*Moonstrology* Sara Wiseman, 2021-01-24 I love the moon. I love its power, its mystery, the way it offers Universal connection to each of us, no matter where we are in the world or in the time passage of our lives. I love the changeable nature of the moon-the way it sways the water in our bodies and in the greater body of Gaia's oceans. There is love, there is enchantment, and when we are very still and very aware, the moon communicates wisdom. There are many extraordinary books about the cycles of the moon, which cover phases in minute detail. These are wonderful and offer great help to people who are interested in the deep study of pagan or shamanistic paths. This book is much

simpler. It is designed to be a twice-monthly (and in some months, more frequent) touchstone to help you connect to the energy of the moon in its two most powerful spiritual phases-the new moon, and the full moon. As you become aware of the new and full moons in your life, and begin to work with this moon energy, you will find you becoming spiritual clear-you set intention at new moon using the influence of the sign the moon is entering, and you release at full moon, using the influence of the sign the moon is leaving. Over the course of a year, you will visit 12 (or more) signs in both the cycle of beginning and releasing, and you will have journeyed through a complete astrological cycle-physically, emotionally and spiritually. Because the moon does not inhabit the same position on the same days every year, I have provided several moon phase calendars for the upcoming years. If you are reading this book after the last calendar listed, no problem. Simply go online and look for moon lunar phrases or moon astrological phases to determine the exact date and time of the new and full moons in upcoming years. The information is free and readily available, and will be easy to find. Finally, I've decided to present Moonstrology in the order the moon cycles normally move through a calendar year, beginning in January. For example, we often begin with a new moon in Capricorn, full moon in Cancer. This is not how it works every January, but it is the order that you will most likely experience. In cases of lunar eclipses, expanded or moon phases or solar eclipses, these also happen differently every year. I would suggest

you consult the calendars, or again, research your own in later years. Finally, this book is channeled. I approach spiritual connection with the moon in the same way I do all things, which is via direct connection with the Universe: I close my eyes, breathe deeply until I am relaxed, and slip into a meditative trance state where the words flow through me onto the page. Because of the way this information is received, it is probably or even certainly different than what you will find in other books. It is my offering to you, in hopes that it will spark a new understanding and a new way of working with this marvelous Divine mystery that is the moon.

**Moon Magic** Diane Ahlquist, 2017-12-05 From the author of Moon Spells comes a beginner's book about the moon's energy and how you can harness that lunar power in your everyday life. From new moons and eclipses to blue moons and the super moon, there are ample opportunities for the moon to influence our emotions and thoughts. Many believe our emotional potency is heightened during a super moon, while a new moon can bring change and new perspectives. Knowing when and how to use that power is key. In Moon Magic, you'll learn how the lunar phases influence our emotions and well-being differently and how to harness that power for healing, emotional strength, and physical and mental wellness. Third-generation intuitive Diane Ahlquist helps guide those new to the power of the moon through lunar recipes and simple exercises, such as intention setting and moon meditation to help you capitalize on the moon's inherent power and channel the moon's energy whenever you need it most.

*Moon Phase Astrology* Raven Kaldera, 2011-03-28 A guide to understanding the phases of astrological Moon signs and their effects on emotions and personality • Describes the positive and negative character-defining traits of each of the 96 Moon phase/Moon sign combinations • Explains how to use

your natal Moon's sign and phase to predict how current and approaching Moons can affect you • Explores the universal challenges arising during each Moon phase throughout the year and ways to honor each phase as it passes The Moon's ever-changing phases offer a way to deepen our understanding of our natal Moon sign as well as the Moon's day-to-day influence on our emotional tides. Through its 8 phases and its wandering dance through each of the 12 signs of the Zodiac--from the Infant's Moon (the New Moon in Aries) to the Storyteller's Moon (the Full Moon in Gemini) to the Prophet's Moon (the waning Balsamic Moon in Aquarius)--the Moon shares its story in 96 different ways. Telling the stories of the heart of all 96 Moon phase and Moon sign combinations, Raven Kaldera explains the creative gifts and emotional challenges bestowed upon those born under each Moon archetype as well as how to nurture the positive traits and improve--or at least discourage--the negative ones. Exploring the influences each Moon archetype has on us as it passes, the author reveals which Moons are the most difficult, what innate qualities each Moon brings out in us, and what we can do to honor each Moon. Including evocative quotes illuminating the nature of each Moon, Kaldera shows how to use your natal Moon's astrological sign and phase to find your "hidden Moons"--the shadows cast by passing Moons--and predict how current and approaching Moons will affect you.

**Phases of the Moon** Gillia M. Olson, 2006 Introduces moon phases, including why they occur and what the different phases are called.

*Moonstruck* Ernest Naylor, 2015 Scientific evidence for biological clocks linked to the Moon has only recently become recognized. This book describes the growing evidence for lunar influences on animal behaviour, and considers whether humans may be affected too

*Living the Lunar Calendar* Wayne Horowitz, John M. Steele, 2012 Lunar calendars suffer from an inherent uncertainty in the length of each month and the number of months in the year. Variable atmospheric conditions, weather and the acuity of the eye of an observer mean that the first sighting of the new moon crescent can never be known in advance. Calendars which rely on such observations to define the beginning of a new month therefore suffer from this lack of certainty as to whether a month will begin on a given day or the next. The papers in this volume address the question of how ancient and medieval societies lived with the uncertainties of a lunar calendar. How did lack of foreknowledge of the beginning of the month impact upon administration, the planning of festivals, and historical record keeping? Did societies replace the observation of the new moon crescent with schematic calendars or calendars based upon astronomical calculations and what were the ideological and practical consequences of such a change? The contributors to

this volume address these topics from the perspectives of a variety of Ancient Near Eastern, Jewish, Ancient and Medieval European, Asian and American cultures.
