, from birth to midlife crisis, from losing one's virginity to dis inheriting one's grandchildren. Original. 75,000 first printing.

The Science of Boredom Sandi Mann,2017-11-02 Are we living in an age where we are more boredom-prone? Or are other people boring us? Or could we be that boring person?! In our current information age, we are constantly connected to technology, and have so many varied ways to spend our leisure time that we should all surely never know what boredom feels like. Yet, boredom appears to be on the rise; it seems that the more we have to stimulate us, the more stimulation we crave. In a quest to relieve our boredom, we engage in dangerous risk-taking - from extreme sports to drugs to gambling to anti-social behaviour, or we overindulge in shopping or eating. The Science of Boredom explores the causes and consequences of boredom in the fast-paced twenty-first century. Parents are desperate to keep their children entertained during every waking moment, the education system is geared towards interactivity, and attention spans are dropping as we use multiple devices at all times. But the world of work can be increasingly repetitive and routine, and we are losing the ability to tolerate this everyday tedium. Using Sandi Mann's own ground-breaking research into boredom,

this book tells the story of how we act, react and cope when we are bored, and argues that there is a positive side to boredom. It can be a catalyst for humour, fun, reflection, creativity and inspiration. The radical solution to the 'boredom problem' is to harness it rather than try to avoid it. Allowing yourself time away from constant stimuli can enrich your life. We should all embrace our boredom and see the upside of our downtime.

Knit the Sky Lea Redmond, 2015-08-11 Record the beauty, emotions, and experiences of everyday life — not in your journal but with your knitting needles! Author Lea Redmond offers 32 enchanting projects that will inspire you to create beautiful finished pieces full of personal meaning and memories. Stock up on shades of blue, gray, and white and knit one strip of a scarf each day for a year, using the color that matches the sky on that day. When you're done, you'll have a unique memento of your year better than anything you can keep in a scrapbook. Or when you're traveling, knit postcard-size swatches at each place you visit, using the colors you see around you. When the trip is over, piece the swatches together into a throw or scarf that will remind you of your journey every time you use it. Or knit a height-chart scarf for a beloved baby, starting with her length at birth and adding inches each year until you have the perfect gift for her 18th birthday. These are knitting projects like no other, resulting in one-of-a-kind heirlooms that tell a story only you can tell. Redmond provides instructions for all the stitches and techniques you need, as well as required patterns.

The Poetics of Reverie Gaston Bachelard, 1971-06-01 In this, his last significant work, an admired French philosopher provides extraordinary meditations on the relations between the imagining consciousness and the world, positing the notion of reverie as its most dynamic point of reference. In his earlier book, *The Poetics of Space*, Bachelard considered several kinds of praiseworthy space conducive to the flow of poetic imagery. In *Poetics of Reverie* he considers the absolute origins of that imagery: language, sexuality, childhood, the Cartesian ego, and the universe. Approaching the psychology of wonder from the phenomenological viewpoint, Bachelard demonstrates the aurientative potential of all that awareness. Thus he distinguishes what is merely a phenomenon of relaxation from the kind of reverie which poetry puts on the right track, the track of expanding consciousness

Born to Play Thomas P. Hustad, 2012-05-03 Ruby Braff's uncompromising standards, musical taste, and creative imagination informed his consummate artistry in creating music beautifully played. He achieved swiftly what few musicians accomplish in a lifetime by developing a unique and immediately recognizable style. Although prepared in discographical style, capturing information about both commercial recordings and previously undocumented performances, *Born to Play* serves as a biography of the artist, detailing the path he paved as a performer and featuring personal recollections of his musical career with commentary from other figures.

Man and His Symbols Carl G. Jung, 2012-02-01 The landmark text about the inner workings of the unconscious mind—from the symbolism that unlocks the meaning of our dreams to their effect on our waking lives and artistic impulses—featuring more than a hundred images that break down Carl Jung's revolutionary ideas “What emerges with great clarity from the book is that Jung has done immense service both to psychology as a science and to our general understanding of man in society.”—The Guardian “Our psyche is part of nature, and its enigma is limitless.” Since our inception, humanity has looked to dreams for guidance. But what are they? How can we understand them? And how can we use them to shape our lives? There is perhaps no one more equipped to answer these questions than the legendary psychologist Carl G. Jung. It is in his life's work that the unconscious mind comes to be understood as an expansive, rich world just as vital and true a part of the mind as the conscious, and it is in our dreams—those personal, integral expressions of our deepest selves—that it communicates itself to us. A seminal text written explicitly for the general reader, *Man and His Symbols* is a guide to understanding the symbols in our dreams and using that knowledge to build fuller, more receptive lives. Full of fascinating case studies and examples pulled from philosophy, history, myth, fairy tales, and more, this groundbreaking work—profusely illustrated with hundreds of visual examples—offers invaluable insight into the symbols we dream that demand understanding, why we seek meaning at all, and how these very symbols affect our lives. By illuminating the means to examine our prejudices, interpret psychological meanings, break free of our influences, and recenter our individuality, *Man and His Symbols* proves to be—decades after its conception—a revelatory, absorbing, and relevant experience.

The Devil's Arithmetic (Puffin Modern Classics) Jane Yolen, 2004-04-12 30th Anniversary edition with a new introduction from the author Hannah is tired of holiday gatherings—all her family ever talks about is the past. In fact, it seems to her that's what they do every Jewish holiday. But this year's Passover Seder will be different—Hannah will be mysteriously transported into the past . . . and only she knows the unspeakable horrors that await. Winner of the National Jewish Book Award A triumphantly moving book. --Kirkus Reviews, starred review

Paint Lab for Kids Stephanie Corfee, 2015-10-15 *Paint Lab for Kids* is an inspiring collection of 52 fresh, kid-friendly projects for nurturing an artistic spirit and a love of art through working and playing with paint. Popular artist and author Stephanie Corfee offers an exciting resource of easy-to-follow instructions supported throughout with step-by-step, full-color photographs for projects that teach techniques, stimulate new ideas, explore color, combine materials in interesting ways, and encourage self-expression. Each project sequence includes a complete materials list, finished sample, and the inspiring work of a noted artist. Have fun exploring: painting techniques by making folded paper insect monoprints. your imagination with a marbled paper galaxy painting. color with pencil eraser pointillism. mixed media art by embellishing a family photo mounted on canvas. This book is perfect for

anyone who teaches or leads hands-on art experiences: creative, DIY-inspired parents, families, friends, homeschoolers, scouting, community, and youth group leaders. The popular Lab for Kids series features a growing list of books that share hands-on activities and projects on a wide host of topics, including art, astronomy, clay, geology, math, and even how to create your own circus—all authored by established experts in their fields. Each lab contains a complete materials list, clear step-by-step photographs of the process, as well as finished samples. The labs can be used as singular projects or as part of a yearlong curriculum of experiential learning. The activities are open-ended, designed to be explored over and over, often with different results. Geared toward being taught or guided by adults, they are enriching for a range of ages and skill levels. Gain firsthand knowledge on your favorite topic with Lab for Kids.

Chains Laurie Halse Anderson,2010-01-05 If an entire nation could seek its freedom, why not a girl? As the Revolutionary War begins, thirteen-year-old Isabel wages her own fight...for freedom. Promised freedom upon the death of their owner, she and her sister, Ruth, in a cruel twist of fate become the property of a malicious New York City couple, the Locktons, who have no sympathy for the American Revolution and even less for Ruth and Isabel. When Isabel meets Curzon, a slave with ties to the Patriots, he encourages her to spy on her owners, who know details of British plans for invasion. She is reluctant at first, but when the unthinkable happens to Ruth, Isabel realizes her loyalty is available to the bidder who can provide her with freedom. From acclaimed author Laurie Halse Anderson comes this compelling, impeccably researched novel that shows the lengths we can go to cast off our chains, both physical and spiritual.

Stimulated! Andrew Pek,Jeannine McGlade,2008-04 With the pace of competition, innovation, and change in today's world, creativity isn't a luxury -- it is a survival skill. But even the most creative people can end up stuck, stressed out, and stale, worn down by the daily grind. Stimulated! is an energetic exploration of five habits that can help you release your creativity and expand your innovative thinking. The method is playful, fun, enriching, and mind-expanding, but most important, it's a step-by-step process for getting unstuck. With this book you learn: how to draw inspiration and fresh insights from the world around you; how to make the most of your surroundings and develop an environment that will get the creative juices flowing; how to turn work into play; how to take the leap of faith and commit to big, bold ideas; and how to reap the benefits of your success and failures to contribute to the next creative effort.
