Making a Scene in the Pulpit Alyce M. McKenzie,2018-10-23 How can preachers ensure that their sermons continue to engage listeners in a world defined by visual media and the short, segmented delivery of information? Alyce McKenzie harnesses the element of drama and the human fascination with scenes to offer ministers a modern means of sermon development and delivery. McKenzie's core strategy is to invite listeners into scenes—whether from Scripture or contemporary life—and, once they are there, to point them toward the larger story of God's relationship with humankind. Creating such scenes unifies the whole process of preaching, she says, from the preacher's daily life observations to interpretation of scenes from Scripture, to sermon shaping, sequencing, and delivery. The process culminates in a specific understanding of the purpose of the sermon: to send listeners out into the scenes they'll play in their lives for the next week, equipped to act out their parts in ways that are kinder, more just, and more courageous than last week.

Destructive Organizational Communication Pamela Lutgen-Sandvik,Beverly Davenport Sypher,2010-03-17 This volume provides an in-depth consideration of destructive communication in organizations -- including workplace bullying, racism, stress, and harassment. It brings together communication scholars from theoretical and applied perspectives to assess current understandings, explore ways to integrate theory and practice, identify areas for change, and outline a research agenda for the coming decade. Each chapter examines a specific aspect of destructive organizational communication, reviews existing theory and research about that communicative form or ideology, suggests fruitful possibilities for application, and suggests key areas for further study. As such, the book opens a dialogue among communication scholars that explores destructive communication in organizations and addresses the following key components: the central issues and concerns regarding destructive organizational communication, current scholarly contributions to both applied and theoretical understanding of these issues, approaches to integrate applied/experienced and theoretical/conceptual perspectives in ways that inform one another and improve organizational considerations for varied stakeholders, and suggestions for a future research agenda for those interested in ameliorating the destructive side of organizational communication. Overall, the collection provides a basic understanding of the different types of destructive communication in organizations, the processes through which these interactions occur, the consequences to individuals and organizations, and the potential for organizing in more constructive, civil ways. This volume will be an excellent resource for scholars and researcher studying organizational communication, and graduate and advanced undergraduate students in organizational communication. It will also resonate with managers dealing with hostile workplaces, and organizational members trying to understand their current experiences. The book will serve as an excellent textbook for advanced undergraduate and graduate courses in organizational communication.

Supporting Real Time Decision-Making Frada Burstein, Patrick Brézillon, Arkady Zaslavsky, 2010-11-12 This volume of *Annals of Information Systems* will acknowledge the twentieth anniversary of the founding of the International Society for Decision Support Systems (ISDSS) by documenting some of the current best practices in teaching and research and envisioning the next twenty years in the decision support systems field. The volume is intended to complement existing DSS literature by offering an outlet for thoughts and research particularly suited to the theme of describing the next twenty years in the area of decision support. Several subthemes are planned for the volume. One subtheme draws on the assessments of internationally known DSS researchers to evaluate where the field has been and what has been accomplished. A second subtheme of the volume will be describing the current best practices of DSS research and teaching efforts. A third subtheme will be an assessment by top DSS scholars on where the DSS discipline needs to focus in the future. The tone of this volume is one of enthusiasm for the potential contributions to come in the area of DSS; contributions that must incorporate an understanding of what has been accomplished in the past, build on the best practices of today, and be integrated into future decision making practices.

Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Framing Fan Fiction Kristina Busse, 2017-10 Gathering some of Kristina Busse's essential essays on fan fiction together with new work, *Framing Fan Fiction* argues that understanding media fandom requires combining literary theory with cultural studies because fan artifacts are both artistic works and cultural documents. Drawing examples from a multitude of fan communities and texts, Busse frames fan fiction in three key ways: as individual and collective erotic engagement; as a shared interpretive practice in which tropes constitute shared creative markers and illustrate the complexity of fan creations; and as a point of contention around which community conflicts over ethics play out. Moving between close readings of individual texts and fannish tropes on the one hand, and the highly intertextual embeddedness of these communal creations on the other, the book demonstrates that fan fiction is simultaneously a literary and a social practice. *Framing Fan Fiction* deploys personal history and the interpretations of specific stories to contextualize fan fiction culture and its particular forms of intertextuality and performativity. In doing so, it highlights the way fans use fan fiction's reimagining of the source material to explore issues of identities and performativities, gender and sexualities, within a community of like-minded people. In contrast to the celebration of originality in many other areas of artistic endeavor, fan fiction celebrates repetition, especially the collective creation and circulation of tropes. An essential resource for scholars, *Framing Fan Fiction* is also an ideal starting point for those new to the study of fan fiction and its communities of writers.

International Law's Objects Jessie Hohmann, Daniel Joyce, 2019-01-20 International law's rich existence in the world can be illuminated by its objects. International law is often developed, conveyed, and authorized through its objects and/or their representation. From the symbolic (the regalia of the head of state and the symbols of sovereignty), to the mundane (a can of dolphin-safe tuna certified as complying with international trade standards), international legal authority can be found in the objects around us. Similarly, the practice of international law often relies on material objects or their image, both as evidence (satellite images, bones of the victims of mass atrocities) and to found authority (for instance, maps and charts). This volume considers these questions: firstly what might the study of international law through objects reveal? What might objects, rather than texts, tell us about sources, recognition of states, construction of territory, law of the sea, or international human rights law? Secondly, what might this scholarly undertaking reveal about the objects-as aims or projects-of international law? How do objects reveal, or perhaps mask, these aims, and what does this tell us about the reasons some (physical or material) objects are foregrounded, and others hidden or ignored. Thirdly what objects, icons, and symbols preoccupy the profession and academy? The personal selection of these objects by leading and emerging scholars worldwide will illuminate the contemporary and historical fascinations of international lawyers. By considering international law in the context of its material culture the authors offer a new and exciting theoretical perspective on the subject. With an image of each object reproduced in full colour, the book will make an engaging and interesting read for scholars, practitioners, and students alike.
