Fibre2Fashion - Textile Magazine - July 2018

Fibre2Fashion,2018-07-01 It has been a year and a half since the demonetisation of November 2016; it has also been a year since the much-awaited goods and services tax (GST) was rolled out. Both moves had their obvious effects on industry, with the textiles and apparel sector across the country being particularly affected. Fibre2Fashion's July 2018 cover story features viewpoints of a cross-section of the textiles and apparel industry in Surat. Q&A with Pratibha Syntex's VP, report on trade event Milano Moda Uomo and other regular features are also covered. Fibre2Fashion magazine—the print venture of Fibre2Fashion.com since 2011—is circulated among a carefully-chosen target audience globally, and reaches the desks of top management and decision-makers in the textiles, apparel and fashion industry. Cisco Digital Network Architecture Tim Szigeti, David Zacks, Matthias Falkner, Simone Arena, 2018-12-27 The complete guide to transforming enterprise networks with Cisco DNA As networks become more complex and dynamic, organizations need better ways to manage and secure them. With the Cisco Digital Network Architecture, network operators can run entire network fabrics as a single, programmable system by defining rules that span their devices and move with their users. Using Cisco intent-based networking, you spend less time programming devices, managing configurations, and troubleshooting problems so you have more time for driving value from your network, your applications, and most of all, your users. This guide systematically introduces Cisco DNA, highlighting its business value propositions, design philosophy, tenets, blueprints, components, and solutions. Combining insider information with content previously scattered through multiple technical documents, it provides a single source for evaluation, planning, implementation, and operation. The authors bring together authoritative insights for multiple business and technical audiences. Senior executives will learn how DNA can help them drive digital transformation for competitive advantage. Technical decision-makers will discover powerful emerging solutions for their specific needs. Architects will find essential recommendations, interdependencies, and caveats for planning deployments. Finally, network operators will learn how to use DNA Center's

modern interface to streamline, automate, and improve virtually any network management task. · Accelerate the digital transformation of your business by adopting an intent-based network architecture that is open, extensible, and programmable · Integrate virtualization, automation, analytics, and cloud services to streamline operations and create new business opportunities · Dive deep into hardware, software, and protocol innovations that lay the programmable infrastructure foundation for DNA · Virtualize advanced network functions for fast, easy, and flexible deployments · Translate business intent into device configurations and simplify, scale, and automate network operations using controllers · Use analytics to tune performance, plan capacity, prevent threats, and simplify troubleshooting · Learn how Software-Defined Access improves network flexibility, security, mobility, visibility, and performance · Use DNA Assurance to track the health of clients, network devices, and applications to reveal hundreds of actionable insights · See how DNA Application Policy supports granular application recognition and end-to-end treatment, for even encrypted applications · Identify malware, ransomware, and other threats in encrypted traffic

Fibre2Fashion - Textile Magazine - March 2018

Fibre2Fashion,2018-03-01 Earlier this year, the Union government declared open the automatic route for foreign direct investment (FDI) in single-brand retail, making it easier for big Western brands to start retail operations in India from the coming financial year. The March 2018 edition

of Fibre2Fashion explores the FDI decision, and also how and in what way this has a bearing on 'Make in India'. Looking at Make in India from differing perspectives, this edition also carries stories ranging from technology to accessories and home fashion. In addition to regular features, there is none other than Jaya Jaitly, expert in traditional arts and crafts, arguing about the use of natural fibres and colours, produced ethically and sustainably. Fashion Communication in the Digital Age Nadzeya Kalbaska,Teresa Sádaba,Francesca Cominelli,Lorenzo Cantoni,2019-06-03 This book represents a major milestone in the endeavour to understand how communication is impacting on the fashion industry and on societal fashion-related practices and values in the digital age. It presents the proceedings of FACTUM 19, the first in a series of fashion communication conferences that highlights important theoretical and empirical work in the field. Beyond documenting the latest scientific insights, the book is intended to foster the sharing of methodological approaches, expand the dialogue between communications' studies and fashion-related disciplines, help establish an international and interdisciplinary network of scholars, and offer encouragement and fresh ideas to junior researchers. It is of high value to academics and students in the fields of fashion communication, fashion marketing, visual studies in fashion, digital transformation of the fashion industry, and the cultural heritage dimension of fashion. In addition, it is a key resource for professionals seeking sound research on fashion

communication and marketing.

Digital Research Methods in Fashion and Textile Studies Amanda Sikarskie, 2020-01-09 Are you a researcher struggling to mine and make sense of a mountain of fashion data? Are you interested in learning about how digital methods and tools could enhance your research? Have you thought about ways to spark and engage in academic conversations on social media? Have you wondered how digital technologies are internationalizing the field of fashion and textile studies? *Digital Research Methods in Fashion and Textile Studies* presents the reader with a variety of digital methodologies to help build skills in searching for, analyzing, and discussing vintage design, photography, and writing on fashion, as well as historic and ethnographic dress and textile objects themselves. Each chapter focuses upon a different method, problem, or research site, including: - Maximalism and mixed-methods approaches to research - Searching large databases effectively - Pattern recognition and visual searching. - Critical reading, use, and citation of social media texts - Digital ethnography and shopping as research - Data visualization and mapping - Images in the public domain From advanced undergraduates and postgraduate students working on research projects to veteran professionals in fashion and textile history and beyond, everyone can benefit from a diverse set of fresh approaches to conducting and disseminating research. In the current age of instant gratification, with users snapping and posting images from runway shows long before the clothes will ever appear instores, the world of

fashion is increasingly digital and fast-paced. Research on fashion is, too. Digital Research Methods in Fashion and Textile Studies will help you keep up in this rapidly changing world.

Digital Fashion Communication Alice

Noris, Lorenzo Cantoni, 2022-08-29 Fashion is an integral part of popular culture, closely intertwined with tales, magazines, photography, cinema, television, music and sports...up to the emergence of dedicated exhibitions and museums. Fashion is undergoing a major digital transformation: garments and apparels are presented and sold online, and fashion trends and styles are launched, discussed and negotiated mainly in the digital arena. While going well beyond national and linguistic borders, digital fashion communication requires further cultural sensitivity: otherwise, it might ignite intercultural misunderstandings and communication crises. This book presents the recent transformation of fashion from being a Cinderella to becoming a major cultural attractor and academic research subject, as well as the implications of its digital transformation. Through several cases, it documents intercultural communication crises and provides strategies to interpret and prevent them.

Fashion Buying and Merchandising Rosy

Boardman, Rachel Parker-Strak, Claudia E. Henninger, 2020-05-10 Fashion buying and merchandising has changed dramatically over the last 20 years. Aspects such as the advent of new technologies and the changing nature of the industry into one that is faster paced than ever

before, as well as the shift towards more ethical and sustainable practices have resulted in a dramatic change of the roles. As a result, contemporary fast fashion retailers do not follow the traditional buying cycle processes step by step, critical paths are wildly different, and there has been a huge increase in 'in-season buying' as a response to heightened consumer demand. This textbook is a comprehensive guide to 21st-century fashion buying and merchandising, considering fast fashion, sustainability, ethical issues, omnichannel retailing, and computer-aided design. It presents an up-to-date buying cycle that reflects key aspects of fashion buying and merchandising, as well as in-depth explanations of fashion product development, trend translation, and sourcing. It applies theoretical and strategic business models to buying and merchandising that have traditionally been used in marketing and management. This book is ideal for all fashion buying and merchandising students, specifically second- and final-year undergraduate as well as MA/MSc fashion students. It will also be useful to academics and practitioners who wish to gain a greater understanding of the industry today.

Digital Innovation and the Future of Work Hans Schaffers, Matti Vartiainen, Jacques Bus, 2022-09-01
The concept of digitalization captures the widespread adoption of digital technologies in our lives, in the structure and functioning of organizations and in the transformation of our economy and society. Digital technologies for data processing and communication underly high-impact innovations including the Internet of Things,

wireless multimedia, artificial intelligence, big data, enterprise platforms, social networks and blockchain. These digital innovations not only bring new opportunities for prosperity and wellbeing but also affect our behaviors, activities, and daily lives. They enable and shape new forms of production and new working practices in sectors such as manufacturing, healthcare, logistics and supply chains, energy, and public and business services. Digital innovations are not purely technological but form part of comprehensive systemic innovations of a sociotechnical and networked nature, requiring the alignment of technology, processes, organizations, and humans. Examples are platform-based work, customer driven value creating networks, and urban public service systems. Building on widespread networking, algorithmic decisions and sharing of personal data, these innovations raise intensive societal and ethical debates regarding key issues such as data sovereignty and privacy intrusion, business models based on data surveillance and negative externalization, quality of work and jobs, and market dominance versus regulation. In this context, this book focuses on the implications of digitalization for the domain of work. The book studies the changing nature of work as well as new forms of digitally enabled organizations, work practices and cooperation. The book sheds light on the technological, economic, and political forces shaping the new world of work and on the prospects for human-centric and responsible innovations.

Digital Manufacturing Technology for Sustainable Anthropometric Apparel Norsaadah

Zakaria, 2022-05-13 Digital Manufacturing

Technology for Sustainable Anthropometric Apparel is a thorough and practical examination of the state-of-the-art in anthropometric apparel manufacturing technology. The scale of the textiles industry, in economic as well as environmental terms, is so significant that new technologies and techniques that deliver improvements are of great global interest. Consumer preferences and government regulations are causing apparel manufacturers to prioritize sustainable practices, and at a time of unprecedented technological evolution and competitive pressure, integrating these measures with other priorities is a key challenge. By combining the expertise of contributors from the worlds of technology change management and technical textiles engineering, this book provides a unique interdisciplinary resource for organizational as well as technical implementation. Newly developed Industry 4.0 technologies are addressed, along with the latest

data collection and analysis methods. Provides practical technical instructions for the implementation of new technologies for 3D body scanning, and anthropometric design and sizing. Explains the latest technical methods for the collection of anthropometric data and examines related ethical issues. Shows how to integrate anthropometric design methodologies into a full smart manufacturing system.

Digital Fashion, 2024-07-11 This collection of topical essays by academics and industry professionals brings a unique lens to the issues broached, questions raised, and solutions offered regarding the history and advancement of digital fashion. While digital fashion's roots can be traced back to the development of the Jacquard loom, its modern-day antecedents are found in video games and Instagram filters - allowing users to apply virtual makeup, accessories, and clothes to their posts. With 12 essays and four specialist interviews, this collection begins with digital fashion's origins, its placement in the history of fashion, and its status as an aesthetic object. Part 2 focuses on the practice of making digital fashion, including NFTs, sneaker culture, cyborg vs skins and education. Part 3 provides a critical overview of digital fashion's potential to impact wider society, including questions of social equity, sustainability and African decoloniality and the future of the industry. Interviewees: Julie Zerbo, founder and Editor-in-Chief of The Fashion Law, Idiat Shiole (Hadeeart), Web3 startup founder and 3D designer Jonathan M.
