The Coastal Guide of South Africa Lynne Matthews, 2007 On an extraordinary journey along South Africa's coastline, this definitive guidebook explores the beauties and hidden secrets of the country's natural heritage. Stretching for almost 2,000 miles, the country's southern shoreline contains distinct climates that

accommodate an enormously rich and diverse array of birds, mammals, reptiles, marine life, and plants. The west coast plays host to cold, nutrient-rich waters, kelp forests, and low-growing, succulent scrub along the dunes, while on the east and north coasts conditions are more tropical with higher rainfall, warmer waters, greater marine diversity, and tall, dense forests. This handbook outlines the coastline's biodiversity from dune to ocean, developed in order to offer beach enthusiasts, vacationers, and recreational anglers a simple way to identify the plants and animals most commonly seen or caught along the coast. In addition to background information on tides and habitats, guidelines are also included for The Southern African Sustainable Seafood Initiative, a consumer guide to making sustainable choices. Detailed and thorough, this overview will create a deeper appreciation of what can be found on this rich and beautiful landscape.
