Having diabetes can be unpredictable. It's not just about checking your blood sugar before and after meals. It's also about keeping track of your health when unexpected changes happen. This book is designed with exactly that purpose in mind. It features: 150 days of visual blood sugar tracking: Create your own mg/dl graph to help you spot any reoccurring trends. Insulin timeline: mark the actual time you injected insulin. That way, you'll not risk forgetting when you had your last dose of insulin. Meal list: Loads of space to write down your daily meals and snacks -and when you ate them! A daily notes section: Because every day is different, and good diabetes tracking also means keeping a record of special events that might have affected your blood sugar levels. Alc log: To help you remember the last time you got your Alc levels checked.
