**Transit Noise and Vibration Impact Assessment** ,1995

This manual provides direction for the preparation of noise and vibration sections of environmental documents for mass transportation projects. The manual has been developed in the interest of promoting quality and uniformity in assessments. It is expected to be used by people associated with or affected by the urban transit industry, including Federal Transit Administration (FTA) staff, grant applicants, consultants and the general public. Each of these groups has an interest in noise/vibration assessment, but not all have the need for all the details of the process. Consequently, this manual has been prepared to serve readers with varying levels of technical background and interests. It sets forth the basic concepts, methods and procedures for documenting the extent and severity of noise impacts from transit projects.

Better Buses, Better Cities Steven Higashide, 2019-10-10

Imagine a bus system that is fast, frequent, and reliable--what would that change about your city? Buses can and should be the cornerstone of urban transportation. They offer affordable mobility and can connect citizens with every aspect of their lives. But in the US, they have long been an afterthought in budgeting and planning. Transit expert Steven Higashide uses real-world stories of reform to show us what a successful bus system looks like. Higashide explains how to marshal the public in support of better buses and argues that better bus systems will create better cities for all citizens. With a compelling narrative and actionable steps, Better Buses, Better Cities describes how decision-makers, philanthropists, activists, and public agency leaders can work together to make the bus a win in any city.

The Colorado Trail Colorado Trail Foundation, Colorado Mountain Club, 2006 The Colorado Trail is the only guide available for thru-hikers, day hikers, mountain bikers, trail runners, and equestrians to the extraordinary Colorado Trail that stretches 468 miles from Denver to Durango. The completely revised 7th edition includes text and map revisions for several sections where reroutes of the trail have taken place, as well as 90 colour pictures, 28 segment maps, elevation profiles, integrated GPS waypoints, town maps and mountain bike detours of Wilderness Areas. The Colorado Trail (CT) is one of the premier scenic long trails in North America. It winds its way through

endless fields of wildflowers to windy mountain passes, from wild mountain rivers and streams to winding trails through old growth forests. The CT crosses eight mountain ranges, seven National Forests, six Wilderness Areas and five river systems. Starting near Denver at 5,500 feet and ending near Durango at 7,000 feet, the CT gains and loses almost 76,000 feet in elevation over 468 miles. New to this edition are revisions of four of the 28-segment trail descriptions including sections 8, 11, 23 and 24.

*Transportation Decision Making* Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and

publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decision making. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

**Ridesharing as a Complement to Transit**, 2012 TRB's Transit Cooperative Research Program (TCRP) Synthesis 98: Ridesharing as a Complement to Transit explores current practices in using ridesharing to complement public transit and highlights ways to potentially enhance ridesharing and public transit.

**Internet of Things From Hype to Reality** Ammar Rayes, Samer Salam, 2016-10-22 This book comprehensively describes an end-to-end Internet of Things (IoT) architecture that is comprised of devices, network, compute, storage, platform, applications along with management and security components. It is organized into five main parts, comprising of a total of 11 chapters. Part I presents a generic IoT reference model to establish a common vocabulary for IoT solutions. This includes a detailed description of the Internet protocol layers and the Things (sensors and actuators) as well as the key business drivers to realize the IoT vision. Part II focuses on the IoT requirements that impact networking protocols and provides a layer-by-layer

walkthrough of the protocol stack with emphasis on industry progress and key gaps. Part III introduces the concept of Fog computing and describes the drivers for the technology, its constituent elements, and how it relates and differs from Cloud computing. Part IV discusses the IoT services platform, the cornerstone of the solution followed by the Security functions and requirements. Finally, Part V provides a treatment of the topic of connected ecosystems in IoT along with practical applications. It then surveys the latest IoT standards and discusses the pivotal role of open source in IoT. “Faculty will find well-crafted questions and answers at the end of each chapter, suitable for review and in classroom discussion topics. In addition, the material in the book can be used by engineers and technical leaders looking to gain a deep technical understanding of IoT, as well as by managers and business leaders looking to gain a competitive edge and understand innovation opportunities for the future.” Dr. Jim Spohrer, IBM “This text provides a very compelling study of the IoT space and achieves a very good balance between engineering/technology focus and business context. As such, it is highly-recommended for anyone interested in this rapidly-expanding field and will have broad appeal to a wide cross-section of readers, i.e., including engineering professionals, business analysts, university students, and professors.” Professor Nasir Ghani, University of South Florida

**Girl of Shadows** Deborah Challinor, 2013-12-01 The adventures of the transported convict women continue in this stunning sequel to *Behind the Sun*. Philippa Gregory meets Bryce Courtenay as Sydney's history comes vividly to life. What had they done? What had she and Sarah and Friday done? 1830: Convict girls Friday Woolfe, Harriet Clarke and Sarah Morgan have been transported to Sydney from London. Sarah has been assigned to jeweller Adam Green, Harriet is a maid for the Barrett family, and Friday is working as a prostitute in a brothel. Each of them is struggling to forget the brutal crime they committed. But their

fate is no longer theirs to control. Vicious underworld queen Bella Jackson holds the girls' futures in the palm of her hand, biding her time until she exacts payment for what she knows about their misdeeds. Harriet, racked with guilt, becomes convinced that their lost friend is haunting them, and while Friday succumbs to the bottle, Sarah has to fight for everything she holds dear. Once again, the girls must join forces to save one of their own. But which one? And in the background Bella Jackson waits and watches ... Praise for Deborah Challinor: 'Challinor is a good storyteller; her characters have depth and her historical backdrops are well researched, seamlessly joining fact and fiction and creating a convincing, atmospheric yarn' Bookseller + Publisher 'Seamlessly fuses historical fact and engrossing fiction' Queensland times
