Integrated Business Models in the Digital Age
Sumesh Singh Dadwal,Hamid Jahankhani,Azizul
Hassan,2022-06-21 Many scholars have argued that
technology, entrepreneurship, integrated business
models and marketing are key to the success of any
business, but in particular to the success of
unicorn companies. However, there is a need to
further investigate interdisciplinary approaches
to techno entrepreneurial business strategy, which
remains a neglected area of research. In this
edited volume, authors explore and develop
principles, models and other theoretical and
practical concepts to develop better guidance on
how to adapt business models using new
technologies such as AI, cloud computing,
blockchain, cybersecurity, and infrastructure.
Underpinned by established academic theories, the
book explores integrated business models that are
both defensive and offensive in strategic outlook.
Ultimately, it will help students, researchers and
entrepreneurs to design, develop and implement
technology-enabled integrated business models.

  Mobile Computing and Technology Applications in Tourism and Hospitality Waluyo, Agustinus Borgy,Tan, Ling,2022-03-11 Mobile computing and wireless technology have grown at a phenomenal rate in recent years, and so has artificial intelligence. Currently, many countries are facing challenges from the

COVID-19 pandemic. One of the most impacted industries by the pandemic is that of tourism and hospitality.    The Magic Mirror Elizabeth M. Baeten,1996-10-17 In this book, Elizabeth M. Baeten analyzes the theories of myth propounded by Cassirer, Barthes, Eliade, and Hillman and juxtaposes the insights of these very different perspectives to form a coherent account of myth. She then shows that these theories perform the same function the authors ascribe to myth itself. Moreover, not only do the theories of myth function mythically; the myth embedded in each theory is the same: the telos of human existence is absolute freedom, an

unbounded power to constitute the subjective and objective features of existence. The correlate of this myth of absolute creative freedom, Baeten argues, is that the truly human must transcend natural determinations. Baeten understands this to be a dangerous myth and offers an alternative original account of myth-making as an essential strand of cultural production demarcating the human process within the setting of broader natural processes.

European Socio-Economic Integration Elias G. Carayannis,George M. Korres,2012-12-06 Economic integration is one of the most noteworthy issues in international economic policy at the end of the twentieth century. The recent examples of the European Union (EU) and the North American Free

Trade Association (NAFTA) have raised important questions about the economic integration process and the possible establishment of economic unions in other parts of the world. Against the backdrop of the financial crisis in Europe and prospects of increasing integration in Asia, this volume showcases research from an international array of researchers to provide a basic understanding of the current issues, problems, challenges, and opportunities for achieving integration, addressing both empirical and theoretical aspects of such topics as monetary union, social policy reform and social union, public finance and technology policy. The chapters in Part 1 are focused primarily on economic issues, while Part 2 covers on social policy, the welfare state, and political reforms, with a particular emphasis on the European Union. Among the questions addressed: What are the main determinants and implications for socio-economic integration? How can economic policy influence the growth and integration process? Why is innovation important for regional economic development? What has been the policy response so far and what lessons have we learned from it? And finally, what are our action lines for the future?
