Colonial Terror Deana Heath,2021-03-23 Focusing on India between the early nineteenth century and the First World War, *Colonial Terror* explores the centrality of the torture of Indian bodies to the law-preserving violence of colonial rule and some of the ways in which extraordinary violence was embedded in the ordinary operation of colonial states. Although enacted largely by Indians on Indian bodies, particularly by subaltern members of the police, the book argues that torture was facilitated, systematized, and ultimately sanctioned by first the East India Company and then the Raj because it benefitted the colonial regime, since rendering the police a source of terror played a key role in the construction and maintenance of state sovereignty. Drawing upon the work of both Giorgio Agamben and Michel Foucault, *Colonial Terror* contends, furthermore, that it is only possible to understand the terrorizing nature of the colonial police in India by viewing colonial India as a 'regime of exception' in which two different forms of exceptionality were in operation - one wrought through the exclusion of particular groups or segments of the Indian population from the law and the other by petty sovereigns in their enactment of illegal violence in the operation of the law. It was in such fertile ground, in which colonial subjects were both included within the domain of colonial law while also being abandoned by it, that torture was able to flourish.

Tables of IGC Cosmic Ray Data J. A. Simpson,2013-10-22 *Annals of the International Geophysical Year*, Volume 28: *Tables of IGC Cosmic Ray Data*, Part III contains tabulations of International Geophysical Cooperation's cosmic ray activity data. This book includes lists of stations and investigators from whom further information on the cosmic ray apparatus can be obtained. In order to prepare the data on the following pages for publication, the data are first put on punched cards and then checked for correctness essentially by repunching, thus minimizing errors of transcription and also facilitate some computations which have been made with some of the data. Tabulating machines are then used to print the data on standard forms and the data are photographed for reproduction. As a further insurance against errors, carbon copies of the data sheets are sent to all investigators to be checked. The data marked as verified in the table of contents have been returned to the data center and the corrections made. This book will prove useful to geophysical researchers.
