Galileo's Idol Nick Wilding,2014-11-27 This book looks at Galileo's friend, student, and patron, Gianfrancesco Sagredo (1571-1620). Sagredo's life brings to light the relationship between the production, distribution, and reception of political information and scientific knowledge.

Leopardi and Shelley Cerimonia Daniela,2017-07-05 Giacomo Leopardi (1798-1837) and Percy Bysshe Shelley (1792-1822) crossed paths during their lifetimes, and though they never met, the legacy of their work betrays a shared destiny. As prominent figures who challenged and contributed to the Romantic debate, Leopardi and Shelley hold important roles in the history of their respective national literatures, but paradoxically experienced a controversial and delayed reception outside their native lands. Cerimonia's wide-ranging study brings together these two poets for the first time for an exploration of their afterlives, through a close reading of hitherto unstudied translations. This intriguing journey tells the story, from its origins, of the two poets' critical fortune, and examines their position in the cultural debates of the nineteenth century; in disputes regarding translation theories and practices; and shows the configuration of their identities as we understand their legacy today.

Holy Feast and Holy Fast Caroline Walker Bynum,1987 In the period between 1200 and 1500 in western Europe, a number of religious women gained widespread veneration and even canonization as saints for their extraordinary devotion to the Christian eucharist, supernatural multiplications of food and drink, and miracles of bodily manipulation, including stigmata and inedia (living without eating). The occurrence of such phenomena sheds much light on the nature of medieval society and medieval religion. It also forms a chapter in the history of women. Previous scholars have occasionally noted the various phenomena in isolation from each other and ha.

Entertainment-Education Arvind Singhal, Everett Rogers, 2012-12-06 Arvind Singhal and Everett M. Rogers have developed this unique volume focused on the history and development of entertainment-education. This approach to communication is the process of designing and implementing a media message to both entertain and educate to increase audience members' knowledge about an educational issue, create favorable attitudes, and change overt behavior. It uses the universal appeal of entertainment to show individuals how they can live safer, healthier, and happier lives. Entertainment formats such as soap operas, rock music, feature films, talk shows, cartoons, comics, and theater are utilized in various countries to promote messages about educational issues. This book presents a balanced picture of the entertainment-education strategy, identifying ethical and other problems that accompany efforts to bring about social change.

Sperone Speroni and the Debate over Sophistry in the Italian Renaissance Teodoro Katinis, 2017-11-01 The first study of the rebirth of ancient sophists in Speroni (1500-1588) and the early-modern Italian literature, from Leonardo Bruni to Jacopo Mazzone.

Neo-Latin and the Vernaculars, 2018-11-12 This volume brings together case studies on key aspects of Neo-Latin and vernacular bilingualism in the early modern period, such as language choice, translations/rewritings, and the interferences between vernacular and Neo-Latin discourses.

Noun+Noun Compounds in Italian Radimský Jan, 2015-12-28 This book investigates one concrete compounding pattern in present-day Italian within a larger overview of Italian compounding. Various accounts and classifications of Noun + Noun combinations in Italian are reviewed, with special focus on the status of the lexical integrity hypothesis. The author sets out to propose an integrated approach to the Noun + Noun compounding pattern, rigorously based on large representative data sets that were extracted from the Italian web corpus ItWaC as both automatically and manually post-processed frequency lists. On the basis of such data, it is aimed to show the behaviour of various subtypes of Noun + Noun compounds. Starting out with the Bisetto-Scalise classification, the author carefully examines the status of coordinate compounds, ATAP compounds (i.e., the group comprising attributive and appositive structures) and subordinate compounds (comprising verbal-nexus and grounding compounds), discussing both theoretical and empirical implications of this classification scheme. Moreover, the original Bisetto-Scalise model is supplemented with further classification levels in order to capture specific compounding types such as relational (i.e. inherently trinominal) compounds. A major merit of the present study lies in the quantitative dimension of the data it deals with. In light of this data, the author emphasizes the gradient nature of the traditional dichotomy between syntax and compounding. The book will thus appeal not only to the linguists interested specifically in Italian word-formation, but also to a larger community of scholars who seek a more general view of the word-formation phenomena.
