Money Phone! Mike Koenigs, 2017-01-25 What is Money Phone and how will it change the way you do business less than 30 minutes from now? Because every business needs to get and close deals as quickly as possible but generally have these challenges...(how many of these sound like you?): They don't: have a list or database know where to find high-quality, qualified prospects have time know how to pitch their products and services the right away have good marketing have an advertising budget have a tech team have automation tools and...they have limited resources and budgets need to CLOSE DEALS NOW Money Phone is the solution for all of these challenges because with it and your smartphone, you can: Start closing deals in as little as an hour from now Gain access qualified leads IMMEDIATELY for FREE Find the highest-quality, motivated prospects with money The book includes step-by-step scripts you can adapt to any business You don't need a marketing or advertising budget No time required to get set up Nobody to hire Nothing to automate (unless you want to) And you can use this to close deals of any size - \$500, \$1,000, \$10,000,

\$100,000 or even more Money Phone uses a combination of simple text messages, short 1 minute videos and easy-to-learn but advanced psychology (without using icky, annoying, salesy tactics) to access high-quality prospects, get their attention, engage with them, gain their trust and get them to say YES. The bottom line is if you can copy and paste, send a text message, take a picture or shoot a 1 minute video on your smartphone, Money Phone can be used to close deals, starting now. In fact, with the included free video training, you'll see the EXACT strategies and get the EXACT scripts I've used to close \$2,700, \$7,700, \$19,000 and \$81,000 deals with text messages, short videos and my smartphone. If you don't have a list, you'll love this bonus because you can start getting and closing deals right away. Who am I and why should you listen to or trust me? I've been consulting, advising, building, growing and selling businesses since I was 16 years old. I've helped over 50,000 businesses over the course of 30 years who have purchased my products, coaching and consulting services and software tools. Over the course of my career, I've sold well over \$50,000,000 worth of products, services, coaching, consulting and advice. I've also sold two of my businesses to publicly-traded

companies. I think it's reasonable to say I've witnessed and participated in a multitude of different ways to find, get and close lots of customers - but the way that excites me most is using mobile marketing with video and that's what this book and companion video is all about. Everything I'm going to share with you in this book works face-to-face in person, at live events, conferences, trade shows, associations, in retail or online. The principles are all the same. **FREE - \$500 Bonus Training** This book includes a step-by-step video training and copy-paste scripts you can use **RIGHT NOW** to find prospects and close 4,5 and 6-figure deals! Start Your Own Online Coupon or Daily Deal Business Rich Mintzer, / Entrepreneur magazine, 2013-09-17 The online coupon and daily deal industries are booming as people from all socio-economic groups are seeking deals and discounts in these trying economic times. The experts at Entrepreneur deliver the startup details behind this hot opportunity and show eager entrepreneurs how to cash-in on internet-savvy savers. Unlike old-school design your own coupon book titles, this book

moves straight into computer technology and proceeds to the latest trend in couponing . . . apps, which provide deals to mobile users in any location. Many daily deal businesses do not work to enhance the experience for their merchants. Readers, however, can learn how to do so. Experts in the industry are also included such as Marc Horne, co-creator of Daily Deal Builder, who discusses what it takes to build a daily deal site, David Teichner, CEO of Yowza!! who brought deal apps to iPhones and several business owners who have tried their luck at running daily deal. They discuss what they have learned from the process. Currently there are few, if any, other books on how to start a daily deal business and the coupon books focus on how to use coupons and even on extreme couponing, but not on running an online coupon business. This is a unique title which provides those who enjoy offering deals and discounts to get started in an industry that is still growing.

Today, Android is a large team at Google, delivering an operating system (including camera software) to over 3 billion devices worldwide. This is the inside story, told by the people who made it happen. *Androids: The Team that Built the Android Operating System* is a first-hand chronological account of how the startup began, how the team came together, and how they all built an operating system from the kernel level to its applications and everything in between. It describes the tenuous beginnings of this ambitious project as a tiny startup, then as a small acquisition by Google that took on an industry with strong, entrenched competition. Author Chet Haase joined the Android team at Google in May 2010 and later recorded conversations with team members to preserve

the early days of Android's history leading to the launch of 1.0. This engaging and accessible book captures the developers' stories in their own voices to answer the question: How did Android succeed?

Your Best Friend's Guide to Cash Kara Gammell, 2015-01-12 You might be on 'the right side of 40', and yet, financially you feel about fourteen. By now, you should be rolling in the dough, but it feels like you're drowning in debt. This isn't how being a grown up was supposed to be. How will you ever get

on the property ladder if you can't even make more than the minimum payment on your credit card? Will you live like a pauper when you're old and grey because student loans and sky-high rents mean you can't afford to pay into a pension? One thing is for sure, money may not buy you happiness, but from where you're standing, it sure could buy you a few things that would put a smile on your face - a flat would be nice come to think of it. So what are you going to do about it? Do you want to spend your life in financial turmoil? When Kara Gammell first came to the UK from her native Canada at 23, financially, she was a disaster. After five years of fun at uni, she couldn't manage being paid monthly, certainly didn't know what an overdraft was (or why the cashpoint swallowed her debit card) and at one point was so skint she actually cashed in her Oyster card for the £2 deposit. But Kara took control of her money and turned her cash crisis around. By the age of 28, she was out of an overdraft, had become an award-winning financial journalist and became a homeowner (independent of the bank of mum and dad to boot) - but most importantly, she was no longer living life on the breadline or on the brink of a financial disaster. In this practical and witty guide, Kara explains how whether you are

struggling to make ends meet or trying to buy your first home - taking control of your finances can change your life. With clear and straightforward advice on everything from cutting credit card debt to getting more from your money at the supermarket, Kara shares her tried and tested tips so that you have all you need to get it right - the first time. Kara soon learned from her mistakes, and now you can too.

Rewriting the same app for iOS and Android is tedious, error-prone, and expensive. Microsoft's Xamarin drastically reduces dev time by reusing most application code—typically 70% or more. The core of your iOS and Android app is shared; you write platform-specific code only for the UI layer. And because Xamarin uses C#, your apps benefit from everything this modern language and the .NET ecosystem have to offer.
