Real Estate Investment Trusts in Europe Ramón Sotelo,Stanley McGreal,2013-12-11 Shortly before of the beginning of the global financial crisis of 2008 REITs were introduced in several European countries based on their success in mature markets like the US, Australia and some Asian countries. While the history of REITs in Europe has been relatively brief, REITs are well on the way to become an industry standard as a real estate investment financial vehicle not only in Europe but throughout the developed world. This book provides both academics and decision makers an introduction to the economics of REITs beyond tax transparency, an overview of the mature REITs markets, and a closer reflection of the development of different REIT-structures in Europe including the history, regulation and markets of each country.

Large Infrastructure Projects in Germany Genia Kostka,Jobst Fiedler,2016-05-23 This book presents an analysis of why some large infrastructure projects are delayed or compromised and offers important insights into the better delivery of future projects. It provides an important reaction to the ambitious €315 billion investment plan devised by the European Commission, wherein Europe's infrastructure is a key investment target. Germany is adopted as a focus, as Europe's largest economy, and a nation that has seen significant delays and tensions in the delivery of key infrastructure projects. The contributions to this volume demonstrate various patterns for infrastructure assets and illustrate how factors such as poor project governance, early planning mistakes, inappropriate risk management and unforeseen technological challenges influence delivery. The in-depth case studies on the Berlin Brandenburg Airport, the Hamburg Elbphilharmonie, and offshore wind parks show how project delivery can face massive problems, and illuminating solutions are offered to these problems. Overall, the case of Germany also offers the opportunity to assess various new forms of project delivery, such as public-private partnerships (PPP), and the risks and opportunities of ambitious first-mover 'pioneer' projects. The book will be of great interest for scholars and upper-level students of human geography, business and management, as well as policy makers.

Discourse in Content and Language Integrated Learning (CLIL) Classrooms Christiane Dalton-Puffer,2007-09-27 The label CLIL stands for classrooms where a foreign language (English) is used as a medium of instruction in content subjects. This book provides a first in-depth analysis of the kind of communicative abilities which are embodied in such CLIL classrooms. It examines teacher and student talk at secondary school level from different discourse-analytic angles, taking into account the interpersonal pragmatics of classroom discourse and how school subjects are talked into being during lessons. The analysis shows how CLIL classroom interaction is strongly shaped by its institutional context, which in turn conditions the ways in which students experience, use and learn the target language. The research presented here suggests that CLIL programmes require more explicit language learning goals in order to fully exploit their potential for furthering the learners' appropriation of a foreign language as a medium of learning.

Siting Futurity Susan Ingram,2021-05-03 It also shows how work with a connection to Vienna by international stars like David Bowie, Wes Anderson, and Christoph Schlingensief has absorbed the same principles.While the overwhelming scale of technological development and the ensuing problems and crises may not have been deliberately designed to induce resignation, passivity, and despair, those who benefit from the related hyperobjects of financialization and climate change must find it convenient that they do, as demoralization reduces resistance to their profit-making machinations. It is in this context that Red Vienna's proud tradition of social engagement and long tradition of resistance and radicality deserves to be better known. Susan Ingram is Professor in the Department of Humanities at York University, Toronto, where she coordinates the Graduate Diploma for Comparative Literature and is affiliated with the Canadian Centre for German and European Studies and the Research Group on Language and Culture Contact. .

Society of the Query Reader Miriam Rasch,René König,2014-04-22 Looking up something online is one of the most common applications of the web. Whether with a laptop or smartphone, we search the web from wherever we are, at any given moment. 'Googling' has become so entwined in our daily routines that we rarely question it. However, search engines such as Google or Bing determine what part of the web we get to see, shaping our knowledge and perceptions of the world. But there is a world beyond Google - geographically, culturally, and technologically. The Society of the Query network was founded in 2009 to delve into the larger societal and cultural consequences that are triggered by search technology. In this Reader, which is published after two conferences held in Amsterdam in 2009 and 2013, twenty authors - new media scholars, historians, computer scientists, and artists - try to answer a number of pressing questions about online search.

Interacting with Print The Multigraph Collective,2018-01-26 A thorough rethinking of a field deserves to take a shape that is in itself new. Interacting with Print delivers on this premise,

reworking the history of print through a unique effort in authorial collaboration. The book itself is not a typical monograph—rather, it is a “multigraph,” the collective work of twenty-two scholars who together have assembled an alphabetically arranged tour of key concepts for the study of print culture, from Anthologies and Binding to Publicity and Taste. Each entry builds on its term in order to resituate print and book history within a broader media ecology throughout the eighteenth and nineteenth centuries. The central theme is interactivity, in three senses: people interacting with print; print interacting with the non-print media that it has long been thought, erroneously, to have displaced; and people interacting with each other through print. The resulting book will introduce new energy to the field of print studies and lead to considerable new avenues of investigation.

Post-Roman Towns, Trade and Settlement in Europe and Byzantium: Byzantium, Pliska, and the Balkans Joachim Henning, 2007 In this collection leading international authorities analyse the structures and economic functions of non-agrarian centres between ca. 500 and 1000 A.D. - their trade, their surrounding settlements, and the agricultural and cultural milieu. The thirty-one papers presented at an international conference held in Bad Homburg focus on recent archaeological discoveries in Central Europe (Vol. 1), as well as on those from southeastern Europe to Asia Minor (Vol. 2).

Perspectives in Urban Ecology Wilfried Endlicher, 2011-06-21 This book gives an interdisciplinary overview on urban ecology. Basic understanding of urban nature development and its social reception are discussed for the European Metropolitan Area of Berlin. Furthermore, we investigate specific consequences for the environment, nature and the quality of life for city dwellers due to profound changes such as climate change and the demographic and economic developments associated with the phenomena of shrinking cities. Actual problems of urban ecology should be discussed not only in terms of natural dimensions such as atmosphere, biosphere, pedosphere and hydrosphere but also in terms of social and cultural dimensions such as urban planning, residence and recreation, traffic and mobility and economic values. Our research findings focus on streets, new urban landscapes, intermediate use of brown fields and the relationships between urban nature and the well-being of city dwellers. Finally, the book provides a contribution to the international discussion on urban ecology.
