Los Angeles Restaurants Andrea Richards,2020-08-04 Los Angeles is one of the top restaurant cities in the world, and while much of the focus is on the new, it's the old standbys that offer a true taste of the city. These classic locales--best termed joints for their timeless flair--offer a unique perspective into the city's past and, in their enduring appeal, reveal what LA continues to be. Featuring more than 50 joints, including profiles of longtime patrons, plus their favorite menu items, Los Angeles Restaurants is proof that sometimes a dark corner booth in a mid-century steakhouse or a spot at a busy lunch counter is the best seat in town. Los Angeles Restaurants is more than a guidebook to the city's most iconic restaurants--it's a photographic adventure providing a fresh serving of the city's colorful past and its vibrant present.

What Is America Eating? National Research Council,Division on Earth and Life Studies,Commission on Life Sciences,Food and Nutrition Board,1986-01-01 For its annual symposium in 1984, the Food and Nutrition Board posed the key nutritional question: What is America eating? This resultant volume explains dietary habits, examines the impact of fast-food proliferation and the changing role of women as it affects dietary behavior, and analyzes the nutritional consequences of national dietary trends. Speakers focused on what major food consumption surveys and large-scale studies have demonstrated, including factors that shape eating patterns, eating trends such as snacking and food variety, nutrition policy and its effects on diet, and the overall nutritional status of the U.S. population.

Understanding Children as Consumers David Marshall,2010-04-19 What drives children as consumers? How do advertising campaigns and branding effect children and young people? How do children themselves understand and evaluate these influences? Whether fashion, toys, food, branding, money - from TV adverts and the supermarket aisle, to the internet and peer trends, there is a growing presence of marketing forces directed at and influencing children and young people. How should these forces be understood, and what means of research or dialogue is required to assess them? With critical insight, the contributors to this collection, take up the evaluation of the child as an active consumer, and offer a valuable rethinking of the discussions and literature on the subject. Features: • 14 original chapters from leading researchers in the field • Each chapter contains vignettes or case examples to reinforce learning • Contains consideration of future research directions in each of the topics that the chapters cover. This book will be relevant reading for postgraduates and advanced undergraduates with an interest in children as consumers, consumer behaviour and on marketing courses in general as well as for researchers working in this field.
