**Opera on Screen** Marcia J. Citron,Professor Marcia J Citron,2000-01-01 The author draws on ideas from diverse fields, including media studies and gender studies, to examine issues ranging from the relationship between sound and image to the place of the viewer in relation to the spectacle. As she raises questions about divisions between high art and popular art and about the tensions between live and reproduced art forms, Citron reveals how screen treatments reinforce opera's vitality in a media-intensive age.--BOOK JACKET.

**Vocal Apparitions** Michal Grover-Friedlander,2014-12-25 Cinema and opera have become intertwined in a variety of powerful and unusual ways. Vocal Apparitions tells the story of this fascinating intersection, interprets how it occurred, and explores what happens when opera is projected onto the medium of film. Michal Grover-Friedlander finds striking affinities between film and opera--from Lon Chaney's classic silent film, The Phantom of the Opera, to the Marx Brothers' A Night at the Opera to Fellini's E la nave va. One of the guiding questions of this book is what occurs when what is aesthetically essential about one medium is transposed into the aesthetic field of the other. For example, Grover-Friedlander's comparison of an opera by Poulenc and a Rossellini film, both based on Cocteau's play The Human Voice, shows the relation of the vocal and the visual to be surprisingly affected by the choice of the medium. Her analysis of the Marx Brothers' A Night at the Opera demonstrates how, as a response to opera's infatuation with death, cinema comically acts out a correction of opera's fate. Grover-Friedlander argues that filmed operas such as Zeffirelli's Otello and Friedrich's Falstaff show the impossibility of a direct transformation of the operatic into the cinematic. Paradoxically, cinema at times can be more operatic than opera itself, thus capturing something essential that escapes opera's self-understanding. A remarkable look at how cinema has been haunted--and transformed--by opera, Vocal Apparitions reveals something original and important about each medium.

**Sustainable Financial Innovation** Karen Wendt,2018-12-12 Innovations and consequently future-fitness must form new models and address existing hurdles and new forms of collaborations. *Music, Imagination, and Culture* Nicholas Cook,1990 Musicians imagine music by means of functional models which determine certain aspects of the music while leaving others open. This gap between image and the experience it models offers a source of compositional creativity; different musical cultures embody different ways of imagining sound as music. Drawing on psychological and philosophical materials as well as the analysis of specific musical examples, Cook here defines the difference between music theory and aesthetic criticism, and affirms the importance of the ordinary listener in musical culture.

**Music: A Very Short Introduction** Nicholas Cook,2000-02-24 This stimulating Very Short Introduction to music invites us to really think about music and the values and qualities we ascribe to it. The world teems with different kinds of music-traditional, folk, classical, jazz, rock, pop-and each type of music tends to come with its own way of thinking. Drawing on a wealth of accessible examples ranging from Beethoven to Chinese zither music, Nicholas Cook attempts to provide a framework for thinking about all music. By examining the personal, social, and cultural values that music embodies, the book reveals the shortcomings of traditional conceptions of music, and sketches a more inclusive approach emphasizing the role of performers and listeners.
