Battleground of Desire Peter N. Stearns, Professor of History and Provost Peter N

Stearns, 1999-04 Stearns (history, Carnegie Mellon University) explores the history of American self control and discusses the wide social implications of self control as a characteristic prescribed by every culture in different ways. He investigates issues that define American attitudes towards morality, sexuality, and disciplines of the body, covering the Victorian legacy through current norms. In comparing trends throughout our cultural history, he points out that there has been no collapse of impulse control or moral demonstration between the eras, only a shift in form. The Psychology of Desire Wilhelm Hofmann, Loran F. Nordgren, 2016-06-29 Providing a comprehensive perspective on human desire, this volume brings together leading experts from multiple psychological subdisciplines. It addresses such key questions as how desires of different kinds emerge, how they influence judgment and decision making, and how problematic desires can be effectively controlled. Current research on underlying brain mechanisms and regulatory processes is reviewed. Cutting-edge measurement tools are described, including practical recommendations for their use. The book also examines pathological forms of desire and the complex relationship between desire and happiness. The concluding section analyzes specific applied domains--eating, sex, aggression, substance use, shopping, and social media.

Facing the Complexities of Women's Sexual Desire Vera S. Maass, 2006-11-22 This book focuses on a problem frequently encountered by sex and family therapists, psychologists and primary care physicians: women's sexual desire or lack thereof. The book covers both research and clinical

interventions, and outlines factors that contribute to the decline in sexual desire in women of various ages. The text describes therapeutic steps which can be undertaken with the guidance of a therapist or by the woman herself.

Coefficient Diagram Method for Control System Design Shunji Manabe, Young Chol Kim, 2021-04-10 This book describes a new control design technique called Coefficient Diagram Method (CDM), whereby practical control engineers without deep control theories and mathematics background can design a good controller for their specific plants. In addition, control experts can solve some complicated design problems. Since the CDM was first introduced in 1998, it reveals from the literature that CDM has provided successful controller designs for a variety of practical control problems. In the last two decades, a great deal of research has been done on CDM, while a growing number of researchers want to learn and utilize the method. However, there has been no textbook to learn it systematically so far. This book is motivated by such a need. It is also suitable as a textbook or reference book for master programs in control engineering.

The Milk is Still Bad and Other Cautionary Tales from a Divorce Lawyer,
A Buddha Land in This World Lajos Brons, 2022-04-13 In the early twentieth century, Uchiyama Gudō, Seno'o Girō, Lin Qiuwu, and others advocated a Buddhism that was radical in two respects. Firstly, they adopted a more or less naturalist stance with respect to Buddhist doctrine and related matters, rejecting karma or other supernatural beliefs. And secondly, they held political and economic views that were radically anti-hegemonic, anti-capitalist, and revolutionary. Taking the idea of such a radical Buddhism seriously, *A Buddha Land in This World: Philosophy, Utopia, and Radical Buddhism* asks whether it is possible to develop a philosophy that is simultaneously naturalist, anti-capitalist, Buddhist, and consistent. Rather than a study of radical Buddhism, then, this book is an attempt to

radicalize it. The foundations of this radicalized radical Buddhism are provided by a realist interpretation of Yogācāra, elucidated and elaborated with some help from thinkers in the broader Tiantai/Tendai tradition and American philosophers Donald Davidson and W.V.O. Quine. A key implication of this foundation is that only this world and only this life are real, from which it follows that if Buddhism aims to alleviate suffering, it has to do so in this world and in this life. Twentieth-century radical Buddhists (as well as some engaged Buddhists) came to a similar conclusion, often expressed in their aim to realize a Buddha land in this world. Building on this foundation, but also on Mahāyāna moral philosophy, this book argues for an ethics and social philosophy based on a definition of evil as that what is or should be expected to cause death or suffering. On that ground, capitalism should be rejected indeed, but utopianism must be treated with caution as well, which raises questions about what it means - from a radicalized radical Buddhist perspective - to aim for a Buddha land in this world. Lajos Brons is a Dutch philosopher and social scientist living in Japan. After receiving a PhD from the University of Groningen in the Netherlands for a dissertation on an aspect of the history and philosophy of the social sciences, he gradually moved further and further into philosophical territory. Currently, Lajos is teaching logic, ethics, and philosophy at a university in Tokyo. His research interests are divided over two broad areas in philosophy: one is in the overlap of (meta-)ethics and social/political philosophy; the other is in the intersection of philosophy of language, metaphysics, and epistemology. Research in the former focuses on the relations between death, suffering, and compassion. Research in the latter concerns the relations between language, thought, and reality, and is heavily influenced by the philosophies of Donald Davidson and W.V.O. Quine, and by Buddhist philosophy. More information about publications and research interests, as well as Lajos's blog can be found at www.lajosbrons.net

Emptiness and Omnipresence Brook A. Ziporyn, 2016-05-02 This “rich and rewarding work” explores the connections between ancient Buddhist doctrine and contemporary philosophy (Publishers Weekly). Tiantai Buddhism emerged in sixth century China from an idiosyncratic and innovative interpretation of the Lotus Sutra. It went on to become one of the most complete, systematic, and influential schools of philosophical thought developed in East Asia. In *Emptiness and Omnipresence*, Brook A. Ziporyn puts Tiantai into dialogue with modern philosophical concerns to draw out its implications for ethics, epistemology, and metaphysics. Ziporyn explains Tiantai’s unlikely roots, its positions of extreme affirmation and rejection, its religious skepticism and embrace of religious myth, and its view of human consciousness. Ziporyn reveals the profound insights of Tiantai Buddhism while stimulating philosophical reflection on its unexpected effects.

The Economy of Esteem Geoffrey Brennan, Philip Pettit, 2004 The authors contend that people care about others’ opinions of them and that the actions they take to raise the esteem they enjoy produce social patterns.

Agent and Multi-Agent Systems: Technologies and Applications Geun Sik Jo, Lakhmi Jain, 2008-03-14 Following from the very successful First KES Symposium on Agent and Multi-Agent Systems – Technologies and Applications (KES-AMSTA 2007), held in Wroclaw, Poland, 31 May–1 June 2007, the second event in the KES-AMSTA symposium series (KES-AMSTA 2008) was held in Incheon, Korea, March 26–28, 2008. The symposium was organized by the School of Computer and Information Engineering, Inha University, KES International and the KES Focus Group on Agent and Multi-agent Systems. The KES-AMSTA Symposium Series is a sub-series of the KES Conference Series. The aim of the symposium was to provide an international forum for scientific research into the technologies and applications of agent and multi-agent systems. Agent and multi-agent systems are related to the

modern software which has long been recognized as a promising technology for constructing autonomous, complex and intelligent systems. A key development in the field of agent and multi-agent systems has been the specification of agent communication languages and formalization of ontologies. Agent communication languages are intended to provide standard declarative mechanisms for agents to communicate knowledge and make requests of each other, whereas ontologies are intended for conceptualization of the knowledge domain. The symposium attracted a very large number of scientists and practitioners who submitted their papers for nine main tracks concerning the methodology and applications of agent and multi-agent systems, a doctoral track and two special sessions.

Granularity: An Ontological Inquiry Into Justice and Holistic Education Şevket Benhür Oral,2023-11-26 This book presents an original exploration of philosophical questions pertaining to the ways we grasp the Absolute by bringing together the Buddhist notion of interpermeation of all phenomena into contemporary strains of thought in continental philosophy. This text introduces an ontological concept, granularity, deploying it to probe questions concerning the intersection of ontology, ethics, and education. A wide range of issues in metaphysics are covered—including being, nothingness, unity, plurality, truth, change, transformation, subjectivity, contradiction, coherence, potentiality—from the perspective of thinkers such as Hegel, Heidegger, Badiou, Meillassoux, Malabou, Žižek, and Harman. The text deploys granularity in arguing for an ethics of unconditional hospitality within education. This volume is intended for students and researchers working in the areas of philosophy of education, philosophy of religion, and continental philosophy.

Self-Regulation and Self-Control Roy Baumeister,2018-01-19 In the World Library of Psychologists series, international experts present career-long collections of what they judge to be their finest pieces—extracts from books, key articles, salient research findings, and their major practical theoretical contributions. In this volume, Roy F. Baumeister reflects on his distinguished career as an eminent scholar in the field of self-control and self-regulation, as well as belonging, rejection, free will, and consciousness. Offering a unique perspective on both the program of research in ego-depletion as one of social psychology's most widely successful theories, and its position in the changing landscape of the scientific field, the book charts Baumeister's development as one of the

pioneers of study into self-control. Featuring a newly written introductory piece in which the author offers a unique insight into the initial findings that led to an eventual theory of ego-depletion, this collection will give readers a vital understanding of how the hugely influential theory of ego depletion first came to be developed, and is essential reading for students and researchers in self-control and self-regulation.
