USN Fleet Destroyer vs IJN Fleet Submarine Mark Stille,2018-11-29 Leading up to the Pacific War, Japanese naval strategists believed that a decisive fleet engagement would be fought against the United States Navy. Outnumbered by the USN, the Imperial Japanese Navy planned to use its large, ocean-going submarines to chip away at its opponent before the grand battle. In order to accomplish this, the IJN's submarine force was tasked to perform extended reconnaissance of the USN's battle fleet, even in port, and then shadow and attack it. For their part, the USN was fully aware of the potential threat posed by Japanese submarines, and destroyer crews were trained and equipped with modern anti-submarine weapons and tactics to screen the battle fleet. Challenging the assumption that Japanese submarines were ineffective during the Pacific War, this fully illustrated study examines their encounters with the US Navy, and the successes and failures of American destroyers in protecting their capital ships.

The World Encyclopedia of Submarines, Destroyers & Frigates Bernard Ireland,John Parker,2012-01-09 This title charts a century of destroyer, frigate and submarine development, starting with the earliest vessels, through the two World Wars and the Cold War, through to the incredible machines planned for construction in the 21st century.

U-boats vs Destroyer Escorts Gordon Williamson,2013-08-20 Winston Churchill claimed the 'U-boat peril' was the only thing that frightened him during World War II. The U-boat was developed from a small coastal vessel into a state-of-the-art killer, stalking the high seas picking off merchant convoys, until the introduction of the destroyer escort, and the development of dedicated anti-submarine tactics provided a means of defence and attack against the U-boats. Gordon Williamson describes the design and development of these two deadly opponents, their tactics, strengths and weaknesses, weaponry and training. He provides an insight into the lives of the Royal Navy and Wolf Pack crews as they played their deadly games of cat and mouse on the high seas, gambling with their lives and the fate of the nations.

The Destroyer Killer Edwin Palmer Hoyt,1989 Hoyt, one of America's finest military historians, brings to vivid, shocking life the exploits of one of the most famous destroyer submarines of World War II, the *Harder*, and its maverick commander, Sam Dealy. A gutsy portrayal of submarine warfare that is must reading for all military fans.

Living with the Torpedo: Anti-Submarine Warfare, Command, and Shipboard Life in the US Navy During World War II George P. Sotos Usn,2020-02-19 Living with the Torpedo is the only World War II memoir written by a US Navy officer who fought the years-long Battle of the Atlantic against Hitler's U-boats from the decks of a destroyer escort and PC boats. More than seven decades later, George Sotos still dreams the sounds and emotions of his years living with the torpedo threat. In this captivating book, he tells you what that time was like, and how the human element formed the foundation of successful American submarine hunting during the war. More than a mere recounting of events, Living with the Torpedo brings to life the tactics, procedures, people, and feeling of small-ship action against a determined and capable adversary. Readers will marvel at the transformation, in less than five years, of a college senior who had never seen the ocean into a task-unit commander in control of three combat-tested warships -- a progression unlikely to be repeated in a modern navy.

British Destroyers & Frigates Norman Friedman,2012-10-22 “A comprehensive survey of the design history and development of the Royal Navy's greyhounds of the sea.”—WARSHIPS Magazine Since World War II, the old categories of destroyer and frigate have tended to merge, a process that this book traces back to the radically different “Tribal” class destroyers of 1936. It deals with the development of all the modern destroyer classes that fought the war, looks at the emergency programs that produced vast numbers of trade protection vessels—sloops, corvettes and frigates—then analyzes the pressures that shaped the post-war fleet, and continued to dominate design down to recent years. Written by America's leading authority and featuring photos and ship plans, it is an objective but sympathetic view of the difficult economic and political environment in which British designers had to work, and benefits from the author's ability to compare and contrast the US Navy's experience. Norman Friedman is renowned for his ability to explain the policy and strategy changes that drive design decisions, and his latest book uses previously unpublished material to draw a new and convincing picture of British naval policy over the previous seventy years and more. Includes photos

US Destroyers vs German U-Boats Mark Lardas,2023-04-27 An absorbing study of the duels fought between the US Navy's escort warships and Hitler's U-boats between December 1941 and May 1945. Although the Battle of the Atlantic lasted several years, its most critical phase began once the United States entered World War II. By December 1941, the British had mastered the U-boat threat in the Eastern Atlantic, only to see the front abruptly expand to regions the US Navy would patrol, chiefly the Atlantic Seaboard. Unless the US Navy overcame the U-boat threat, the Allies would struggle to win. The Battle of the Atlantic was made up of thousands of individual duels: aircraft against U-boats, aircraft against aircraft, aircraft against ships-but most crucially, ships against U-boats. The individual clashes between Germany's U-boats and the Allied warships escorting the vital convoys often comprised one-on-one actions. These stories provide the focus of this detailed work. The technical details of the U-boats, destroyers, and destroyer escorts involved are explored in stunning illustrations, including ship and submarine profiles and weaponry artworks, and key clashes are brought to life in dramatic battlescenes. Among the clashes covered are including USS Kearny vs. U-568, USS Roper (DD-147) vs U-85, USS Eugene E. Elmore (DE-686) vs U-549, and USS Atherton (DE-169) vs U-853.

Submarines, Mines and Torpedos in the War Charles William Domville-Fife,2013-09 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 edition. Excerpt: ... INTRODUCTION THE SUBMARINE PHASE OF THE NAVAL WAR In the mist of war which envelops over half the entire world, no less than 264 underwater fighting ships are engaged. They form the submarine fleets of England, France, Russia, Japan, Germany and Austria; and

the highly-trained crews of these modern additions to the fighting navies comprise nearly 20,000 men. But the conduct of submarine warfare on the grand scale requires far more than flotillas of submergible warships and their daring crews. This new branch of naval science is ever widening in its scope, its means of offence, and in its attendant ramifications. Every important naval base has its curious submarine floating docks, ready for crippled members of its attached flotilla; every naval construction department has its corps of submarine experts; each of the 1,500 surface warships engaged in this titanic struggle for the dominion of Europe and the mastery of the seas carries the means for delivering submarine attacks in its torpedoes and surface and submerged discharging tubes. The oceans in the theatres of war have been strewn with German and Austrian mines; then they have been either counter-mined or swept clear and mined again. British seaplanes, with specially trained observers, are continually searching from high in the air for the dark patches in the semitransparent sea-green which denote the presence of mines and submarines. Within signal-range or wireless call of the aerial scouts and their attendant ships are destroyer flotillas to give battle to the hostile submarines, while hundreds of trawlers and small steamers, fitted with special apparatus, are continually sweeping up the hundreds of submarine mines laid by the enemy's vessels which are fitted to enable them to sow...
