International Business K. Praveen Parboteeah,John B. Cullen,2017-07-06 This book provides students with a balanced perspective on business in a global environment, exploring implications for multinational companies in developed and emerging markets. This is the first text of its kind to emphasize strategic decision making as the cornerstone of its approach while focusing on emerging markets. Traditional topics, like foreign exchange markets and global competition, are contrasted with emerging operations, like Chinese market intervention and Islamic finance, to provide students with an understanding of successful business strategy. Readers learn to develop and implement these strategies across cultures, and across economic, legal, and religious institutions, in order to cope with competitive players in the global landscape. Application-based chapters open with reading goals and conclude with case studies and discussion questions to encourage a practical understanding of strategy. With in-depth analyses and recommended strategies, this edition provides students of international business with the skills they need for success on the global stage. A companion website features an instructor's manual, test bank, PowerPoint slides, and useful links for instructors as well as practice quizzes, flashcards, and web resources for students.

Outside the Studio Greg Gorman,2015 Outside the Studio represents Greg Gorman's tenth monograph and third to be published by Damiani. This book takes Gorman outside the reaches of his studio portrait and figure study work, for which he is well known, and onto the streets of South East Asia-somewhat of uncharted territory for the artist. Traveling initially on behalf of Epson, where he was giving symposiums on fine art digital printing throughout much of Singapore, Malaysia. China and India, gave Gorman a first hand look at these very different cultures. It also came at the very beginning of the digital revolution and the transition from analogue to digital cameras. All of this was very new for someone who had shot film for more than thirty plus years. For Gorman, being in the studio with the likes of a Brando, De Niro or Pacino was second nature to him, but thrusting him in front of strangers in uncontrollable situations was a new adventure!

Sustainable Waste Management Challenges in Developing Countries Pariatamby, Agamuthu,Shahul Hamid, Fauziah,Bhatti, Mehran Sanam,2019-10-18 As global waste generation increases at a rapid rate, there is a dire need for waste management practices such as collection, disposal, and recycling to protect from environmental pollution. However, developing countries generate two to three times more waste, resort to open dumps more often than developed countries, and are slower to integrate waste management standards. There is a need for studies that examine the waste generation and practices of countries that share similar economic backgrounds as they strive to implement successful waste management techniques. *Sustainable Waste Management Challenges in Developing Countries* is an essential reference source that discusses the challenges and strategies of waste management practices and the unique waste issues faced by developing countries that prevent them from achieving the goal of integrated waste management. While highlighting topics including e-waste, transboundary movement, and consumption patterns, this book is ideally designed for policymakers, legislators, waste company managers, environmentalists, students, academicians, and municipal planners seeking current research on the global waste management problem.

Remote Sensing for Field-based Crop Phenotyping Jiangang Liu,Zhenjiang Zhou,Bo Li,2024-02-12 Dynamic monitoring of crop phenotypic traits (e.g., LAI, plant height, biomass, nitrogen, yield et al.) is essential for exploring crop growth patterns, breeding new varieties, and determining optimized strategies for crop management. Traditional methods for determining crop phenotypic traits are mainly based on field sampling, handheld instrument measurement, and mechanized high-throughput platforms, which are time-consuming, and have low efficiency and incomplete spatial coverage. The development of crop science requires more rapid and accurate access to field-based crop phenotypes. Remote sensing provides a novel solution to quantify crop structural and functional traits in a timely, rapid, non-invasive and efficient manner. With the development of burgeoning remote sensing sensors and diversified algorithms, a range of crop phenotypic traits have been determined, including morphological parameters, spectral and textural characteristics, physiological traits, and responses to abiotic/biotic stresses in different environments. In addition, research advances in varying disciplines beyond agricultural sciences, such as engineering, computer science, molecular biology, and bioinformatics, have brought new opportunities for further development of remote sensing-based methods and technologies to gain more quantitative information on crop structure and function in complex environments

Business Value and Sustainability Ki-Hoon Lee,Stephan Vachon,2016-08-17 This book connects business sustainability to supply network-based value creation and enhancement, and tests a number of key propositions in complex supply networks to identify key challenges. Examining practical issues such as carbon trading, green product development, worker safety, child labour and relations with local communities, Business Value and Sustainability advances the understanding of sustainability in supply network management. In presenting a supply management perspective including a tighter control of the supply base and the development of supplier capability through collaboration with NGOs, the authors contribute to both the theoretical advancement and practical development of this field. The book aims to raise the sustainability standards of businesses in an increasingly complex and inter- and intra-connected global supply network.
