Same Family, Different Colors Lori L.

Tharps, 2016-10-04 Weaving together personal stories, history, and analysis, *Same Family, Different Colors* explores the myriad ways skin-color politics affect family dynamics in the United States. Colorism and color bias—the preference for or presumed superiority of people based on the color of their skin—is a pervasive and damaging but rarely openly discussed phenomenon. In this unprecedented book, Lori L. Tharps explores the issue in African American, Latino, Asian American, and mixed-race families and communities by weaving together personal stories, history, and analysis. The result is a compelling portrait of the myriad ways skin-color politics affect family dynamics in the United States. Tharps, the mother of three mixed-race children with three distinct skin colors, uses her own family as a starting point to investigate how skin-color difference is dealt with. Her journey takes her across the country and into the lives of dozens of diverse individuals, all of whom have grappled with skin-color politics and speak candidly about experiences that sometimes scarred them. From a Latina woman who was told she couldn't be in her best friend's wedding photos because her dark skin would "spoil" the pictures, to a light-skinned African American man who spent his entire childhood "trying to be Black," Tharps illuminates the complex and multifaceted ways that colorism affects our self-esteem and shapes our lives and relationships. Along with intimate and revealing stories, Tharps adds a historical

overview and a contemporary cultural critique to contextualize how various communities and individuals navigate skin-color politics. Groundbreaking and urgent, *Same Family, Different Colors* is a solution-seeking journey to the heart of identity politics, so that this more subtle "cousin to racism," in the author's words, will be exposed and confronted.

The Other Colors Valerie Gates, 2013-03-20 Do you know what the colors gamboge, zaffre, and debian look like? Then travel through the alphabet with *The Other Colors* to learn about the beautiful and unusually named colors found in nature—and to brush up on those ABCs as well. Do Colors Exist? Seth Stannard
Cottrell, 2018-05-07 Why do polished stones look wet? How does the Twin Paradox work? What if Jupiter were a star? How can we be sure that π never repeats? How does a quantum computer break encryption? Discover the answers to these, and other profound physics questions! This fascinating book presents a collection of articles based on conversations and correspondences between the author and complete strangers about physics and math. The author, a researcher in mathematical physics, responds to dozens of questions posed by inquiring minds from all over the world, ranging from the everyday to the profound. Rather than unnecessarily complex explanations mired in mysterious terminology and symbols, the reader is presented with the reasoning, experiments, and mathematics in a casual, conversational, and often comical style. Neither over-simplified nor over-technical, the lucid and entertaining writing will guide the reader from each innocent question to a better understanding of the weird and beautiful universe around us. Advance praise for *Do Colors Exist?*: "Every high school science teacher should

have a copy of this book. The individual articles offer enrichment to those students who wish to go beyond a typical 'dry curriculum'. The articles are very fun. I probably laughed out loud every 2-3 minutes. This is not easy to do. In fact, my children are interested in the book because they heard me laughing so much." – Ken Ono, Emory University

The Family with Many Colors Emma Louise Williams Thomas, 2013-01 Today's world is full of diversity and it comes in many shapes, sizes, creeds and so much more. In this wonderful story of a Family with Many Colors, children learn that being different is not only ok, but it's cool, hip and fun. The Family with Many Colors shows how love does not stop at one color, or style. Love embraces everyone and everything. To show true love and acceptance, we must look beyond the color barrier, embrace the uniqueness in all of us and know that being different is not wrong, just different which adds to our rich culture and life. About the Author and Illustrator: Mrs. Emma Thomas grew up in Tallahassee, Florida. At an early age she wanted to be an artist. As time progressed, she saw the value and enjoyment that many teachers in her area received from teaching. This won her over and she decided to go to college with her grandmother's help to become a teacher. She earned a degree in Early Childhood and Elementary Education, with a minor in Middle School Science. In college, Mrs. Thomas met her husband, Willie. She is a proud parent of a daughter and now has a granddaughter that she cherishes deeply. Through the years of teaching, Mrs. Thomas has met many

students and parents from a variety of backgrounds and cultural diversities. She learned from her students on how to share love and grew to appreciate their ability to look beyond skin color. This led her to writing a book about the different beautiful flowers (colors of people) which has turned into her first book: *The Family with Many Colors*. Dimitri Garcia's recognition of being artistic filled him with bliss at a very early age. He adored feeling special because his gift was so unique. Dimitri especially found joy in surprising himself and others when artwork looked better than anticipated. His greatest influences have been children's books, comics, cartoons and motion graphics. Dimitri's mediums always range from acrylic, watercolor, pen and ink and digital coloring but he always starts inside a sketchbook. He calls Austin, Texas his home and divides his time and attention between personal training, freelance graphic design, illustration and yoga.

Many Colors Soong-Chan Rah, 2010-09-01 The United States is currently undergoing the most rapid demographic shift in its history. By 2050, white Americans will no longer comprise a majority of the population. Instead, they'll be the largest minority group in a country made up entirely of minorities, followed by Hispanic Americans, African Americans, and Asian Americans. Past shifts in America's demographics always reshaped the country's religious landscape. This shift will be no different. Soong-Chan Rah's book is intended to equip evangelicals for ministry and outreach in our changing nation. Borrowing from the business concept of cultural intelligence, he explores how God's people can become more multiculturally adept. From discussions about cultural and racial histories, to reviews of case-study churches and Christian groups that are succeeding in bridging ethnic divides, Rah provides a practical and hopeful guidebook for Christians wanting to minister more effectively in diverse settings. Without guilt trips or browbeating, the book will spur individuals, churches, and parachurch ministries toward more effectively bearing witness to the gospel of Jesus Christ, the Good News for people of every racial and cultural background. Its message is positive; its potential impact, transformative.
