Po Chung

DHL Po Chung, Roger Bowie, 2017-12-18 DHL: From Startup to Global Upstart is the story of a startup that became the first worldwide logistics service organization, fighting regulation, trade restrictions, customs, and many other technical issues to develop processes that have stood the test of time to become the accepted norm in delivery throughout the world. It is a story of using soft powers, persuasion, and ingenuity, working with, and around, emerging technologies to eliminate barriers to success. This book provides an extraordinary look into how a little startup with grit and perseverance succeeded in the face of overwhelming odds and revolutionized many of what are now accepted transportation and supply chain practices. Po Chung, DHL International co-founder, and Roger Bowie, former DHL Worldwide Services Director, discuss how DHL paved the way for one day international package delivery and how they have maintained their global leadership position against powerful American titans.

Deutsche Post DHL Group. A Strategy Formulation Nicolai Kasper, 2020-12-21 Essay from the year 2020 in the subject Business economics - Business Management, Corporate Governance, grade: 1,7, The FOM University of Applied Sciences, Hamburg, language: English, abstract: This essay analyses the internal aspects of the company and identifies its strength and weaknesses. It also offers an insight in the business environment and pinpoints opportunities and Threats. In chapter three, the prevailing strategy of the group is briefly presented and an alternative is formulated based on the previous SWOT-analysis. Deutsche Post DHL Group originated from the Deutsche Bundespost, which had been a state-owned postal-delivery, logistics and telecommunication company. It was divided and privatized in 1995 and Deutsche Post AG became a thoroughly independent company with its IPO in November 2000 (DPDHL, 2020). Ever since, the company has continuously expanded its business through acquisition activities and became the world largest courier company. The most significant milestone was the acquisition of DHL in December 2002. Now, around 550.000 employees are working for DPDHL and achieved a revenue of €63,341 million and an EBIT of €4,128 million. The group is structured in five divisions: Post & Parcel Germany, Express, Global Forwarding / Freight, Supply Chain and eCommerce Solutions. In the era of corona and technological breakthroughs, the world is constantly changing and so does the world of business. Especially, a global operating logistic company needs to adapt rapidly to these changes.

The Global Player: How to Become "the Logistics Company for the World" Thomas Musiolik, 2012 According to Frank Appel, CEO of Deutsche Post DHL, within its Strategy 2015 framework, DHL will become the logistics company for the world. In times of globalization and economic downturn, the effects of which can be felt in the entire logistics industry, this goal is an enormous challenge for DHL. In order to attain this goal, it is essential for DHL to create a closer linkage of its business areas, to slim down its processes and to put a stronger focus on the ever-changing needs of the customer. The objective of this book is to offer cost reduction solutions and give suggestions on how quality can be improved, which will distinguish DHL from its competitors while fulfilling the needs of the customer, i.e. become the logistics company for the world. This book is divided into four sections. First, there is a synopsis of the history of DHL, as well as a description of its organizational and corporate structure and concludes with a comparison of the business segments of DHL with its main competitors. After that, the corporate strategy is analyzed: (1) its core competencies, (2) its mergers and acquisitions, (3) Ansoff, and (4) BCG/BCG II. The section concludes by examining which strategy could be appropriate for a successful future for DHL. The third section deals with the competitive strategy of DHL. Porter's Five Forces are utilized to analyze the attractiveness of the industry, as well as its competitors, suppliers and customers. This is followed by an analysis of the appropriate strategy for DHL Logistics by means of the Generic Strategies according to Porter, the Hybrid Strategies, the TOWS and an evaluation of the strategic options. The next step will explain the appropriate processes for the strategy of the value chain. A Scenario 2020, which draws a picture of what the industry might look like in ten years, concludes this section. The final section will highlight the factors that can give DHL sustainable competitive advantages. The functional strategies are presented, the global key markets are analyzed and appropriate strategic alliances are examined. The author sets great value upon clear and interesting statements that ensure an easy understanding of the subject matter but at the same time facilitate a fast transfer into practice.

Risk management at Deutsche Post DHL Group DPDHL Jan Bausewein, 2022-06-20 Seminar paper from the year 2022 in the subject Business economics - Miscellaneous, grade: 2,0, University of applied sciences Frankfurt a. M., course: Develop a New Business, language: English, abstract: Deutsche Post DHL Group (DPDHL) is a German company headquartered in Bonn and the world's largest logistics group with

currently over 550 thousand employees. The company is in very good shape despite the Corona pandemic and counts among its core business logistics services such as mail and parcel delivery, air and sea freight, express delivery, e-commerce solutions and supply chain management. The company's stability is due in part to the successful implementation of its risk management. Risk management is a corporate area whose tasks include identifying, assessing, managing and monitoring company-specific risks in order to safeguard the company's existence and increase in value. The orientation is always linked to the corporate goal and strategy and is regulated by the internationally valid ISO 31000. DPDHL has been reporting publicly on this area of the business since the introduction of the German Control and Transparency Act (Gesetz zur Kontrolle und Transparenz (KonTraG)) in 1998. With the help of transparently communicated risk management processes, the Group creates clear structures and guidelines that enable it to maintain an overview of its global supply chains and to manage regulatory, (geo)political, financial and social risks in real time. Some measures indicate that DPDHL's risk management is implemented sustainably and successfully. Not all risks can be reduced or even avoided, which is why risk management as a management task is always linked to strategic decisions and all managers in the Group are involved in communication, right up to the Board of Management.

Beyond Open Skies Brian F. Havel, 2009-01-01 'Beyond Open Skies' offers a systematic comparative analysis of the legal and policy dimensions of airline deregulation by federal fiat in the United States and by supranational collaboration in the European Union. The book draws upon a variety of sources, including very recent developments in U.S. and EC international aviation law, policy, and diplomacy, to propose a genuine multilateral air transport system. It examines the potential of the 'open skies' initiative, in the aftermath of the new U.S./EC air transport agreement, to inspire a genuine globalization of the world's air transport industry in such crucial aspects as the following: cabotage; ownership and citizenship requirements; route selection; airline identity; capacity; pricing regimes; competition and public aid; regulatory harmonization; labor laws; provisions for charter and/or cargo transportation; fair operation of and access to computer reservations systems; authorization of code-sharing arrangements; alliances and antitrust immunity; and dispute resolution.

DHL and Facilitating Small Business Trade Daniel W. Baack, Eric G. Harris, Donald Baack, 2016 This case study tracks the growth of DHL, from a small courier between California and Hawaii, to an international shipping organization. In more recent years, DHL has directed focus to facilitating trade for small and medium businesses in emerging markets, and this case investigates the various strategies by which these markets are reached.

DHL Rebecca J. Herrman, Jason B. Nowak, James S. O'Rourke, 2009 On November 10, 2008, DHL announced that it would shut down the operations of its domestic shipping services in the United States. DHL must now communicate to its U.S. and international customers the implications of this business decision and how DHL will be able to continue to serve the needs of its customers.

From regional clusters to global networks Maurício Araquã de Sousa, Marcelo Estrêla Fiche, 2023-01-31 In this new book, instead of a simple opposition to the new Chinese expansionist policy (One Belt One Road Initiative), Professor Mauricio Sousa argues that the European Union should start to formulate strategies to expand parts of productive processes of its industries to new markets in Asia, Africa and Latin America, in partnership with business groups from these developing countries. Thus, avoiding a new trade war, Eastern and Western countries would benefit from the coordination of development initiatives for these new markets, with many developing countries having opportunity to receive technologies and to train their workforce to new production patterns (such as Industrie 4.0), while expanding European, North American and Asiatic supply chains, optimizing new port and railway infrastructures that China has been building around the world. European Digital Shipping companies could play a key role in this process, since they are increasingly being able to apply Blockchain and other new technology standards in order to identify business opportunities and to plan new logistics channels, becoming a strategic link between European and North American industries and new regions in developing countries to where they could expand, accelerating the formation of more consumer markets, integrating regional clusters into global production networks.
