Ingrid Fetell Lee

Joyful Ingrid Fetell Lee, 2018-09-04 Make small changes to your surroundings and create extraordinary happiness in your life with groundbreaking research from designer and TED star Ingrid Fetell Lee. Next Big Idea Club selection—chosen by Malcolm Gladwell, Susan Cain, Dan Pink, and Adam Grant as one of the two most groundbreaking new nonfiction reads of the season! This book has the power to change everything! Writing with depth, wit, and insight, Ingrid Fetell Lee shares all you need to know in order to create external environments that give rise to inner joy. —Susan Cain, author of *Quiet* and founder of Quiet Revolution Have you ever wondered why we stop to watch the orange glow that arrives before sunset, or why we flock to see cherry blossoms bloom in spring? Is there a reason that people—regardless of gender, age, culture, or ethnicity—are mesmerized by baby animals, and can't help but smile when they see a burst of confetti or a cluster of colorful balloons? We are often made to feel that the physical world has little or no impact on our inner joy. Increasingly, experts urge us to find balance and calm by looking inward—through mindfulness or meditation—and muting the outside world. But what if the natural vibrancy of our surroundings is actually our most renewable and easily accessible source of joy? In *Joyful*, designer Ingrid Fetell Lee explores how the seemingly mundane spaces and objects we interact with every day have surprising and powerful effects on our mood. Drawing on insights from neuroscience and psychology, she explains why one setting makes us feel anxious or competitive, while another fosters acceptance and delight—and, most importantly, she reveals how we can harness the power of our surroundings to live fuller, healthier, and truly joyful lives.

Cataloging Cultural Objects Murtha Baca, 2006-06-12 In a visual and artifact-filled world, cataloging one-of-a-kind cultural objects without published guidelines and standards has been a challenge. This cutting-edge reference offers practical resources for cataloging and flexibility to meet the needs of a wide range of institutions—from libraries to museums to archives. Consistently following these guidelines for selecting, ordering, and formatting data used to populate metadata elements in cultural materials' catalog records: Promotes good descriptive cataloging and reduces redundancy Builds a foundation of shared documentation Creates data sharing opportunities Enhances end-user access across institutional boundaries Complements existing standards (AACR) This is a must-have reference for museum professionals, visual resources curators, archivists, librarians and anyone who documents cultural objects (including architecture, paintings, sculpture, prints, manuscripts, photographs, visual media, performance art, archaeological sites, and artifacts) and their images.

The Copyright Wars Peter Baldwin, 2016-05-17 Today's copyright wars can seem unprecedented. Sparked by the digital revolution that has made copyright—and its violation—a part of everyday life, fights over intellectual property have pitted creators, Hollywood, and governments against consumers, pirates, Silicon Valley, and open-access advocates. But while the digital generation can be forgiven for thinking the dispute between, for example, the publishing industry and Google is completely new, the copyright wars in fact stretch back three centuries—and their history is essential to understanding today's battles. *The Copyright Wars*—the first major trans-Atlantic history of copyright from its origins to today—tells this important story. Peter Baldwin explains why the copyright wars have always been driven by a fundamental tension. Should copyright assure authors and rights holders lasting claims, much like conventional property rights, as in Continental Europe? Or should copyright be primarily concerned with giving consumers cheap and easy access to a shared culture, as in Britain and America? *The Copyright Wars* describes how the Continental approach triumphed, dramatically increasing the claims of rights holders. The book also tells the widely forgotten story of how America went from being a leading copyright opponent and pirate in the eighteenth and nineteenth centuries to become the world's intellectual property policeman in the late twentieth. As it became a net cultural exporter and its content industries saw their advantage in the Continental ideology of strong authors' rights, the United States reversed position on copyright, weakening its commitment to the ideal of universal enlightenment—a history that reveals that today's open-access advocates are heirs of a venerable American tradition. Compelling and wide-ranging, *The Copyright Wars* is indispensable for understanding a crucial economic, cultural, and political conflict that has reignited in our own time.

English Composition As A Happening Geoffrey Sirc,2002-04 What happened to the bold, kinky promise of writing instruction in the 1960s? The current conservative trend in composition is analyzed allegorically by Geoffrey Sirc in this book-length homage to Charles Deemer's 1967 article, in which the theories and practices of Happenings artists (multi-disciplinary performance pioneers) were used to invigorate college writing. Sirc takes up Deemer's inquiry, moving through the material and theoretical concerns of such pre- and post-Happenings influences as Duchamp and Pollock, situationists and punks, as well as many of the Happenings artists proper. With this book, already a cult classic, began a neo-avant-garde for composition studies. Winner of the Ross W. Winterowd Award for most outstanding book in composition theory.
