**Solving Deer Problems** Peter Loewer,2015-06-16 What can I do? Gardeners are asking themselves—and experts—this question with increasing urgency about the deer that threaten their carefully cultivated lawns and gardens. With the increased development of suburban and rural land and the lack of natural predators, deer populations are exploding and living closer to humans than ever before—and they’re nibbling on more beloved blooms as well. How can the deer be stopped? What plants are safe? Peter Loewer has the answers in Solving Deer Problems. In this manual, he addresses several key topics, including plants that will withstand a whitetail attack, chemicals that can safely be used as deer repellants, fences that will keep deer away from those choice garden beds, trapping and relocating cervids and other garden pests, and numerous tricks to keep the pesky creatures out of your yard. Peter also discusses the less-prominent threat of deer-borne diseases and ticks and how to protect yourself and your pets. He even touches on car vs. deer collisions and how you can prepare yourself to achieve the best outcome incase a deer is ever caught in your headlights. Don’t wait until your prize flowers, vegetables, or shrubs are a deer’s meal. Pick up Solving Deer Problems for all the clear answers on what you can do about your deer problem.

**The Max Faraday Chronicles** Jeffrey Shurlow Graham, Who am I and why should you read my story? My name is Max Faraday. Nobody is going to believe me, but here I am putting it all down on paper. I am a man of two time periods. Forgive me, this sci-fi stuff is new to me. A week or more ago, in July 2002, I came home for my 1982 high school class reunion. I was staying with my friend Jamie Scott and his family. On the way home from the reunion, we picked up his kids at the babysitter. Their little girl comes out and bounces a ball that tumbles out of her hands into the street. Just as we arrived, a car speeds up and my instincts take over. I pick her up and get her out of the way, but I was then hit by the speeding car! Stunned, I wake up in September 1978! I am a thirty-eight-year-old man in a fourteen-year-old’s body! I can’t tell anyone, or they would lock me up, thinking I’m crazy! I know I would. So here I am in the eighth grade all over again. When I went to bed in 1978, I woke up in a coma in 2002, wondering about driver who ran me over.

*A Search for Safe Passage* Frances Figart,2021-03-16 A diverse cast of animals in the Great Smoky Mountains embark on a dangerous journey of survival across in this educational adventure book with a new perspective on the places where roadways and wildlife meet. This compelling, accessible narrative is perfect for introducing readers to the problems and solutions around the global issue of roadway ecology, animal migration, and the 'barrier effect.' Best friends Bear and Deer grew up on the North side of a beautiful Appalachian gorge. In the time of their grandparents, animals could travel freely on either side of a fast-flowing river, but now the dangerous Human Highway divides their home range into the North and South sides. On the night of a full moon, two strangers arrive from the South with news that will lead to tough decisions, a life-changing adventure, and new friends joining in a search for safe passage.

The Ultimate Guide to Self-Reliant Living Jay Cassell,2013-11-01 Being a homesteader today may seem difficult; the world is full of so many gadgets and conveniences, many of which most of us consider necessary to live a full and happy life. **Regional Survey of Deer Population, Vehicle Travel, and Deer-vehicle Crash Information Collection and Management** Keith K. Knapp,2004 The objective of this survey was to investigate regional Department of Transportation (DOT) and Department of Natural Resources (DNR) activities related to the collection and management of deer-vehicle crash(DVC and DVC-released data. The content of this report will be used to define regional databases, compare DVC data temporally and spatially, and also assist in the more proper identification of DVC-related data problems.

*Mere Churchianity* Michael Spencer,2010-06-01 Have you left the church in search of Jesus? Studies show that one in four young adults claim no formal religious affiliation, and church leaders have long known that this generation is largely missing on Sunday morning. Hundreds of thousands of “church leavers” have had a mentor and pastor, however, in Michael Spencer, known to blog readers as the Internet Monk. Spencer guided a vast online congregation in its search for a more honest and more immediate practice of Christian faith. Spencer discovered the truth that church officials often miss, which is that many who leave the church do so in an attempt to find Jesus. For years on his blog Spencer showed de-churched readers how to practice their faith without the distractions of religious institutions. Sadly, he died in 2010. But now that his last message is available in Mere Churchianity, you can benefit from the biblical wisdom and compassionate teaching that always have been hallmarks of his ministry. With Mere Churchianity, Spencer’s writing will continue to point the disenchanted and dispossessed to a Jesus-shaped spirituality. And along the way, his teachings show how you can find others who will go with you on the journey.

**Crossings: How Road Ecology Is Shaping the Future of Our Planet** Ben Goldfarb,2023-09-12 Shortlisted for the NYPL's 2024 Helen Bernstein Book Award for Excellence in Journalism A New York Times Notable Book of 2023 and an Editors' Choice • A Science News Favorite Book of 2023 • A Kirkus Reviews Best Nonfiction Book of 2023 • A Smithsonian Staff Favorite of 2023 • A New Yorker Best Book of 2023 • A Booklist Top 10 Book on the Environment & Sustainability for 2024 An eye-opening account of the global ecological transformations wrought by roads, from the award-winning author of Eager. Some 40 million miles of roadways encircle the earth, yet we tend to regard them only as infrastructure for human convenience. While roads are so ubiquitous they’re practically invisible to us, wild animals experience them as entirely alien forces of death and disruption. In Crossings, environmental journalist Ben Goldfarb travels throughout the United States and around the world to investigate how roads have transformed our planet. A million animals are killed by cars each day in the U.S. alone, but as the new science of road ecology shows, the harms of highways extend far beyond roadkill. Creatures from antelope to salmon are losing their ability to migrate in search of food and mates; invasive plants hitch rides in tire treads; road salt contaminates lakes and rivers; and the very noise of traffic chases songbirds from vast swaths of habitat. Yet road ecologists are also seeking to blunt the destruction through innovative solutions. Goldfarb meets with conservationists building bridges for California’s mountain lions and tunnels for English toads, engineers deconstructing the labyrinth of

logging roads that web national forests, animal rehabbers caring for Tasmania’s car-orphaned wallabies, and community organizers working to undo the havoc highways have wreaked upon American cities. Today, as our planet’s road network continues to grow exponentially, the science of road ecology has become increasingly vital. Written with passion and curiosity, Crossings is a sweeping, spirited, and timely investigation into how humans have altered the natural world—and how we can create a better future for all living beings.
