**Professional Nomad** Maurice E. Marwood,2009-02-13 Go behind the scenes for a firsthand look at the corporate culture, values, management styles, challenges, and opportunities that cause organizations to succeed or fail. In this straight-talking account of his life and career as an international business executive, Maurice Marwood guides the reader through the corridors of corporate power and offers down-to-earth strategies for succeeding in a globalized economy. Throughout his 40-year career, Marwood fought to defend the virtues of capitalism and free enterprise against a constant onslaught of socialism and anti-business elements. Working in over 85 countries (in the Americas, Europe, Africa, the Middle East, and Asia); he was often on the cutting edge of international business developments. He first visited China, for example, shortly after the death of Chairman Mao, at the very beginning of the country's period of phenomenal growth. Later, while living in Taiwan, he devoted several years studying the history and culture of the ethnic Chinese, analyzing the complex, antagonistic relationship between the People's Republic of China and the Republic of China on Taiwan, as well as the reluctant role played by the United States. Marwood's candid memoir of his on-the-job successes, failures, and frustrations intertwines with recollections of personal adventures -- mountaineering, marathoning, cruising, and diving -- alongside reflections on ethics, morality, spirituality, and the epidemic of mysticism that destroys the lives of so many. Professional Nomad is not only a reference for those aspiring to a successful career in international business; it is a blueprint for a flourishing life - personal as well as professional - one lived with passion, determination, and ultimate satisfaction.

**The Routledge Companion to Media and Class** Erika Polson,Lynn Schofield Clark,Radhika Gajjala,2019-11-27 This companion brings together scholars working at the intersection of media and class, with a focus on how understandings of class are changing in contemporary global media contexts. From the memes of and about working-class supporters of billionaire populists, to well-publicized and critiqued philanthropic efforts to bring communication technologies into developing country contexts, to the behind-the-scenes work of migrant tech workers, class is undergoing change both in and through media. Diverse and thoughtfully curated contributions unpack how media industries, digital technologies, everyday media practices--and media studies itself--feed into and comment upon broader, interdisciplinary discussions. They cover a wide range of topics, such as economic inequality, workplace stratification, the sharing economy, democracy and journalism, globalization, and mobility/migration. Outward-looking, intersectional, and highly contemporary, The Routledge Companion to Media and Class is a must-read for students and researchers interested in the intersections between media, class, sociology, technology, and a changing world.

The Commercial Space Station Andrew M. Thorpe,2007-08-28 By 2016, the International Space Station will face retirement. What then? When colonizing space, NASA blazes the trails, but private industry must build the roads. For common citizens to inhabit space, there must be a station in near Earth orbit, only 400 miles high, where dedicated commercial activities can take place. It will be a hub of commerce where industrial scientists can perform chemistry and biology, tourists can have lavish vacations, solar power stations can be built and serviced, and where satellites can be tested and deployed. This is now within the grasp of several businesses that are determined to see this vision through. The commercialization of low Earth orbit can free NASA, and the other space agencies around the world, to colonize the Moon and Mars. In fact, these agencies will be some of the first customers on an industrial facility in space. The commercial space station can be the crucible from which a new economy is forged, where better medicines, cleaner energy sources, stronger materials, and wider human experiences can be realized. These space stations are being deployed now. They will do practical, useful things in space for the common good of taxpayers. They will be new tools in the fight to solve medical and environmental problems to come. And they will provide jobs and tax revenue. The 21st century will be an industrial space century where average citizens can participate as entrepreneurs or customers.

When a very potent artifact is stolen from them, the consequences are dire and drastic for all sides.Day Watch introduces the perspective of the Dark Ones, as it is told in part by a young witch who bolsters her evil power by leeching fear from children's nightmares as a counselor at a girls' summer camp.
