Decide Now L Jay Mitchell Jd,2014-08-29 In this groundbreaking book L. Jay Mitchell invites us to trade in the so-called Good Life for the Best Life and find true fulfillment by examining and discovering the power to change who we are. Through immersive stories and intriguing dialogue, the author leads us on an exploration of provocative perspectives about how we fit into the world. This book is about the power of knowing ourselves. It is about the power of relationship, both with ourselves and with others. It is about the resistance and eventual empowerment of choosing who we will be. Be forewarned: this book can change lives.

The Power of Naming Melanie Dewberry,2017-04-18 Who are you, really? This is the central question. The question you might have been asking yourself all these years. Who are you without your title, your gender, your talent, your weight, your income, or your personality? If you strip away all of your niceties, all those embellishments that you've added to your persona to be accepted, what is left? If you wriggle out of all the identities that others have foisted on you, if you release all the ways you smooth out your rough edges so you can belong and feel safe, who are you? What is your core identity? The Power of Naming: A Journey toward Your Soul's Indigenous Nature is a beautiful guide to answering your soul's yearning to be known, to live on purpose, and to be authentic. To hear and elicit your name, you will need to be honest with yourself and admit that deep down inside you have always had at least an inkling of your essence, but you've played a game of hide-and-seek with your soul. Through The Power of Naming, peaceful warriors are born, false identities and labels are cast off, and a deeper understanding of the true soul is unearthed. As you work through the chapters of this book, learning to apply the teachings imbued with the author's rich Native American and African American background, you will rediscover who you are and experience a new sense of freedom, love, and alignment with your highest self.

Decide Now - Ditch Decision Making ,2004 The paper was motivated by the following dissatisfactions: 1. The failure of mainstream academic psychology to have anything interesting or useful to say about people in the real world. 2. The separation of psychology into sub-disciplines or paradigms that don't talk to one another. 3. The failure to distinguish between technical and common language usage when dealing with concepts such as decision making and command. 4. Partly as a consequence of the above, the failure to scope issues properly and preserve different levels of description. Many of these failures arise from inadequate use of language. The language we use to describe phenomena matters. Amongst other things, it divides our world into particular chunks. Two such divisions that have been unhelpful are the separation of decision making into Naturalistic Decision Making (NDM) and Classical Decision Making (CDM), and the separation of Command into chunks such as Situation Awareness and Decision Making. It is argued that these divisions are unnecessary if we preserve the unity of what we might call the executive process consisting of a knowledge structure, a control process and an energy element. Links with some classical notions in cognitive psychology are established and some implications for command system design are discussed.

Thinking and Deciding Jonathan Baron,2023-07-31 The fifth edition of the classic text Thinking and Deciding updates the broad overview of the field of judgments and decisions offered in previous editions. It covers the normative standards used to evaluate conclusions, such as logic, probability, and various forms of utility theory. It explains descriptive accounts of departures from these standards, largely in terms of principles of cognitive psychology, emphasizing the distinction between search processes and inferences. Chapters cover decisions under risk, decision analysis, moral decisions and social dilemmas, and decisions about the future. Although the book assumes no particular prerequisites beyond introductory high-school algebra, it is most suited to advanced undergraduates, early graduate students, and active researchers in related fields, such as business, politics, law, medicine, economics, and philosophy.

Saints and Scholars Gavin G. Gregan,2010-02-23 Whether we want to accept it or not, the youth of today shall be the leaders of tomorrow. They shall become our business leaders, political leaders, and the professionals of tomorrow. The current generation of school-goers face tremendous opportunity and significant challenges, socially and economically. Saints and Scholars seeks to assist the young in their journey across the threshold into adulthood and seeks to help them raise their awareness of themselves, their strengths and gifts and how to create a life of purpose and authenticity for themselves so that they can Be More, Do More and Have More.

A Dead Man's Odyssey George T. Horvat,2012-08 This story is about a man who had finally reached the end of his rope with the Christian assault on his soul. It was an assault that came at him from all directions, burying him in theological contradictions. By this time in his life, he had given up on his faith and decided to walk away and let the chips fall where they may. He would lead his life one day at a time, and to hell with who was right and who was wrong. It wasn't going to be a pleasant experience coming his way in this middle world that he suddenly found himself in, but it would wind up being a turning point in his life—a turning point that would bring him back into the fold, for the Shepherd is a jealous caretaker and dreads the loss of a single member of his flock. All of his issues would not be resolved, but the events happening in this place beyond the grave would ultimately strengthen his faith and would serve as his shield against further attacks from the adversary. Follow him on his journey as he finds himself stranded somewhere between heaven and hell.

Motivation and Agency Alfred R. Mele,2003-01-02 What place does motivation have in the lives of intelligent agents? Mele's answer is sensitive to the concerns of philosophers of mind and moral philosophers and informed by empirical work. He offers a distinctive, comprehensive, attractive view of human agency. This book stands boldly at the intersection of philosophy of mind, moral philosophy, and metaphysics.

The Dynamics of Public Policy Adrian Kay,2006-01-01 . . . this is a first rate book. It draws on a wide range of reading philosophy, economics and politics and teases out a number of important ideas. . . for academics and postgraduates it surely will be essential reading and I think has pushed the study of public policy forward. Michael Connolly, Political Studies Review In The Dynamics of Public Policy, Adrian Kay sets out the crucial methodological, theoretical and empirical implications of two important trends in the social sciences: a frequently expressed ambition for analysis of movies not stills and the regular observation that policy, politics and governance is becoming more complex. Beginning with a discussion of the centrality of temporality, change and history to the social sciences, he develops the provocative claim that existing models of the policy process are of limited value in understanding and explaining policy dynamics. Instead, the author argues that it is only through structured narratives that we can really understand and explain complex policy histories. He sets out a methodology for structuring policy narratives and illustrates the claims of the book through four detailed case studies: health policy and pharmaceutical regulation in the UK; and agricultural policy and budget policy in the EU. Adrian Kay's book will appeal to academics in the fields of policy analysis, public administration and public sector management as well as political science and political theory.

Surviving the Storm Elder Lucille Fagin,2021-02-18 This book will take you into some deep, passionate, and personal moments of my life and of the lives of some of my family members. You will be able to take a closer look into life of Lucille, Author of the book "A Faith Worth Passing On" and some of her family members. I tell you that with faith and a relationship with God you will have favor that will take you places you cannot imagine. Further it shows how having faith in God will cause mountains to move, walls to crumble and enemies made low. Furthermore, the author entreats you to find purpose within you. Many of the trials in her life will help you understand that when God takes you through different storms, he has already anointed, and appointed you in the area of your affliction so you will be able to minister and help somebody else. Lucille brings witness that the many storms she overcomes are to help minister to and pray someone through. The author submits that she learned early in life to put her trust, (faith and

confidence) in God. For each valley, there is a mountain top. It is for sure that no one knows what the future holds, but the one thing for sure we know who holds your tomorrow. You are encouraged throughout the pages to never give up or give out. No matter what happens in life to keep holding on, because there is always light at the end of every tunnel and a rainbow after every storm.

Normativity and Control David Owens,2018-01-26 Do we control what we believe? Are we responsible for what we believe? These two questions are connected: the kind of responsibility we have for our beliefs depends on the form of control that we have over them. For a number of years David Owens has investigated what form of control we must have over something in order to be held to the norms governing that thing, and has argued that belief, intention and action each require a different type of control. The forms of freedom appropriate to each of them vary, and so do the presuppositions of responsibility associated with each of them. Issues in the moral psychology of belief cast light on some of the traditional problems of epistemology and in particular on the problems of scepticism and testimony. In this series of ten essays Owens explores various different forms of control we might have over belief and the different forms of responsibility they generate. He brings into the picture notable recent work in epistemology: on assurance theories of testimony, on 'pragmatic encroachment', on the aim of belief and on the value of knowledge. He also considers topics in related fields such as the philosophy of mind (e.g. the problem of self-knowledge and theories of the first person) and the philosophy of action (e.g. the guise of the good and the role of the will in free agency). Finally, Owens suggests a non-standard reading of the sceptical tradition in early modern philosophy as we find it in Descartes and Hume. Seven of the essays collected here are previously published, one has been heavily revised, and two are previously unpublished. Owens provides a substantial introduction bringing together the themes of the essays.

Rational Deliberation David Gauthier,2022-02-18 For several decades, David Gauthier has been one of the leading philosophers working on practical rationality and deliberation. This book presents a selection of Gauthier's writings on these topics, all but two of which were written after *Morals by Agreement* (OUP, 1986). They represent Gauthier's most important contributions to the theory of practical reason, moving some distance from the view a first presented in *Reason and Maximization* and developed in a much-reprinted chapter of *Morals by Agreement*. These essays challenge common misconceptions of Gauthier's revisionist conception of practical rationality, and provide important insights with implications for economic theory.
