Commentaries on European Contract Laws Nils Jansen,Reinhard Zimmermann,2018-07-13 The book provides rule-by-rule commentaries on European contract law (general contract law, consumer contract law, the law of sale and related services), dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades, and for an assessment of the current situation. In particular, the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts (from the CISG to the Draft Common European Sales Law) are critically examined and compared with each other. As far as the *acquis commun* (ie the traditional private law as laid down in the national codifications) is concerned, the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have, however, been complemented with some chapters, sections, and individual provisions drawn from other sources, primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In addition, the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background; and it thus investigates whether, and to what extent, these texts can be taken to be genuinely European in nature, ie to constitute a manifestation of a common core of European contract law. Where this is not the case, the question is asked whether, and for what reasons, they should be seen as points of departure for the further development of European contract law.

German Reunification Joyce E. Bromley,2017-04-07 In 1945, German families with more than 100 hectares (247 acres) of land were forced from their homes in the eastern sector by the Soviets, now in control of that area. These families were brutally evicted from their property and had their land expropriated. In the next 45 years, the GDR government would come to control all of the agricultural land. At reunification in 1990, the earlier abuse of these farmers was compounded when the German government would not restore any of this expropriated land to these families. The German government falsely accused the Soviet Union of insisting on non-restitution as a condition of reunification. Soviet leader Mikhail Gorbachev unequivocally denies this claim and insists that land issues are a German problem to resolve. The temporary land-trust agency, established by the

German government in 1990 to dispose of land it inherited from the GDR, continues to exist. After 25 years, this agency still holds almost 20 percent of this expropriated land. Its agents, most of whom were reared in GDR, decide who may (or may not) lease land, the conditions of the lease, and if and when a farmer may buy land – circumstances that remain deeply controversial. Joyce Bromley draws on extensive field research, and previously untapped sources, to explore the reliability of the government's version of these important events. Is the German government once again, without shame, discriminating against a group of its own citizens?

Unjustified Enrichment Christian von Bar,Stephen Swann,Study Group on a European Civil Code,2010 Unjustified enrichment is one of the three main non-contractual obligations dealt with in the Draft of a Common Frame of Reference. In recent years, unjustified enrichment has been one of the most intellectually animated areas of private law. In an area of law whose territory is still partially uncharted and whose boundaries are contested, this volume of the series Principles of European Law will be invaluable for academic analysis of the law and its development by the courts. During the drafting process, comparative material from over 25 different EU jurisdictions has been taken into account. The work therefore is not only a presentation of a future model for European rules to come, but provides also a fairly detailed indication of the present legal situation in the Member States.

Germany and the Second World War Horst Boog,1990 This is the second in the comprehensive ten-volume Germany and the Second World War. The five volumes so far published in German take the story to the end of 1941, and have achieved international acclaim as a major contribution to historical study. Under the auspices of the Militärgeschichtliches Forschungsamt (Research Institute for Military History), a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War. This volume surveys the first year of the war deliberately begun by Nazi Germany. The authors examine the train of interconnected political and military events, and set military operations against the background of Hitler's war policy and general aims, both immediate and long term. The authors show that the conflict took a course quite different from that which Hitler had intended, but nevertheless resulted in a series of conquests for the Third Reich.

Germany and the Second World War Horst Boog,Gerhard Krebs,Detlef Vogel,2006-05-04 By the spring of 1943, after the defeat at Stalingrad, the writing was on the wall. But while commanders close to the troops on Germany's various fronts were beginning to read it, those at the top were resolutely looking the other way. This seventh volume in the magisterial 10-volume series from the Militärgeschichtliches Forschungsamt [Research Institute for Military History] shows both Germany and her Japanese ally on the defensive, from 1943 into early 1945. It looks in depth at the strategic air war over the Reich and the mounting toll taken in the Battles of the Ruhr, Hamburg, and Berlin, and at the Battle of the Radar Sets so central to them all. The collapse of the Luftwaffe in its retaliatory role led to hopes being pinned on the revolutionary V-weapons, whose dramatic but ultimately fruitless achievements are chronicled. The Luftwaffe's weakness in defence is seen during the Normandy invasion, Operation Overlord, an account of the planning, preparation and execution of which form the central part of this volume together with the landings in the south of France, the setback suffered at Arnhem, and the German counter-offensive in the Ardennes. The final part follows the fortunes of Germany's ally fighting in the Pacific, Burma, Thailand, and China, with American forces capturing islands ever closer to Japan's homeland, and culminates in her capitulation and the creation of a new postwar order in the Far East. The struggle between internal factions in the Japanese high command and imperial court is studied in detail, and highlights an interesting contrast with the intolerance of all dissent that typified the Nazi power structure. Based on meticulous research by MGFA's team of historians at Potsdam, this analysis of events is illustrated by a wealth of tables and maps covering aspects ranging from Germany's radar defence system and the targets of RAF Bomber Command and the US 8th Air Force, through the break-out from the Normandy beachhead, to the battles for Iwo Jima and Okinawa.
