Alphabet to Internet Irving Fang, 2014-11-13 What Greek philosopher thought writing would harm a student's memory? Was the poet Byron's daughter the first computer programmer? Who plays more video games, women over 18 or teenage boys? In *Alphabet to Internet: Media in Our Lives*, Irving Fang looks at each medium of communication through the centuries, asking not only, What happened? but also, How did society change because of this new communication medium? and, How are we different as a result? Examining the impact of different media on a broad, historical scale—among them mass printing, the telegraph, film, the internet, and advertising—*Alphabet to Internet* takes us from the first scratches of writing and the origins of mail to today's video games, the widespread and daily use of smartphones, and the impact of social media in political uprisings across the globe. A timeline at the end of each chapter places events in perspective and allows students to pinpoint key moments in media history. Now in its third edition, *Alphabet to Internet* presents a lively, thoughtful, and accessible introduction to media history.

The Rule of Law in Cyberspace Carlos Blanco de Moraes, Gilmar Ferreira Mendes, Thomas Vesting, 2022-09-06 The rule of law in cyberspace currently faces serious challenges. From the democratic system to the exercise of fundamental rights, the Internet has raised a host of new issues for classic legal institutions. This book provides a valuable contribution to the fields of international, constitutional and administrative law scholarship as the three interact in cyberspace. The respective chapters cover topics such as the notion of digital states and digital sovereignty, jurisdiction over the Internet, e-government, and artificial intelligence. The authors are eminent scholars and international experts with a profound knowledge of these topics. Particular attention is paid to the areas of digital democracy, digital media and regulation of the digital world. The approach employed is based on a comparative perspective from Germany, the Netherlands, Italy, Portugal and Brazil. One particular focus is on how various legal systems are coping with increasing difficulties in the exercise of democracy with regard to disinformation and hate speech. The roles of legislators, the judicial system and public administrations are analysed in the light of the latest cases, conflicts and technologies. In addition to this comparative approach, the book explores the evolution of rule of law in cyberspace and the upcoming new legal regimes in the European Union and Brazil. Special care is taken to offer a critical review of both the literature and the latest legal solutions adopted and being considered regarding the regulation of cyberspace from a constitutional and administrative perspective. Given its scope, the book will be of interest to researchers and scholars in the field of digital law whose work involves constitutional problems in cyberspace and/or practical problems concerning the regulation of social networks and online commerce.

Music, Memory and Memoir Robert Edgar, Fraser Mann, Helen Pleasance, 2019-06-27 Music, Memory and Memoir provides a unique look at the contemporary cultural phenomenon of the music memoir and, leading from this, the way that music is used to construct memory. Via analyses of memoirs that consider punk and pop, indie and dance, this text examines the nature of memory for musicians and the function of music in creating personal and cultural narratives. This book includes innovative and multidisciplinary approaches from a range of contributors consisting of academics, critics and musicians, evaluating this phenomenon from multiple academic and creative practices, and examines the contemporary music memoir in its cultural and literary contexts.

Space Fostering African Societies Annette Froehlich, 2019-12-24 This book provides detailed insights into how space and its applications are, and can be, used to support the development of the full range and diversity of African societies, as encapsulated in the African Union's Agenda 2063. Like previous books in the Southern Space Studies series, it focuses on the role of space in supporting the UN Sustainable Development Goals in Africa, but it covers an even more extensive array of relevant and timely topics addressing all facets of African development. It demonstrates that, while great achievements have been made in recent years in terms of economic and social development, which has lifted many of Africa's people out of poverty, there is still much that needs to be done to fulfill the basic needs of Africa's citizens and afford them the dignity they deserve: to this end space is already being employed in diverse fields of human endeavor to serve Africa's goals for its future, but there is much room for further incorporation of space systems and data. Providing a comprehensive overview of the role space is playing in achieving Africa's developmental aspirations, the book is of great interest to both students and professionals in fields such as space studies, international relations, governance, social and rural development, and many others.

Fathoms Rebecca Giggs, 2020-07-28 Winner of the 2020 Andrew Carnegie Medal for Excellence in Nonfiction * Finalist for the 2020 Kirkus Prize for Nonfiction * Finalist for the PEN/E.O. Wilson Literary Science Writing Award A "delving, haunted, and poetic debut" (The New York Times Book Review) about the awe-inspiring lives of whales, revealing what they can teach us about ourselves, our planet, and our relationship with other species. When writer Rebecca Giggs encountered a humpback whale stranded on her local beachfront in Australia, she began to wonder how the lives of whales reflect the condition of our oceans. *Fathoms: The World in the Whale* is "a work of bright and careful genius" (Robert Moor, New York Times bestselling author of *On Trails*), one that blends natural history, philosophy, and science to explore: How do whales experience ecological change? How has whale culture been both understood and changed by human technology? What can observing whales teach us about the complexity, splendor, and fragility of life on earth? In *Fathoms*, we learn about whales so rare they have never been named, whale songs that sweep across

hemispheres in annual waves of popularity, and whales that have modified the chemical composition of our planet's atmosphere. We travel to Japan to board the ships that hunt whales and delve into the deepest seas to discover how plastic pollution pervades our earth's undersea environment. With the immediacy of Rachel Carson and the lush prose of Annie Dillard, Giggs gives us a "masterly" (The New Yorker) exploration of the natural world even as she addresses what it means to write about nature at a time of environmental crisis. With depth and clarity, she outlines the challenges we face as we attempt to understand the perspectives of other living beings, and our own place on an evolving planet. Evocative and inspiring, Fathoms "immediately earns its place in the pantheon of classics of the new golden age of environmental writing" (Literary Hub).

Mama's Last Hug: Animal Emotions and What They Tell Us about Ourselves Frans de Waal, 2019-03-12 New York Times best-selling author and primatologist Frans de Waal explores the fascinating world of animal and human emotions. Frans de Waal has spent four decades at the forefront of animal research. Following up on the best-selling *Are We Smart Enough to Know How Smart Animals Are?*, which investigated animal intelligence, *Mama's Last Hug* delivers a fascinating exploration of the rich emotional lives of animals. *Mama's Last Hug* begins with the death of Mama, a chimpanzee matriarch who formed a deep bond with biologist Jan van Hooff. When Mama was dying, van Hooff took the unusual step of visiting her in her night cage for a last hug. Their goodbyes were filmed and went viral. Millions of people were deeply moved by the way Mama embraced the professor, welcoming him with a big smile while reassuring him by patting his neck, in a gesture often considered typically human but that is in fact common to all primates. This story and others like it form the core of de Waal's argument, showing that humans are not the only species with the capacity for love, hate, fear, shame, guilt, joy, disgust, and empathy. De Waal discusses facial expressions, the emotions behind human politics, the illusion of free will, animal sentience, and, of course, Mama's life and death. The message is one of continuity between us and other species, such as the radical proposal that emotions are like organs: we don't have a single organ that other animals don't have, and the same is true for our emotions. *Mama's Last Hug* opens our hearts and minds to the many ways in which humans and other animals are connected, transforming how we view the living world around us.

The Rattle Bag Seamus Heaney, Ted Hughes, 2005-03-17 A collection of more than 400 hundred poems from all around the world.

Great Catastrophe Thomas De Waal, 2015 The destruction of the Armenians of the Ottoman Empire in 1915-16 was a brutal mass crime that prefigured other genocides in the 20th century. By various estimates, more than a million Armenians were killed and the survivors were scattered across the world. Although it is now a century old, the issue of what most of the world calls the Armenian Genocide of 1915 has not been consigned to history. It is a live and divisive political issue that mobilizes Armenians across the world, touches the identity and politics of modern Turkey, and has consumed the attention of U.S. politicians for years. In *Great Catastrophe*, the eminent scholar and reporter Thomas de Waal looks at the changing narratives and politics of the Armenian Genocide and tells the story of recent efforts by courageous Armenians, Kurds, and Turks to come to terms with the disaster as Turkey enters a new post-Kemalist era. The story of what happened to the Armenians in 1915-16 is well-known. Here we are told the much less well-known story of what happened to Armenians, Kurds, and Turks in its aftermath. First Armenians were divided between the Soviet Union and a worldwide diaspora, with different generations and communities of Armenians constructing new identities, while bitter intra-Armenian quarrels sometimes broke out into violence. In Turkey, the Armenian issue was initially forgotten and suppressed, only to return to the political agenda in the context of the Cold War, an outbreak of Armenian terrorism in the 1970s and the growth of modern 'identity politics' in the age of genocide-consciousness. In the last decade, Turkey has begun to confront its taboos and finally face up to the Armenian issue. New, more sophisticated histories are being written of the deportations of 1915, now with the collaboration of Turkish scholars. In Turkey itself there has been an astonishing revival of oral history, with tens of thousands of people coming out of the shadows to reveal a long-suppressed Armenian identity. However, a normalization process between the Armenian and Turkish states broke down in 2010. Drawing on archival sources, reportage and moving personal stories, de Waal tells the full story of Armenian-Turkish relations since the Genocide in all its extraordinary twists and turns. He strips away the propaganda to look both at the realities of a terrible historical crime and also the divisive 'politics of genocide' it produced. The book throws light not only on our understanding of Armenian-Turkish relations but also of how mass atrocities and historical tragedies shape contemporary politics--

The Right to the Smart City Paolo Cardullo, Cesare Di Felicianantonio, Rob Kitchin, 2019-06-07 Globally, Smart Cities initiatives are pursued which reproduce the interests of capital and neoliberal government, rather than wider public good. This book explores smart urbanism and 'the right to the city', examining citizenship, social justice, commoning, civic participation, and co-creation to imagine a different kind of Smart City.

Letters to Camondo Edmund de Waal, 2021-05-11 A tragic family history told in a collection of imaginary letters to a famed collector, Moise de Camondo *Letters to Camondo* is a collection of imaginary letters from Edmund de Waal to Moise de Camondo, the banker and art collector who created a spectacular house in Paris, now the Musée Nissim de Camondo, and filled it with the greatest private collection of French eighteenth-century art. The Camondos were a Jewish family from Constantinople, "the Rothschilds of the East," who made their home in Paris in the 1870s and became philanthropists, art collectors, and fixtures of Belle Époque high society, as well as being targets of antisemitism—much like de Waal's relations, the Ephrussi family, to whom they were connected. Moise de Camondo created a spectacular house and filled it with art for his son, Nissim; after Nissim was killed in the First World War, the house was bequeathed to the French state. Eventually, the Camondos were murdered by the Nazis. After de Waal, one of the world's greatest ceramic artists, was invited to make an exhibition in the Camondo house, he began to write letters to Moise de Camondo. These fifty letters are deeply personal reflections on assimilation, melancholy, family, art, the vicissitudes of history, and the value of memory.

Human Reproduction Heide Schatten, 2017-03-06 In vitro fertilization (IVF) and other assisted reproductive technologies (ART) have become a significant part of human reproduction, with already one in 50 children worldwide being born through ART and the demand steadily increasing. To accommodate the various kinds of infertility problems, new methods have been developed to increase IVF and ART success rates and it has also become possible to treat sperm, eggs, and embryos in culture to improve reproductive success, to increase the health state of an embryo, and to prevent disease in the developing child. *Human Reproduction: Updates and New Horizons* focuses on recent developments and new approaches to study egg and sperm cells and embryo

development, as well as addressing the increasing demand for IVF and ART to overcome infertility problems of various kinds that are encountered by an increasing number of couples worldwide. The book includes 10 chapters written by experts in their specific fields to provide information on sperm selection techniques and their relevance to ART; In vitro maturation of human oocytes: current practices and future promises; Molecular biology of endometriosis; Novel immunological aspects for the treatment of age-induced ovarian and testicular infertility, other functional diseases, and early and advanced cancer immunotherapy; Mitochondrial manipulation for infertility treatment and disease prevention; Novel imaging techniques to assess gametes and preimplantation embryos; Clinical application of methods to select in vitro fertilized embryos; New horizons/developments in time-lapse morphokinetic analysis of mammalian embryos; The non-human primate model for early human development; Cytoskeletal functions, defects, and dysfunctions affecting human fertilization and embryo development. This book will appeal to a large interdisciplinary audience, including researchers from both the basic science and medical communities. It will be a valuable reference for IVF clinicians, patients and prospective patients who are considering ART procedures, embryologists, cell biologists and students in the field of reproduction.

Shopomania Paul Berton, 2022-10-15 A thought-provoking and provocative challenge to consumerism (with plenty of name-dropping and celebrity antics). Sassy and satirical, Shopomania is an economic, environmental and social study. This light-hearted, dark-souled dictionary of coined words, or “shoponyms,” takes readers on a roller-coaster ride of avaricious antics and outrageous profligacy. Shopping in one form or another has existed for millennia but, aside from a few slumps, each generation has outdone the previous one. In the past fifty years, shopping—and its associated carbon footprint—has grown exponentially. Berton argues that if we invented today’s consumer culture, then we can invent something to replace it. We can do a better job of making the cycle of stuff truly circular rather than linear. We can be more environmentally, socially and politically conscious of what we buy and how it comes to us—and where it will go after we are finished with it. A species that has made shopping ubiquitous can figure all these things out with little more than co-operation and creativity, and by asking if it is really necessary to “own it now” as we have been told—endlessly—since childhood. Must we possess a thing to enjoy it? Do we really need all that stuff?

Constitutionalizing Economic Globalization David Schneiderman, 2008-03-27 Are foreign investors the privileged citizens of a new constitutional order that guarantees rates of return on investment interests? Schneiderman explores the linkages between a new investment rules regime and state constitutions – between a constitution-like regime for the protection of foreign investment and the constitutional projects of national states. The investment rules regime, as in classical accounts of constitutionalism, considers democratically authorized state action as inherently suspect. Despite the myriad purposes served by constitutionalism, the investment rules regime aims solely to enforce limits, both inside and outside of national constitutional systems, beyond which citizen-driven politics will be disabled. Drawing on contemporary and historical case studies, the author argues that any transnational regime should encourage innovation, experimentation, and the capacity to imagine alternative futures for managing the relationship between politics and markets. These objectives have been best accomplished via democratic institutions operating at national, sub-national, and local levels.

War Games Philip Hammond, Holger Pötzsch, 2019-12-12 Many of today's most commercially successful videogames, from Call of Duty to Company of Heroes, are war-themed titles that play out in what are framed as authentic real-world settings inspired by recent news headlines or drawn from history. While such games are marketed as authentic representations of war, they often provide a selective form of realism that eschews problematic, yet salient aspects of war. In addition, changes in the way Western states wage and frame actual wars makes contemporary conflicts increasingly resemble videogames when perceived from the vantage point of Western audiences. This interdisciplinary volume brings together scholars from games studies, media and cultural studies, politics and international relations, and related fields to examine the complex relationships between military-themed videogames and real-world conflict, and to consider how videogames might deal with history, memory, and conflict in alternative ways. It asks: What is the role of videogames in the formation and negotiation of cultural memory of past wars? How do game narratives and designs position the gaming subject in relation to history, war and militarism? And how far do critical, anti-war/peace games offer an alternative or challenge to mainstream commercial titles?

Cell Biology and Translational Medicine, Volume 1 Kursad Turksen, 2018-08-21 Much research has focused on the basic cellular and molecular biological aspects of stem cells. Much of this research has been fueled by their potential for use in regenerative medicine applications, which has in turn spurred growing numbers of translational and clinical studies. However, more work is needed if the potential is to be realized for improvement of the lives and well-being of patients with numerous diseases and conditions. With a goal to accelerate advances by timely information exchange, this new book series 'Cell Biology and Translational Medicine (CBTMED)' as part of SpringerNature’s longstanding and very successful Advances in Experimental Medicine and Biology book series is launched. Emerging areas of regenerative medicine and translational aspects of stem cells will be covered in each volume. Outstanding researchers are recruited to highlight developments and remaining challenges in both the basic research and clinical arenas. This current book is the first volume of a continuing series.

De Waal Autogroep Online Introduction

In today's digital age, the availability of De Waal Autogroep Online books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of De Waal Autogroep Online books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of De

Waal Autogroep Online books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing De Waal Autogroep Online versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, De Waal Autogroep Online books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing De Waal Autogroep Online books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for De Waal Autogroep Online books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, De Waal Autogroep Online books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals.
