Decision Making In A Week Martin Manser,2013-01-25 The ability to make the right decision is crucial to anyone who wants to advance their career. Written by Martin Manser, a leading expert on decision making in a business context, this book quickly teaches you the insider secrets you need to know to in order to choose the right path. The highly motivational 'in a week' structure of the book provides seven straightforward chapters explaining the key points, and at the end there are optional questions to ensure you have taken it all in. There are also cartoons and diagrams throughout, to help make this book a more enjoyable and effective learning experience. So what are you waiting for? Let this book put you on the fast track to success!

Strategy in 3D Greg Fisher,John E. Wisneski,Rene M. Bakker,2020-06-10 Strategy decision making and action used to be off limits to all but the select few at the very top of an organization. It was a largely cerebral activity focused on grand long-terms plans made at annual off-site retreats away from the daily challenges of the business. That is no longer the case. The current business environment does not wait for companies to slowly adjust in an annual meeting. The relentless pace of change renders today's long-term future tomorrow's history. Rapid innovations and ever-increasing complexities limit executives' ability to make decisions with perfect information. Does this mean strategy is no longer useful, or even feasible? No. Good strategists are needed now more than ever. But today's high-performing organizations think of strategy differently than in the past. These companies make strategy part of every manager's role; they strategize continuously and tackle strategic problems through individuals from all parts of the organization. Strategy in this new, fast-paced world is about diagnosing the diverse array of complex challenges confronting organizations, deciding on novel solutions to address those challenges, and delivering by taking action on those solutions. Including a novel organizational framework and never-before-published application examples, Strategy in 3D helps build these foundational skills and prepares the reader for success as a strategist in the 21st century.

Uncertainty, Modeling, and Decision Making in Geotechnics Kok-Kwang Phoon,Takayuki Shuku,Jianye Ching,2023-12-11 Uncertainty, Modeling, and Decision Making in Geotechnics shows how uncertainty quantification and numerical modeling can complement each other to enhance decision-making in geotechnical practice, filling a critical gap in guiding practitioners to address uncertainties directly. The book helps practitioners acquire a working knowledge of geotechnical risk and reliability methods and guides them to use these methods wisely in conjunction with data and numerical modeling. In particular, it provides guidance on the selection of realistic statistics and a cost-effective, accessible method to address different design objectives, and for different problem settings, and illustrates the value of this to decision-making using realistic examples. Bringing together statistical characterization, reliability analysis, reliability-based design, probabilistic inverse analysis, and physical insights drawn from case studies, this reference guide from an international team of experts offers an excellent resource for state-of-the-practice uncertainty-informed geotechnical design for specialist practitioners and the research community.

Corrosion Policy Decision Making Reza Javaherdashti,2021-12-06 CORROSION POLICY DECISION MAKING Explore the science, management, economy, ecology, and engineering of corrosion management and prevention In Corrosion Policy Decision Making, distinguished consultant and corrosion expert Dr. Reza Javaherdashti delivers an insightful overview of the fundamental principles of corrosion with a strong focus on the applicability of corrosion theory to industrial practice. The authors demonstrate various aspects of smart corrosion management and persuasively make the case that there is a real difference between corrosion management and corrosion knowledge management. The book contains seven chapters that each focuses on one important aspect of corrosion and corrosion management. Corrosion management is an issue that is not just corrosion science or corrosion engineering but rather a combination of both elements. To cover this paradoxical aspect of corrosion management, chapter 2 deals with some basic, introductory concepts and principles of corrosion and coating/painting (an important corrosion protection method) while chapter 3 explains the elements of smart corrosion management in detail. Another important principle of smart corrosion management is to be able to study the cost of corrosion, chapter 4 introduces important points in the economics involved in a smart corrosion management. As indicated earlier, corrosion engineering is also an integral part of corrosion management and thus chapter 5 looks at the engineering side of corrosion by detailing the example of Process Additives (EMPA). Chapter 6 for the first time looks at the possibility of using TRIZ (algorithm of invention) in corrosion management. Finally, chapter 7 presents the necessary elements for building a model that would explore the mutual interaction between corrosion and environment mainly by exploring the difference between environmental impact and environmental effect. Chapter 7 is also very important because the four models so far applied to estimate the cost of corrosion (Uhlig Method, Hoar Method, I/O method and LCC method) are not capable of suggesting any clear model or a sensible way of exploring the elements necessary to explain the impact of indirect costs of corrosion the most important of which being environmental damages imposed by corrosion. This book is ideal for engineers, students, and managers working or studying corrosion, Corrosion Policy Decision Making is also an indispensable resource for professionals in the fields of upstream and downstream, on-shore/off-shore oil and gas, transportation, mining, power generation as well as major sectors of other strategic industries.

Uncertainty Modeling in Knowledge Engineering and Decision Making ,2012 FLINS, originally an acronym for Fuzzy Logic and Intelligent Technologies in Nuclear Science, is now extended to Computational Intelligence for applied research. The contributions to the 10th of FLINS conference cover state-of-the-art research, development, and technology for computational intelligence systems, both from the foundations and the applications points-of-view. Sample Chapter(s). Foreword (55 KB). Evaluation of Manufacturing Technology of Photovoltaic Cells (124 KB). Contents: Decision Making and Decision Support Systems; Uncertainty Modeling; Foundations of Computational Intelligence; Statistics, Data Analysis and Data Mining; Intelligent Information Processing; Productivity and Reliability; Applied Research. Readership: Graduate students, researchers, and academics in artificial intelligence/machine learning, information management, decision sciences, databases/information sciences and fuzzy logic.

Interdisciplinary and International Perspectives on 3D Printing in Education Santos, Ieda M.,Ali, Nagla,Areepattamannil, Shaljan,2018-11-23 Although 3D printing technologies are still a rarity in many classrooms and other educational settings, their far-reaching applications across a wide range of subjects make them a desirable instructional aid. Effective implementation of these technologies can engage learners through project-based learning and exploration of objects. Interdisciplinary and International Perspectives on 3D Printing in Education is a collection of advanced research that facilitates discussions on interdisciplinary fields and international perspectives, from kindergarten to higher education, to inform the uses of 3D printing in education from diverse and broad perspectives. Covering topics such as computer-aided software, learning theories, and educational policy, this book is ideally designed for educators, practitioners, instructional designers, and researchers.

Intelligent Software Methodologies, Tools and Techniques Hamido Fujita,Guido Guizzi,2015-08-31 This book constitutes the best papers selection from the proceedings of the 14th International Conference on Intelligent Software Methodologies, Tools and Techniques, SoMeT 2015, held in Naples, Italy, in September 2015. The 47 full papers presented together with one short paper were carefully reviewed and selected from 118 submissions. The papers are organized in topical sections on embedded and mobile software systems, theory and application; real-time systems; requirement engineering, high-assurance and testing system; social networks and big data; cloud computing and semantic web; artificial intelligence techniques and intelligent system design; software development and integration; security and software methodologies for reliable software design; new software techniques in image processing and computer graphics; software applications systems for medical health care.

Advances in Best-Worst Method Jafar Rezaei,Matteo Brunelli,Majid Mohammadi,2023-01-31 This book presents recent advances in the theory and application of the Best-Worst Method (BWM). It includes selected papers from the Third International Workshop on Best-Worst Method (BWM2022), held in Delft, the Netherlands, from 9 to 10 June 2022. The book provides valuable insights on why and how to use BWM in a diverse range of applications including health, energy, supply chain management, and engineering. Moreover, it highlights the use of BWM in different settings including individual decision-making vs group decision-making, and with complete information vs incomplete and uncertain information. Academics and practitioners whose work involves multi-criteria decision-making and decision analysis will particularly benefit from the papers gathered here.

HCI International 2020 - Late Breaking Papers: Virtual and Augmented Reality Constantine Stephanidis, Jessie Y. C. Chen, Gino Fragomeni, 2020-10-07 This book constitutes late breaking papers from the 22nd International Conference on Human-Computer Interaction, HCII 2020, which was held in July 2020. The conference was planned to take place in Copenhagen, Denmark, but had to change to a virtual conference mode due to the COVID-19 pandemic. From a total of 6326 submissions, a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place. In addition, a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as “Late Breaking Work” (papers and posters). These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems. The 34 late breaking papers presented in this volume were organized in two topical sections named: Virtual, Augmented and Mixed Reality Design and Implementation; and User Experience in Virtual, Augmented and Mixed Reality.

3D Printing in Orthopaedic Surgery Matthew DiPaola, 2018-11-20 Get a quick, expert overview of the role of emerging 3D printing technology in orthopaedic surgery, devices, and implants. This concise resource by Drs. Matthew DiPaola and Felasfa Wodajo provides orthopaedic surgeons and residents with need-to-know information on the clinical applications of 3D printing, including current technological capabilities, guidance for practice, and future outlooks for this fast-growing area. Covers basic principles such as engineering aspects, software, economics, legal considerations, and applications for education and surgery planning. Discusses 3D printing in arthroplasty, trauma and deformity, the adult and pediatric spine, oncology, and more. Includes information on setting up a home 3D printing plant and 3D printing biologics. Consolidates today's available information on this burgeoning topic into a single convenient resource

Innovations in 3D Geo Information Systems Alias Abdul-Rahman, Sisi Zlatanova, Volker Coors, 2007-12-31 This book covers various aspects of spatial data modelling specifically regarding three-dimensional (3D) modelling and structuring. The realization of true 3D geoinformation spatial systems requires a high input, and the developmental process is taking place in various research centers and universities around the globe. The development of such systems and solutions, including the modelling theories are presented in this book.

The Law of Environmental Justice Michael Gerrard, Sheila R. Foster, 2008 Environmental justice is the concept that minority and low-income individuals, communities and populations should not be disproportionately exposed to environmental hazards, and that they should share fully in making the decisions that affect their environment. This volume examines the sources of environmental justice law and how evolving regulations and court decisions impact projects around the country.
