Dino Mania Michael Anthony DiSpezio,2003 Imagine there's a real Jurassic Park right around the block--wouldn't that be super? These dinosaur activities, projects, and other fun things to do are the next best thing. Journey back to ancient times with a prehistoric quiz that sets the facts straight on whether dinos could fly, if the largest dinosaurs dragged their tails on the ground, and what the complete skeleton of a T-Rex looks like. Identify different dinosaurs by their silhouettes. Flip through history with stick figure animations you make yourself. Learn about fossils and where to find them. The art's great, too: you'll see pictures of a fossilized tooth (actual size), an enlargement of an iguana, the image of an iguanodon, and more.

Dino Mania Michael A. Dispezio,2003-08-01 Uses fun facts, trivia quizzes, activities, and more to survey what we know about dinosaurs and how we have learned this information.

Dinosaur Summer Greg Bear,2014-04-01 “Certain to become a new classic of adventure beyond time . . . An unofficial sequel to Sir Arthur Conan Doyle’s *The Lost World*” (Prehistoric Pulp). Fifty years after Professor Challenger’s discovery of the Lost World, America’s last dinosaur circus has gone bankrupt, leaving a dozen avisaur, centrosaur, ankylosaur, and one large raptor abandoned. Now a daring expedition plans to do the impossible: return the Jurassic giants to the wild. Two filmmakers, a circus trainer, a journalist, and a young Peter Belzoni must find a way to take the dinosaurs across oceans, continents, rivers, jungles, up a mountain that has been isolated for seventy thousand years . . . Then, if they make it, all they will do is face the prehistoric wonders, dangers, and terrors of the Lost World.

I Drink for a Reason David Cross,2009-08-31 The star and creative force behind *Mr. Show* and *Arrested Development* pens his first and final book, chronicling his meteoric rise and abysmal fall in the literary world. After a decade spent in isolation in the Ugandan jungles thinking about stuff, David Cross has written his first book. Known for roles on the small screen such as never-nude Tobias Funke on *Arrested Development* and the role of David in *Mr. Show With Bob And David*, as well as a hugely successful stand-up routine full of sharp-tongued rants and rages, Cross has carved out his place in American comedy. Whether deflating the pomposity of religious figures, calling out the pathetic symbiosis of pseudo-celebrity and its leaching fandom, or merely pushing the buttons of the way-too-easily offended P.C. left or the caustic, double-standard of the callous (but funnier) right, Cross has something to say about everyone, including his own ridiculous self. Now, for the first time, Cross is weaving his media mockery, celebrity denunciation, religious commentary and sheer madness into book form, revealing the true story behind his almost existential distaste of Jim Belushi (*The Belush*), disclosing the up-to-now unpublished minutes to a meeting of Fox television network executives, and offering up a brutally grotesque run-in with Bill O'Reilly. And as if this wasn't enough for your laughing pleasure in these troubled times, some of the pieces splinter off with additional material being created online in exclusive video and animated web content created solely for the book-a historical first (presumably)! With a mix of personal essays,

satirical fiction posing as truth, advice for rich people, information from America's least favorite Rabbi and a top-ten list of top-ten lists, I Drink for a Reason is as unique as the comedian himself, and cannot be missed.

How to Build a Dinosaur Jack Horner, James Gorman, 2009-03-19 A world-renowned paleontologist reveals groundbreaking science that trumps science fiction: how to grow a living dinosaur. Over a decade after Jurassic Park, Jack Horner and his colleagues in molecular biology labs are in the process of building the technology to create a real dinosaur. Based on new research in evolutionary developmental biology on how a few select cells grow to create arms, legs, eyes, and brains that function together, Jack Horner takes the science a step further in a plan to reverse evolution and reveals the awesome, even frightening, power being acquired to recreate the prehistoric past. The key is the dinosaur's genetic code that lives on in modern birds- even chickens. From cutting-edge biology labs to field digs underneath the Montana sun, How to Build a Dinosaur explains and enlightens an awesome new science.
