Globalization and Urban Implosion Remo Dalla Longa,2009-12-03 In the past twenty years, globalization has rendered many economic and social urban functions obsolete. Large cities face a form of implosion, which necessitates a rethinking of both contents and containers. This book will mainly concentrate on the latter aspect. Thus, the need to replace old functions with new ones is clear, especially within complex urban areas where the connections between public and private assets are strongest. In this context, new forms of urban models, Public Private Partnerships, tools and drivers – various decision makers who have to operate within complex urban areas – have to be considered. Hence, the creation or destruction of values depends on how new functions replace old ones. This also explains new and important forms of competitive advantage, among large globalized cities. This book presents a model of complex urban interventions. Based on a literature review, the model integrates different forms of Public Private Partnerships (PPPs), new tools and instruments associated with governance (issues/challenges), and new profiles of public drivers. By analyzing a number of European urban centers, this book illustrates the implementation of the general model in specific case studies and, furthermore, shows the essential differences between post-socialist and Western cities.

Rubble Jeff Byles,2007-12-18 From the straight boulevards that smashed their way through rambling old Paris to create the city we know today to the televised implosion of Las Vegas casinos to make room for America's ever grander desert of dreams, demolition has long played an ambiguous role in our lives. In lively, colorful prose, Rubble rides the wrecking ball through key episodes in the world of demolition. Stretching over more than five hundred years of razing and toppling, this story looks back to London's Great Fire of 1666, where self-deputized wreckers artfully blew houses apart with barrels of gunpowder to halt the furious blaze, and spotlights the advent of dynamite—courtesy of demolition's patron saint, Alfred Nobel—that would later fuel epochal feats of unbuilding such as the implosion of the infamous Pruitt-Igoe housing complex in St. Louis. Rubble also delves beyond these bravura blasts to survey the world-jarring invention of the wrecking ball; the oddly stirring ruin of New York's old Pennsylvania Station, that potent symbol of the wrecker run amok; and the ever busy bulldozers in places as diverse as Detroit, Berlin, and the British countryside. Rich with stories of demolition's quirky impresarios—including Mark Loizeaux, the world-famous engineer of destruction who brought Seattle's Kingdome to the ground in mere seconds—this account makes first-hand forays to implosion sites and digs extensively into wrecking's little-known historical record. Rubble is also an

exploration of what happens when buildings fall, when monuments topple into memory, and when “destructive creativity” tears down to build again. It unearths the world of demolition for the first time and, along the way, throws a penetrating light on the role that destruction must play in our lives as a necessary prelude to renewal. Told with arresting detail and energy, this tale goes to the heart of the scientific, social, economic, and personal meaning of how we unbuild our world. Rubble is the first-ever biography of the wrecking trade, a riveting, character-filled narrative of how the black art of demolition grew to become a multibillion-dollar business, an extreme spectator sport, and a touchstone for what we value, what we disdain, who we were, and what we wish to become.

**Strong Towns** Charles L. Marohn, Jr.,2019-10-01 A new way forward for sustainable quality of life in cities of all sizes Strong Towns: A Bottom-Up Revolution to Build American Prosperity is a book of forward-thinking ideas that breaks with modern wisdom to present a new vision of urban development in the United States. Presenting the foundational ideas of the Strong Towns movement he co-founded, Charles Marohn explains why cities of all sizes continue to struggle to meet their basic needs, and reveals the new paradigm that can solve this longstanding problem. Inside, you’ll learn why inducing growth and development has been the conventional response to urban financial struggles—and why it just doesn’t work. New development and high-risk investing don’t generate enough wealth to support itself, and cities continue to struggle. Read this book to find out how cities large and small can focus on bottom-up investments to minimize risk and maximize their ability to strengthen the community financially and improve citizens’ quality of life. Develop in-depth knowledge of the underlying logic behind the “traditional” search for never-ending urban growth Learn practical solutions for ameliorating financial struggles through low-risk investment and a grassroots focus Gain insights and tools that can stop the vicious cycle of budget shortfalls and unexpected downturns Become a part of the Strong Towns revolution by shifting the focus away from top-down growth toward rebuilding American prosperity Strong Towns acknowledges that there is a problem with the American approach to growth and shows community leaders a new way forward. The Strong Towns response is a revolution in how we assemble the places we live.

**Crash Burn Love** Bill Lowenburg,2005 Demolition derbies began in the late 1950s and today an estimated one million fans attend the 1,500 to 2,500 or more demolition derbies held around the United States each year. This book details both the public and private side of a wildly popular yet little understood American sport.

*Demolition Angel* Robert Crais, 2020-05-26 “Crais is at the top of his game, and *Demolition Angel* delivers the goods. With a bang. . . . It’s *Silence of the Lambs* meets *Speed*. . . . Crais knows how to press all the right buttons in keeping the story line taut and the action, well, explosive.”—San Francisco Chronicle Carol Starkey is struggling to pick up the pieces of her former life as L.A.’s finest bomb squad technician. Fueled with liberal doses of alcohol and Tagamet, she’s doing time as a Detective-2 with LAPD’s Criminal Conspiracy Section. Three years have passed since the event that still haunts her: a detonation that killed her partner and lover, scarred her body and soul, and ended her career as a bomb tech. When a seemingly innocuous bomb call explodes into a charred murder scene, Carol catches the case and embarks on an investigation of a series of explosions that reveal chilling intentions. The bombs are designed expressly to kill bomb technicians. Now, as the one tech who survived the deadliest of blasts, Carol is in for the most perilous fight of her life. . . . Praise for *Demolition Angel* “Terrific . . . explosive . . . [a] high powered thrill ride.”—The Wall Street Journal “Gripping . . . Crais piles on plot twists . . . gathering the separate threads at the end and igniting them like a string of fireworks.”—People “A powerful, self-contained novel of suspense that has the compactness, velocity, and effectiveness of a well-aimed bullet . . . This is a thriller that works on every level, a pivotal work from a crime novelist operating at the top of his game.”—Los Angeles Times “Fascinating and frighteningly believable . . . Starkey is one of the toughest characters to grace the crowded field of thriller books in a long time.”—USA Today “A flammable techno-thriller with the kind of force that knocks out windows.”—The New York Times Book Review Packs an explosive punch. Though the pace of the book moves like a quick-burning fuse, Crais still takes the time in *Demolition Angel* to sketch out some memorable characters: Starkey, haunted and hollow-eyed, covering up her pain with a Bogart-tough demeanor; and John Michael Fowles (aka Mr. Red), a sociopath who gets all sorts of information from the Internet without breaking a sweat. . . . Crais keeps things wound so tight that readers will be getting paper cuts in their rush to finish this one.”—The Denver Post

**Unbuilding David Macaulay,1987-10-26** “In this wonderfully urbane fantasy” the Caldecott Medal-winning author and illustrator imagines the process of dismantling the Empire State Building (Publishers Weekly). The acclaimed author of *City and Pyramid* now applies his inquisitive mind and stunningly detailed artwork to one of New York’s most iconic buildings. When the Empire State Building is purchased by an eccentric prince who wants to move it to the Arabian Desert, the intricate process of unbuilding begins. Along the way, Macaulay takes young readers on a tour of the skyscraper’s history and architecture and explains the many feats of engineering that went into its construction. His straightforward, informative text is illustrated with “perhaps the finest series of visually expansive, black-and-white perspective drawings, incisive renderings of the skyscraper and its celebrated ‘views’” (The Washington Post).

*Megadeth* Bill Hale, 2012-03-13 *Megadeth: Another Time, A Different Place* gives the audience a front-row seat into the early days and meteoric rise of this young band who would become one of the most influential groups of all time and, with Anthrax, Slayer, and Metallica, consistently touted among the best thrash metal bands ever to cross the stage. This is the first Megadeth photography book and only the second book documenting their rise to rock glory, including rare, never-before-seen photographs representing a small but crucial period of time in their career. Hale's photographs, from intimate backstage photographs to screaming, kinetic live shots, are the images of a young band prepared to take on the world. The 'work' that you hold in your hands now is the work of a friend, who

is also a 'photo-grrrrrr-apher,' and who has captured the very essence of my career: hungry, gritty, hard, cold, impersonal, personal, and very personal. Also, the sensitive unseen side of me, which was somewhat of an anomaly with the public and left me an enigma to my peers. -Dave Mustaine from the Foreword

**The Temple of Venus and Rome and Santa Francesca Romana at the Roman Forum** Cristina González-Longo, 2020-12-29 This book examines the influence of architectural design in the conservation of historic buildings by discussing in detail an important building complex in Rome: the Temple of Venus and Rome, the monastery of Santa Maria Nova and the church of Santa Francesca Romana. As the most complete site in the Roman Forum that has reached our times with a rich architectural stratification almost intact, it is a clear product of continuous preservation and transformation and it has not been studied in its complexity until now. The Temple of Venus and Rome and Santa Francesca Romana at the Roman Forum unravels the original designs and the subsequent interventions, including Giacomo Boni's pioneering conservation of the monastery, carried out while excavating the Roman Forum in the early twentieth century. The projects are discussed in context to show their significance and the relationships between architects and patrons. Through its interdisciplinary focus on architectural design, conservation, archaeology, history and construction, this study is an ideal example for scholars, students and architects of how to carry out research in architectural conservation.
