Locating Right to the City in the Global South Tony Roshan Samara, Shenjing He, Guo Chen, 2013-01-04 Despite the fact that virtually all urban growth is occurring, and will continue to occur, in the cities of the Global South, the conceptual tools used to study cities are distilled disproportionately from research on the highly developed cities of the Global North. With urban inequality widely recognized as central to many of the most pressing challenges facing the world, there is a need for a deeper understanding of cities of the South on their own terms. *Locating Right to the City in the Global South* marks an innovative and far reaching effort to document and make sense of urban transformations across a range of cities, as well as the conflicts and struggles for social justice these are generating. The volume contains empirically rich, theoretically informed case studies focused on the social, spatial, and political dimensions of urban inequality in the Global South. Drawing from scholars with extensive fieldwork experience, this volume covers sixteen cities in fourteen countries across a belt stretching from Latin America, to Africa and the Middle East, and into Asia. Central to what binds these cities are deeply rooted, complex, and dynamic processes of social and spatial division that are being actively reproduced. These cities are not so much fracturing as they are being divided by governance practices informed by local histories and political contestation, and refracted through or infused by market based approaches to urban development. Through a close examination of these practices and resistance to them, this volume provides perspectives on neoliberalism and right to the city that advance our understanding of urbanism in the Global South. In mapping the relationships between space, politics and populations, the volume draws attention to variations shaped by local circumstances, while simultaneously elaborating a distinctive transnational Southern urbanism. It provides indepth research on a range of practical and policy oriented issues, from housing and slum redevelopment to building democratic cities that include participation by lower income and other marginal groups. It will be of interest to students and practitioners alike studying Urban Studies, Globalization, and Development.

Handbook of Research on Urban Governance and Management in the Developing World Mugambwa, Joshua, Katusiimeh, Mesharch W., 2018-05-09 With the emphasis on market-led development initiatives, sustainable urbanization is a challenge, especially in growing nations. Regional administrative efforts are crucial for cities to meet the planned city operations and specific targets and objectives. The *Handbook of Research on Urban Governance and Management in the Developing World* is a research publication that explores contemporary issues in regional political and administrative practices and key challenges in implementing these strategies in growing nations. Featuring coverage on a wide range of topics such as urban and regional economics, supply chain management, and environmental concerns, this book is geared toward city development planners, policy makers, researchers, academics, and students seeking current and relevant research on the regional bureaucracy and its practices and how they affect growing nations.

Retrofitting Cities for Tomorrow's World Malcolm Eames, Tim Dixon, Miriam Hunt, Simon Lannon, 2017-09-06 A groundbreaking exploration of the most promising new ideas for creating the sustainable cities of tomorrow The culmination of a four-year collaborative research project undertaken by leading UK universities, in partnership with city authorities, prominent architecture firms, and major international consultants, *Retrofitting Cities for Tomorrow's World* explores the theoretical and practical aspects of the transition towards sustainability in the built environment that will occur in the years ahead. The emphasis throughout is on emerging systems innovations and bold new ways of imagining and re-imagining urban retrofitting, set within the context of 'futures-based' thinking. The concept of urban retrofitting has gained prominence within both the research and policy arenas in recent years. While cities are often viewed as a source of environmental stress and resource depletion they are also hubs of learning and innovation offering enormous potential for scaling up technological responses. But city-level action will require a major shift in thinking and a scaling up of positive responses to climate change and the associated threats of environmental and social degradation. Clearly the time has come for a more coordinated, planned, and strategic approach that will allow cities to transition to a sustainable future. This book summarizes many of the best new ideas currently in play on how to achieve those goals. Reviews the most promising ideas for how to approach planning and coordinating a more sustainable urban future by 2050 through retrofitting existing structures Explores how cities need to govern for urban retrofit and how future urban transitions and pathways can be managed, modeled and navigated Offers inter-disciplinary insights from international contributors from both the academic and professional spheres Develops a rigorous conceptual framework for analyzing existing challenges and fostering innovative ways of addressing those challenges *Retrofitting Cities for Tomorrow's World* is must-reading for academic researchers, including postgraduates insustainability, urban planning, environmental studies, economics, among other fields. It is also an important source of fresh ideas and inspiration for town planners, developers, policy advisors, and consultants working within the field of sustainability, energy, and the urban environment.

Solid waste management in the world's cities. UN-Habitat, 2010 In our rapidly urbanizing global society, solid waste management will be a key challenge facing all the world's cities. This title provides a fresh perspective and data on one of the biggest issues in urban development.

China, 1993-01-01 The Republic of Korea's industrial policy has directed that nation's economy through nearly three decades of spectacular growth. But the authors of this paper maintain that this policy is showing signs of being outmoded. The time has come, the authors argue, for the Korean government to stop managing the economy's structural development and to redefine the responsibilities of business and government. Under this proposed compact, the allocation of resources would shift from the government to the private industrial and financial sectors. The transformation of the government bureaucracy from an ad hoc policy role to one of a transparent and predictable regulator is a key to the success of this undertaking. These new directions would present the government with enormous challenges. Greater competitive discipline and regulatory oversight would be required. While dealing with the complexities of the transition, the government would have to maintain macroeconomic stability and the momentum of savings and investment. For comparison, the study examines the industrial economies of France, Germany, Japan, and the United States, which underwent similar shifts.

The Creative Destruction of New York City Alessandro Busà, 2017-08-07 Bill de Blasio's campaign rhetoric focused on a tale of two cities: rich and poor New York. He promised to value the needs of poor and working-class New Yorkers, making city government work better for everyone-not just those who thrived during Bloomberg's tenure as mayor. But well into de Blasio's administration, many critics think that little has changed in the lives of struggling New Yorkers, and that the gentrification of New York City is expanding at a record pace across the five boroughs. Despite the mayor's goal of creating more affordable housing, Brooklyn and Manhattan sit atop the list of the most unaffordable housing markets in the country. It seems that the old adage is becoming truer: New York is a place for only the very rich and the very poor. In *The Creative Destruction of New York City*, urban scholar Alessandro Busà travels to neighborhoods across the city, from Harlem to Coney Island, from Hell's Kitchen to East New York, to tell the story of fifteen years of drastic rezoning and rebranding, updating the tale of two New Yorks. There is a gilded city of sky-high glass towers where Wall Street managers and foreign billionaires live-or merely store their cash. And there is another New York: a place where even the professional middle class is one rent hike away from displacement. Despite de Blasio's rhetoric, the trajectory since Bloomberg has been remarkably consistent. New York's urban development is changing to meet the consumption demands of the very rich, and real estate moguls' power has never been greater. Major players in real estate, banking, and finance have worked to ensure that, regardless of changes in leadership, their interests are safeguarded at City Hall. *The Creative Destruction of New York City* is an important chronicle of both the success of the city's elite and of efforts to counter the city's march toward a glossy and exclusionary urban landscape. It is essential reading for everyone who cares about affordable housing access and, indeed, the soul of New York City.

Cities and Inequalities in a Global and Neoliberal World Faranak Miraftab, David Wilson, Ken Salo, 2015-04-24 Cities continue to be key sites for the

production and contestation of inequalities generated by an ongoing but troubled neoliberal project. Neoliberalism's onslaught across the globe now shapes diverse inequalities -- poverty, segregation, racism, social exclusion, homelessness -- as city inhabitants feel the brunt of privatization, state re-organization, and punishing social policy. This book examines the relationship between persistent neoliberalism and the production and contestation of inequalities in cities across the world. Case studies of current city realities reveal a richly place-specific and generalizable neoliberal condition that further deepens the economic, social, and political relations that give rise to diverse inequalities. Diverse cases also show how people struggle against a neoliberal ethos and hence the open-endedness of futures in these cities.

Demolition on Karl Marx Square Andrew Demshuk, 2017-08-30 Communist East Germany's demolition of Leipzig's perfectly intact medieval University Church in May 1968 was an act decried as cultural barbarism across the two Germanies and beyond. Although overshadowed by the crackdown on Prague Spring mere weeks later, the willful destruction of this historic landmark on a central site symbolically renamed Karl Marx Square represents an essential turning point in the relationship between the Communist authorities and the people they claimed to serve. As the largest case of public protest in East German history between the 1953 Uprising and 1989 Revolution, this intimate local trauma exhibits the inner workings of a dictatorial system and exposes the often gray and overlapping lines between state and citizenry, which included both quiet and open resistance, passive and active collaboration. Through deep analysis of untapped periodicals and archives (including once-classified State documents, Stasi, and police records, and extensive private protest letters), it introduces a broad cast of characters who helped make the inconceivable possible, and restores the voices of not a few ordinary citizens of all stripes who dared in the name of culture, humanism, and civic pride to protest what they saw as an inconceivable tragedy. In this city that later started the 1989 October Revolution which ultimately triggered the fall of the Berlin Wall, residents from every social background desperately hoped to convince their leaders to step back from the brink. But as the dust cleared in 1968, they saw with all finality that their voices meant nothing, that the DDR was a sham democracy awash with utopian rhetoric that had no connection with their everyday lives. If Communism died in Prague in 1968, it had already died in Leipzig just weeks before, with repercussions that still haunt today's politics of memory.

The SAGE Handbook of New Urban Studies John Hannigan, Greg Richards, 2017-05-01 The last two decades have been an exciting and richly productive period for debate and academic research on the city. The SAGE Handbook of New Urban Studies offers comprehensive coverage of this modern re-thinking of urban theory, both gathering together the best of what has been achieved so far, and signalling the way to future theoretical insights and empirically grounded research. Featuring many of the top international names in the field, the handbook is divided into nine key sections: SECTION 1: THE GLOBALIZED CITY SECTION 2: URBAN ENTREPRENEURIALISM, BRANDING, GOVERNANCE SECTION 3: MARGINALITY, RISK AND RESILIENCE SECTION 4: SUBURBS AND SUBURBANIZATION: STRATIFICATION, SPRAWL, SUSTAINABILITY SECTION 5: DISTINCTIVE AND VISIBLE CITIES SECTION 6: CREATIVE CITIES SECTION 7: URBANIZATION, URBANITY AND URBAN LIFESTYLES SECTION 8: NEW DIRECTIONS IN URBAN THEORY SECTION 9: URBAN FUTURES This is a central resource for researchers and students of Sociology, Cultural Geography and Urban Studies.

Beyond Smart Cities José A. Ondiviela, 2021-10-21 Cities are experiencing unprecedented times. In addition of managing the best possible post-pandemic recovery, Cities are at the beginning of the 4th industrial revolution, and all want to play a relevant role in it. To achieve this, they must retain and attract the necessary talent. There is a fierce competition where cities transform to become as attractive as possible. But what makes a city attractive (from emotional and rational sides) to talented citizens? For mayors and city directors: how can I prepare my city for this goal? What kind of transformations in the medium-long term should I develop? And in the short term, what processes and technologies (SmartCity) should I put in place? And from the point of view of citizens: how do I choose the best city to develop my full potential? Which one offers me the best citizenship contract? Where am I going to enjoy the best services with the highest quality of life and lower taxes/cost of life? In addition, the city must be attractive, with a strong identity and dynamism and promising future. Can I find the cities that best suit my aesthetic and emotional preferences, and that also offer me the services that I consider a priority at the lowest cost to my pocket? Find all the answers in this book.

The New Urban Area Development Zisheng Shao, 2015-08-19 This book examines the formation trajectory and development path of China's newly formed urban areas, which was the result of an unprecedented massive urbanization process. The analysis is based on the case of Dezhou, Shandong Province. This book systematically introduces strategic studies, planning and design, development and construction, investments, policies and future development of new urban areas. The book broadly summarizes strategies used for new urban area development and the concrete methods implemented in place. In-depth analysis into the selected case areas also reveal some critical issues emerged from the Chinese practice in urbanization. In general, this book provides a useful reference for government leaders, urbanization researchers, city planners, city economic policy makers and researchers interested in related areas.

A Better Metro Manila? Teresa S. Encarnacion Tadem, Maria Ela L. Atienza, 2023-02-28 This book contributes to efforts in furthering the democratization and development processes in the Philippines by examining the decentralization efforts in Metro Manila. It explores existing as well as proposed development models for governance with focus on the effective and efficient delivery of social services, bringing forth growth with equity through development efforts, and addressing national-local concerns to promote political and socio-economic stability in the country. In doing so, the book examines the strong and weak governance points in the National Capital Region of the Philippines, and identifies areas for reform.

Olympic Cities John Gold, Margaret M Gold, 2024-04-09 The first edition of *Olympic Cities*, published in 2007, provided a pioneering overview of the changing relationship between cities and the modern Olympic Games. This substantially revised and much enlarged fourth edition builds on the success of its predecessors. The first of its three parts provides overviews of the urban legacy of the four component Olympic festivals: the Summer Games; Winter Games; Cultural Olympiads; and the Paralympics. The second part comprises systematic surveys of six key aspects of activity involved in staging the Olympics and Paralympics: finance; sustainability; the creation of Olympic Villages; security; urban regeneration; and tourism. The final part consists of ten chronologically arranged portraits of host cities from 1960 to 2032, with complete coverage of the Summer Games of the twenty-first century. As controversy over the growing size and expense of the Olympics, with associated issues of democratic accountability and legacy, continues unabated, this book's incisive and timely assessment of the Games' development and the complex agendas that host cities attach to the event will be essential reading for a wide audience. This will include not just urban and sports historians, urban geographers, event managers, and city planners, but also anyone with an interest in the staging of mega-events and concerned with building a better understanding of the relationship between cities, sport, and culture.

Post-Disaster Reconstruction of the Built Environment Dilanthi Amaratunga, Richard Haigh, 2011-06-13 Disasters threaten all parts of the world and they appear to be increasing in frequency, scale and intensity. Despite huge improvements in the emergency response, permanent reconstruction is often uncoordinated, inefficiently managed and slow to begin. International agencies are geared to an efficient response in terms of humanitarian relief, but they are not well versed in the requirements of long-term reconstruction, which is often constrained by lack of planning and poorly coordinated management. The construction industry is typically engaged in a range of critical activities after a disaster, including provision of temporary shelter in the immediate aftermath

and restoration of permanent shelter and public infrastructure once the immediate humanitarian needs have been attended to. Post-Disaster Reconstruction of the Built Environment identifies the challenges that face the industry and highlights best practice to enable the construction industry to address those problems which make an effective response to these unexpected events difficult. Written by an international team of experts, this book will help researchers and advanced students of construction understand the problems faced by communities and the construction industry when faced with a natural or man-made disaster, and identify the planning and management processes required by the industry to mount an effective response.

Olympic Cities John R. Gold,Margaret M. Gold,2010-09-06 Providing a full overview of the changing relationship between cities and the Olympic events, this substantially revised and enlarged edition builds on the success of its predecessor. Its coverage takes account of important new scholarship as well as adding reflections on the experience of staging Beijing 2008 and Vancouver 2010, the state of preparations for London 2012, and the plans for the Games scheduled for Sochi in 2014 and Rio de Janeiro 2016. The book is divided into three parts that provide overviews of the urban legacy of the four component Olympic festivals, systematic surveys of five key aspects of activity involved in staging the Olympics and ten chronologically arranged portraits of host cities. As controversy over the growing size and expense of the Olympics continues, this timely assessment of the Games’ development and the complex agendas that host cities attach to the event will be essential reading for urban and sports historians, urban geographers, planners and all concerned with understanding the relationship between cities and culture. Olympic Cities is one of the Routledge books of the month for December 2010

The Routledge Handbook on Cities of the Global South Susan Parnell,Sophie Oldfield,2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism. This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting, the imperative for multiple genealogies of knowledge production, as well as a diversity of empirical entry points to understand contemporary urban dynamics. The Handbook works towards a geographical realignment in urban studies, bringing into conversation a wide array of cities across the global south – the ‘ordinary’, ‘mega’, ‘global’ and ‘peripheral’. With interdisciplinary contributions from a range of leading international experts, it profiles an emergent and geographically diverse body of work. The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in, or of, the global south; arguments that are fluid and increasingly contested geographically and conceptually. It reflects on critical urbanism, the macro- and micro-scale forces that shape cities, including ideological, demographic and technological shifts, and constantly changing global and regional economic dynamics. Working with southern reference points, the chapters present themes in urban politics, identity and environment in ways that (re)frame our thinking about cities. The Handbook engages the twenty-first-century city through a ‘southern urban’ lens to stimulate scholarly, professional and activist engagements with the city.

Shrinking Cities in Reunified East Germany Agim Kërçuku,2022-10-03 The book explores the relationship between the shrinking process and architecture and urban design practices. Starting from a journey in former East Germany, six different scenes are explored in which plans, projects, and policies have dealt with shrinkage since the 1990s. The book is a sequence of scenes that reveals the main characteristics, dynamics, narratives, reasons and ambiguities of the shrinking cities’ transformations in the face of a long transition. The first scene concerns the demolition and transformation of social mass housing in Leinefelde-Worbis. The second scene deals with the temporary appropriation of abandoned buildings in Halle-Neustadt. The third scene, observed in Leipzig, shows the results of green space projects in urban voids. The scene of the fourth situation observes the extraordinary efforts to renaturise a mining territory in the Lausitz region. The fifth scene takes us to Hoyerswerda, where emigration and ageing process required a reduction and demolition in housing stock and social infrastructures. The border city of Görlitz, the sixth and last scene, deals with the repopulation policies that aim to attract retirees from the West.
